CELEBRATED

TRADE MARK. SEEDS,

INDIANAPOLIS, IND., U.S.A.

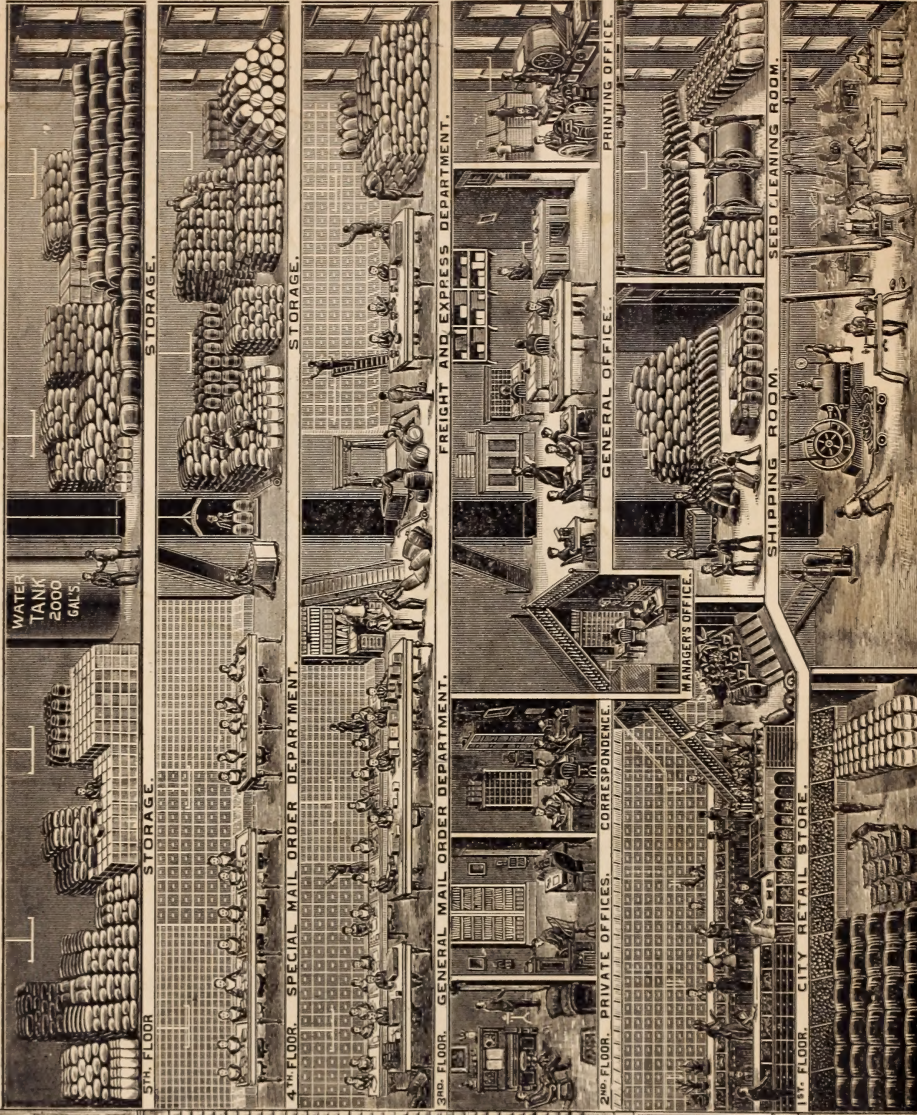

MAMMOTH SEED HOUSE ERECTED IN 1892. G. H. DUNSTON, LITH. BUFFALO, N.Y.
BUILDING LIGHTED BY ELECTRICITY FOR NIGHT WORK.

1894

ORDER EARLY. Why? Because we fear that another catalogue is arising and competition. We have prepared this catalogue to meet it. You can not do better if you wait until you need the seed, while if you order early we can fill the order to better advantage and you guard against possible delays while the great run comes on.

TRUCKERS' GARDENERS' AND FARMERS' DIRECTORY OF THE U.S. This is a new and complete directory of Gardeners and Farmers in your neighborhood. For your service, add a fee per of seeds to your order for 5 names or two 5c pkts. or one 10c pkt. for 10 names or more. If not sufficient space provided on the order sheet use a separate sheet.

BASEMENT. SEED POTATOES BULBS AND ROOTS. FORCE PUMP, ELEVATOR, MACHINE SHOP AND "MAN-WEIGHT" CULTIVATOR FACTORY.

THIS STORE GIVES US 27,000 FEET OF FLOOR SPACE ALL UNDER ONE ROOF.

Where the crowds congregate there must be some attraction. Where the orders grow there must be some inducements offered. Our whole business is planned on the basis of giving our customers all we can in quantity and quality for their money. Most business houses plan on the opposite basis; that is, give as little as possible for the money. Examine this catalogue, compare it with any other you may have at hand and see if it is not gotten up with **your interests** in view.

1893 surpassed all records in the trade done in O.K. seed. Year by year our trade has extended. Year by year O.K. seeds have been planted in new localities until now there are but few postoffices that may not be termed branches of our seed store, where O.K. seeds are received direct by planters throughout the length and breadth of the land.

To our old friends and patrons we return thanks. May they ever prosper as those people do who sow O.K. seeds. To the old customers of our house, and the new people who we hope to count as customers, we again send greetings.

We assure all that we were never before in as good condition as now to carefully execute your orders.

We were delayed some in our farm seed and seed potato departments last year on account of the builders not giving us these departments in time. Our new building is all complete now and possesses all facilities to handle the business quickly and carefully. We will thank you for your order.

OUR PRICES are as low as seeds of first quality can be sold. Note them carefully before buying. We believe in a fair distribution of rewards and don't want the earth," but only a small portion of it to grow good seeds, and ask a fair profit when we sell them. Farmers' organizations, such as the Grange, Alliance, etc., recognize our fair prices and patronize us. Parties buying seeds in person at either of our stores will be given discounts, to equal the postage we save and other expenses we incur in packing seeds for shipment.

DISCOUNTS. It requires almost as long to fill an order for one package of seeds as for one dozen, and while our prices are as low as we can afford on single packets, we will allow you very liberal discounts if you order a dollar's worth. For instance,

For Every Dollar Select \$1.50 Worth of Seeds in Packets. There is not another house in the country makes such a liberal offer. You don't need to buy more seeds than you need to get a discount. Any person can use a dollar's worth of seeds and everybody is entitled to the same discount. Sell O.K. seeds at catalogue price and make 50 cents on every dollar's worth in packets. Make up a club. See all of your neighbors.

FREE BY MAIL. We deliver all our goods free by mail in 4-lb. lots or less, also pints and quarts of beans, peas and corn, at prices quoted, unless stated to the contrary. Keep this in mind when comparing prices. When seeds are sent by mail, or express, the purchaser invariably pays the transportation charges, unless agreed to the contrary. You can get our choice O.K. seeds at your postoffice, no difference where you live, as readily as though you came to our store in person.

WARRANTY. 1st. We warrant all our seeds to be O.K. or all is right, and that they will grow with proper treatment, and be as represented, in so far that if they prove otherwise we will re-fill the order or return the money. We exercise the greatest care to have all seeds pure, true and reliable, yet so many contingencies arise over which we have no control that we can not warrant the crop. If not accepted on these terms they must be returned at once.

OUR TERMS are cash with order. We have a great many orders to fill in the busy season from every county in the Union, and we can not undertake to open any accounts. We will occasionally send goods C. O. D. if the order is from a reliable party, although it is an unnecessary expense for our customers to return the money for C. O. D. shipments.

HOW TO REMIT a Registered Letter. This is one of the best and most convenient ways to remit, and the sender gets a receipt for the letter as soon as it reaches its destination. Every postmaster must register letters. Postal Note, obtained at the money-order postoffices, and costs but three cents for sums under five dollars. Money Order, Bank Draft on New York, or Express. Stamps taken same as money in small amounts—2-cent preferred.

FREIGHT AND EXPRESS. We have an advantage over all other seed houses in the country in freight and express shipments, as we are in the centre of the country, instead of being on one side of it, as is the case with most other houses.

If there is not an agent at your station don't order goods sent there, unless you send money with the order to pre-pay the freight. Please remember this and you will be saved trouble and disappointment.

The Everitt Block.

"One of the finest buildings on Washington Street, Indianapolis, is the Everitt Block, erected in 1892."
—Indianapolis News.

The illustration on the opposite page shows the facilities required to execute the orders for O.K. seeds. All our customers are invited to come and see for themselves how we do the business and how carefully and with what system their orders are handled. The building was erected with the view of affording great strength and no expense was spared to give every part the most conveyance and we don't think there is a better planned seed house in the country. The limited space prevents us from showing its proper proportions, as the height is 75 feet and length is 195 feet, hence the illustration should be 2½ times as long as high. The illustration on 1st cover gives a front and west side view. A street runs the full length of the west side, affording light and air to every business facility for receiving and shipping goods. For the benefit of those who can not go through the house in person, we will explain as follows:

THE BASEMENT. The front part is devoted to storing seed potatoes and bulbs. We also have additional storage for these outside. The rear section, which is built high and light, is devoted mainly to fitting Everitt's Celebrated Man Weight Farm and Garden Tools, on which we have a great trade in this and foreign countries (see last pages of catalogue). Here, also, is a 10-horse power engine, operated by the explosive force of natural gas, which furnishes power for many machines. Oil, gas and water are used in itself. No heat, no smoke, no dirt, no engineer, but it runs day and night at an expense of 17 cents a day. Here, also, is a furnace, although not shown, for heating the entire building, and a dynamo where we make our own electric light for lighting the building.

FIRST FLOOR. The front is our retail city store, where we supply the best market garden seeds in the country for O.K. seeds. The rear is elevated for convenience in loading and unloading goods, and here is the shipping room, which has elevator connection with all the other floors.

The south end is not devoted to cleaning seed now; this work was transferred to the fifth floor.

MANAGER'S OFFICE. This is elevated above the first floor and below the second. Electric bells and speaking tubes places the manager here in easy communication with all parts of the building and he has the whole work immediately under his control, moves the mail, and is ready to open and assort.

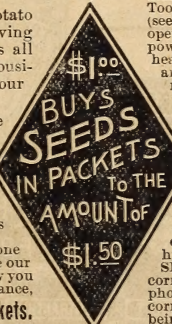

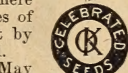

SECOND FLOOR. The front is devoted to private offices and correspondence rooms. In the correspondence office we employ two stenographers, the wonderful talking machines, to assist with our correspondence. They are run by electricity and talk like human beings. If you receive a letter from our office, it is dictated to the stenographer, you will know that one of those wonderful machines talked this letter to a typewriter girl. Next on this floor is the general office, where orders are booked and passed to the filling department. Next is the printing department, where we print millions of seed bags, circulars, etc. Our catalogue we have printed and will say that it taxed the utmost capacity of two of the largest printing offices in this city, working day and night, to get this catalogue out as rapidly as we required them, so enormous is the edition.

THIRD FLOOR. Front end is general mail order department. Here over 1,000 orders can be filled in one day and night, as with our electric light we make the building at night as light as day.

Rear end is the express and freight order departments.

FOURTH FLOOR. The front end accommodates the overflow of the mail orders in the height of the season. At other times it is devoted to storage. The rear end is for storage.

FIFTH FLOOR. On this floor we store thousands of bushels of bulk seeds, onion sets, etc. The tank shown here has been removed to the roof, and it furnishes a water supply for all uses in the building, while in case of fire, the water is available in every part of the building.

Would you have flowers in place of weeds?
Give to your garden "O.K. seeds."
Your fields will be blighted and weeds will grow.
If "O.K. Seeds" the farmer sows:
Your fruitage thrive beneath the rain
That comes to kiss the growing grain,
And prove how wise is he who heeds
Our song in praise of "O.K. Seeds."
Your toil will not have been in vain,
But rich reward will be your gain.
In comfort, ease, and well earned rest,
If "O.K. Seeds" your fields have blest.
Thus when the autumn comes and goes,
And brings bleak winter with its cold snows,
Plenty will crown the closing year,
And fill your days with grateful cheer.

Give Full address every time you write, and address all orders for CELEBRATED O. K. SEEDS to
J. A. EVERITT, SEEDSMAN, INDIANAPOLIS, INDIANA.

3 GREAT BEANS

1 PKT. OF EACH, 20c.

CHILDS' HORTICULTURAL BEAN.

The old Horticultural or Cranberry Pole Bean stands to-day as one of the very finest, both as a String Bean or Shelled. Its delicious quality is not excelled by any other. One of its greatest draw-backs is that it is not very prolific, the pods being short and containing only three or four beans. The value of this New Horticultural will be understood when we say that its pods grow in clusters, are six inches in length and average seven beans to the pod, and further that it is much earlier than the old sort. It originated in Maine and is one of the most important new vegetables, and is sure to take the place of the old sort, being twice as prolific, earlier and possessing other

points of superiority. The pods are beautiful, mottled with creamy white and rosy scarlet, and as they hang from the poles in great clusters among the rank leaves, they present a most beautiful sight. The beans are white, speckled and bloched with scarlet, and when cooked, either with pods or shelled, they are unexcelled in delicious quality. **Pkt. 10c. 3 for 25c. pint 30c., qt. 50.**

WILLOW LEAF LIMA.

An ever-bearing variety that matures its delicious beans even in the far North. Wonderfully prolific and ornamental. 1,728 pods from one bean. Many growers North, South, East and West, unite in pronouncing this the most wonderfully prolific bean known. This distinct new Lima makes a vine 15 to 20 feet long, so full of bloom and so loaded with pods throughout the season that it is the wonder of all. It is so robust and thrifty that it will grow and yield abundantly even in the short seasons of the North. It matures its luscious beans earlier than any other Lima, and continues to bear abundantly throughout the entire season, making it, in fact, an ever-bearing bean equally as good for market purposes as for family use, and so productive that only a few poles are needed to supply a large family. Think of being able to gather twenty well filled pods of Lima Beans at one grasp; it seems almost impossible, yet it has been done with this variety. Some customers report that they have tried in vain to raise Lima Beans before, but have had no trouble with the Willow Leaf, so thrifty do the vines grow, so quickly produce pods, well filled with Lima Beans, which are of the most exquisite flavor. Besides giving an abundance of luscious Lima Beans it will be an ornament to your garden, each vine making a tall shrub of luxuriant foliage covered with bloom. **Pkt. 10c. 3 pkt. for 25c. pint 30c., qt. 50c., by mail, postpaid.**

YOSEMITE MAMMOTH WAX BUSH.

The monster pods of this new variety average 10 to 14 inches in length, are nearly all solid pulp and absolutely stringless, cooking tender and delicious, yellow, a vigorous grower, covering

They are of a rich golden color, and are so productive, in such a manner as to

shade the earth and keep it moist; enormously productive. We recommend it to our customers. A great novelty. **Pkt. 10c. pint 30c., qt. 50c., by mail.**

Willow Leaf Lima Beans.

Yosemite Mammoth Wax.

ROUGH & READY OR HARD HEADING CABBAGE

Owing to the peculiar and extraordinary keeping qualities of this cabbage, which preserves the heads until late spring as green as when gathered in the fall, it is pre-eminently the King of Cabbage for late spring selling.

For get up and getting there this new variety occupies the field without a competitor. Season late. Sure to produce large heads of the greatest solidity even under unfavorable circumstances. The heads grow medium to large size, but owing to their hardness it is one of the heaviest cabbages grown. Those who have this cabbage for sale in the spring will have the market all to themselves, and remember this is the time the big prices are obtained.

Read what a few growers have to say about this cabbage:

Mr. R. M. EDGECOMB, Mapleton, Mich.: "I have just (April 15) taken out a wagon load of your Hard-Heading almost as green as when buried."

Mr. JONAS C. SCHOOB, of Cumberland, Pa.: "I put out fifty plants, and forty-nine made the heaviest heads I ever saw for the size, and all so uniform!"

A market gardener writes: "I have tried all the favorite kinds of cabbage, but found no other half so good a keeper, it being in good market condition as late as the 15th of May, which is a fortnight after all other kinds of cabbage have played out. It also differs from all other kinds in making heads as hard as a rock; standing late frosts in the field better than any other sort, it is especially adapted for late autumn, winter and spring sales." Pkt. 15c, oz. 40c, ¼ lb. \$1.25, lb. \$4.00.

2 GIANT CELERIES.

NEW GIANT PASCAL-LARGEST RIBBED CELERY IN CULTIVATION. GIANT GOLDEN HEART, UNEXCELLED FOR MARKET. ONE PACKET EACH FOR 15 CTS. POST-PAID

EVERY lover of this delicious, healthful vegetable should procure seed of these grand new sorts. If grown for home use, market or exhibition they will please greatly.

GIANT PASCAL.

This is the most valuable acquisition to our list of Celeries made in years. It is sport from the Golden Self-Blanching and by skillful selections its type has been thoroughly fixed. It excels in rich, nutty flavor, and is absolutely free from any bitter taste. The beautiful illustration does not do justice to this magnificent variety. The ribs are the largest of all, thick, hard, solid, entirely stringless, and of beautiful waxy appearance. The inside is self-blanching, while the outside blanches very quickly, requiring only a few days. It is never watery, and can be eaten when quite young, and keeps sound late in the winter.

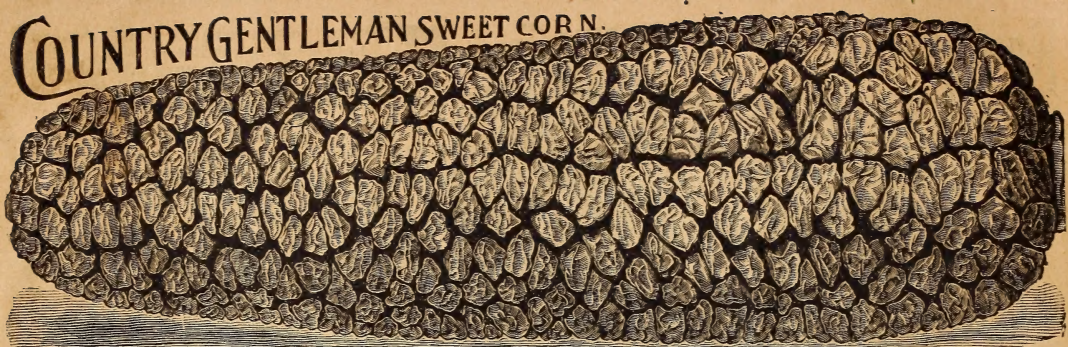

The merits of this variety are such that every person who raises a stalk of celery should procure a package or more of seed. Pkt. 10c, 3 for 25c, oz. 25c, ¼ lb. 75c.

GIANT GOLDEN HEART.

Among the new vegetables grown as specialties by the Chicago Market Gardeners, this desirable Celery is perhaps the most prominent, because of the great value and extent of cultivation of this article in the vicinity of Chicago. This variety was originally produced by a careful selection from the Dwarf Golden Heart, by a gardener, who made the need of a critical market his study for years. The quality is fully equal to the original stock, and in habit of growth is considerably taller than its parent variety; the stalks are very thick, perfectly solid and of excellent flavor. Another quality and one for which we most highly recommend it to the gardener, is its excellent keeping habit. In this respect it is one of the best Celeries for winter storage, for market or for the private planter. It is well known that many varieties are lacking in keeping qualities, though excellent for early use. Our two giants are indispensable for those who take advantage of the late market. Pkt. 10c, 3 for 25c, oz. 25c, ¼ lb. 75c.

COUNTRY GENTLEMAN SWEET CORN.

This superlatively fine corn is of the style of the Shoe Peg Sweet Corn, which we have sold for several years, but is a vast improvement on it in size of ear and productiveness. The ears average about 8 inches in length, but frequently grow to 12 inches, yielding oftentimes 3 or 4 on a stalk. The grains are very deep, snow white, and entirely the most tender and sweetest of all. It matures in advance of the Evergreen. For the family garden and choice market trade no variety can surpass it, as it combines all good qualities. Every one of our customers should include some of this corn in their order, without fail. The grains are so deep that a mouthful is obtained at every bite. We hope our readers will excuse the not-very-delicate expression, but it fits this corn exactly. Large pkt. 10c, pt. 20c, qt. 35c, by mail. Peck, \$1.25.

IMPROVED EXTRA EARLY DWARF ERFURT

Cauliflower.

It was our good fortune to meet last summer a gentleman from Denmark, who was attending the World's Horticultural Congress held in connection with the World's Fair, at Chicago, and who has made a great specialty of improving and growing fine strains of cauliflower. We have obtained a supply of his finest strain of the above named variety, which we now offer to our customers. The most critical trade can depend upon this seed giving satisfaction. The grower states as follows:

"My specialty in the seed line is a superior strain of Early Dwarf Erfurt Cauliflower seed, of which I have for a long series of years been working on. I will not expatiate on the excellence of my seed, suffice it to say that the principles I have been persistently and invariably employing enables me to always produce the best quality of this variety. My favorable location on the salt water sea coast and the very propitious seasons we enjoy, in connection with my very strict and merciless selection of seed bearing plants of the highest excellence in type and stamina, have put me in a position to furnish a quality of seed surpassing anything it has as yet been my good fortune to send out."

J. PEDERSEN.

Price, pkt. 25c, ¼ oz. 50c, 1 oz. \$2.00, ¼ lb. \$8.00.

NEW PEARL WHITE

Egg Plant

This great novelty now offered for the first time is sure to meet with a warm welcome from all who love this delicious vegetable. It resembles the New York Purple in shape, but is pure white and oftentimes exceeds that popular variety in size. It is unequaled by any other sort in productiveness and of superior table qualities; fruits very early. In short, it is the very finest in cultivation. Pkt. 15c, 3 for 25c.

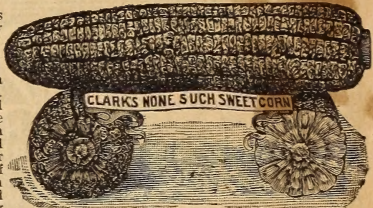

None-Such Sweet Corn.

We obtain this variety from Mr. Clark, of Ohio, who is probably the largest grower of seed sweet and field corn in the country. We give his description below, and his recommendation is a guarantee of its sterling worth:

"This variety was pointed out to me by a market gardener of Norwalk, O., who found a few ears in an old kitchen of a house he had bought. He planted same and found the corn to be of extra strong growth and fine quality and the stalks and fodder of a peculiar color of its own, tinted with pink. He saved seed and the following year planted one acre and sold it green in the city, and found the trade there wanting more than he could supply, and demanding that particular sort. He saved plenty of seed only to find the trade looking for the corn the moment it was fit for use. In the meantime, he was growing Evergreen for me and kept my attention to this new corn, until I asked him to bring me a sample for trial, which was grown and tested, and proved as represented. The crop came out pure as steel, of the finest quality. It is sure to please, because of its good sized ear, strong growing qualities and heavy yield. I will guarantee every cob to be pink in color, with white grain, of good size, tinted with pink at cob end. There is no glaze or flint in it, therefore it must be sweet and tender. It is twelve to fourteen rows, comes in use after Moore's Concord, with large ears. The fodder is of beautiful color, tinted with pink, both on leaves and stalk."

We advise every one of our customers to procure some of this corn. Pkt. 10c, pt. 20c, qt. 35c, by mail post paid. By freight or express, qt. 20c, peck \$1.00.

EVERETT'S SEEDS

FOR ALL SECTIONS OF THE COUNTRY.

Consider well the claims made by some parties that you must send North to get Northern Grown Seeds, or East to get Eastern Grown Seeds. No seedsman grows in his own Neighborhood all the seeds he sells. This is impracticable for several reasons, and impossible on account of the climate, as different varieties of seeds require different climatic conditions to perfect them. If you send to the far North or East you loose time, besides paying heavy transportation charges. We have seeds grown in all parts of the country, then gather them together in the center of the country from where we can supply our customers quicker and cheaper than they can be obtained elsewhere. The hint given above is well worthy of your consideration before you order your seeds.

Vegetable Plants. SEE PAGE 48

NEW CLIMBING JAPANESE CUCUMBER

NEW JAPANESE Climbing Cucumber.

This great novelty was introduced from Japan into Europe, where it created a great sensation and was the reigning novelty, and met with a phenomenal sale. From Europe it crossed over to this country, where they are also bound to have an enormous sale.

The vines are healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush, or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set the fruits abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow perfectly straight; of large size, from twelve to sixteen inches in length. The cucumbers are thick, exceedingly tender, and of delicate flavor; of cylindrical shape, flesh pure white, skin dark green turning to brown and netted, when ripe. They are of excellent quality for slicing, and when young make attractive pickles.

With this variety of cucumbers, the product of a given area of ground can be increased three-fold, thus making them particularly valuable in small gardens or to grow on high priced land. The vines continue bearing until late in fall. Pkt. 10c, 3 for 25c, oz. 30c.

EVERGREEN CUCUMBER

This variety has been thoroughly tested the past season and has proved itself to be an evergreen and also an everbearing sort. In cases where the cucumbers had not been gathered and frost killed the vines the ground, when viewed from a short distance, appeared to be entirely covered with cucumbers. Our special claim for this variety is its wonderful productiveness, while it is also one of the most handsome and valuable sorts grown. Pkt. 10c, 3 for 25c, oz. 25c.

WHITE WONDER CUCUMBER

This new cucumber is white from the time it begins to grow, and they are extra fine for eating fresh or pickling. It is a very hardy sort and can be planted quite early; vines grow strong and vigorously, withstanding droughts. The fruit set very full throughout the length of the vine. They average about 8 inches long. Skin very thin and white. Flesh is of the very finest quality, crisp, cool and brittle. Pkt. 10c, 3 for 25c, oz. 25c.

EVERITT'S EARLIEST OF ALL

that is fit for use ahead of any other Extra Early of any description whatever.

It is not a miniature tomato too small for any practical purposes, nor is it a rough knotty tomato that no good cook will waste her time on to prepare for the table. It is a fine, large, smooth, red tomato

On page 11 we offer a real Giant in Tomatoes. The largest of all. While size, combined with earliness, productiveness and high quality, to a great extent fills the bill, yet if we do not attain extreme earliness it lacks in being a complete all-around tomato. As is usual when we attain great size in a vegetable, we sacrifice to a certain extent earliness, hence we must make this up in another variety, which we have done in EVERITT'S EARLIEST OF ALL. Extreme earliness is where this variety excels. Outside of this we have equally as good tomatoes as regards color, form and table qualities, but none of them approach Everitt's Earliest, in season of ripening, by a week. This is a very important consideration, as it allows the market gardener to get the high price early in the season, which oftentimes is the only part of his crop that it pays to market. Everitt's Earliest of All is bright scarlet color, very smooth, solid and fine; medium size. The plant grows thrifty and spreading, thus allowing the sun to ripen the fruit evenly and quickly. Every gardener should plant this tomato. The small investment in seed will be many fold returned in the crop if used at home or marketed, besides the satisfaction of having fine large tomatoes ahead of any of your neighbors, unless they also buy Everitt's Earliest of All. Pkt. 10c, oz. 30c, 1/4 lb. \$1.00.

THE illustration above shows as nearly as an engraving can the distinct and attractive appearance of this grand new melon. No engraving can, however, do justice to the *exquisite beauty*, and *luscious appearance* of the melon in nature. Its peculiar netting and bright, glossy yellow skin, almost hidden by the close netting, are features peculiar to this melon alone. What our grower (the largest grower of Vine Seeds in America) has to say about the C. C. melon should convince every person of its merit. We quote as follows from his letter, dated Nov. 4th, 1892:

"I gave the Christopher Columbus Melon the best of land, location and care on my farm and must say that I was greatly pleased to note that this melon was *absolutely distinct* from any other sort I ever saw before. Quite a number of visiting seedsmen also agreed with me, and believed that it was to be one of the few real acquisitions to be selected from the unwarranted long list of new melons now being introduced."

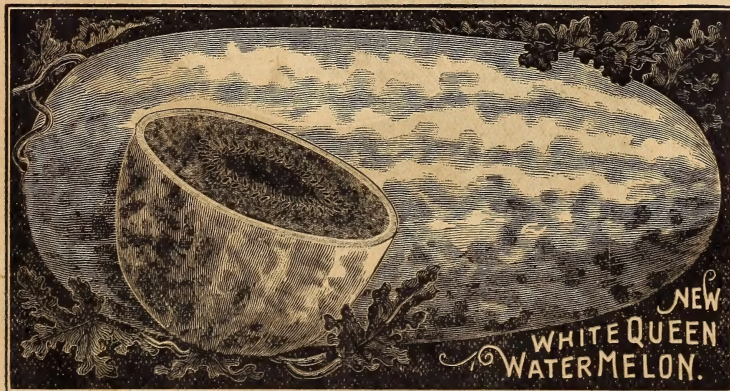

"The large size, peculiar shape and external appearance so remarkably distinct from any other sort known to me, in connection with its extraordinary

fine eating quality, which I can truthfully say excels all others in sweetness and flavor and its *fine-grained* and *deep or thick flesh*, will render it in all one of the best standard varieties and a popular favorite wherever introduced.

P. STIMMEL,
Omaha, Neb.

A new melon could not have a higher endorsement than the above. Growers must have the Christopher Columbus for profit or they will not be "in it." The size is very convenient for market, being medium, between the large and small sort. Season medium early, flesh green, very sweet, and of exquisite flavor. Seed cavity is very small. A good keeper. A good shipper, and the best all round musk melon extant, we honestly believe.

PRICE, Pkt. 10c, 3 for 25c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50. Don't let the price prevent you from getting a start of this melon. If you are not a thousand fold re-paid for the investment in the crop let us know and we will refund your money.

EVERITT'S White Queen Watermelon.

THIS beautiful variety of watermelons originated in Georgia and we are glad to be able to offer it to our customers. The engraving fairly represents it. Shape long. Kind, beautiful white, flesh, red; Seeds white with a dark border. Quality is very fine and equal to the best melon grown. The rind is hard and tough, making it a splendid shipper. Grows to weigh 25 to 40 lbs., and are very productive, almost covering the ground. This is the largest and finest white melon ever introduced and the handsomest of all melons. They will be sought after in every market and will command an extra price wherever put on sale. We advise every person who receives this catalogue and who raises

melons, to procure a package or more of Everitt's White Queen and he will be delighted with the results. Price, pkt. 10c, 3 for 25c, 6 for 50c, oz. 20c, $\frac{1}{4}$ lb. 50c.

O.K. NETTED

MUSK MELON.

This particular improved strain of the Netted Gem Melons, we have produced by years of careful selection, and their superior quality is attested by numerous large growers in many important trucking sections of the country who regularly procure their seed of us. This variety of melons is probably more largely grown than any other, and all planters should use the O.K. strain of seed. They are very prolific, small size, weighing 1 to 2 pounds. Flesh thick, green. Flavor deliciously sweet. The shape is almost a perfect globe. Extra early in ripening. They are usually marketed in baskets and crates, and it is the one variety that the markets are seldom overstocked with. We sell hundreds of pounds annually. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

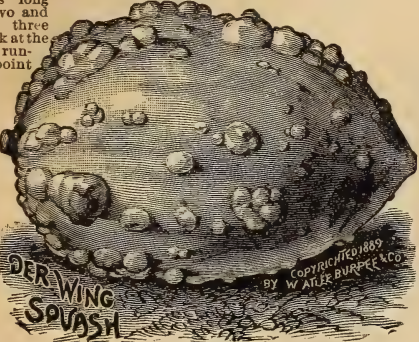

DER WING SQUASH.

This new squash from China is a great novelty. They grow about

five inches long by two and a half to three inches thick at the stem end, ripening to a point at the blossom end. It has a rather hard and thick shell which is completely covered with warts; the color of the flesh is a very light yellow. The flesh is moderately thick and

very sweet when cooked. It is a queer-looking, warty, hard-shelled little squash, with which you could almost knock down a bull. It is very productive and will prove a most excellent winter keeper. Pkt. 10c, oz. 20c, ¼ lb. 60c.

WE PAY THE
→POSTAGE←

THE FAXON SQUASH.

A distinctive feature of this squash is that the ripe squashes vary in color, some of them being pale yellow, with still paler yellow stripes in hollows, while others are green, mottled and faintly striped with a lighter green. In this respect it is different from all other varieties, and after years of careful trial, it follows its type absolutely true and proves that is a distinct new vegetable. The flesh is a deep orange yellow, cavity very small and seeds few; the special peculiarity, however, is that while uncooked it appears to have a shell like any squash, when cooked there is practically none; the shell or inedible part being only about as thick as a sheet of writing-paper. It is one of the best squashes of all—sweet and very dry—and for squash pies it must be tried to be appreciated. We know a trial will convince all of its great value. It matures early and can be used as a summer squash and is unexcelled as a winter variety; being a very late keeper, they having repeatedly been kept in our cellar in perfect condition until May. It is the

THE FAXON SQUASH.

only squash that every specimen is of superior quality without regard to size or whether it is ripe or green. This is a very desirable feature, as many squashes (the Hubbard especially) must be thoroughly ripe before frost, or the crop is lost. It is not so with "The Faxon Squash;" every specimen can be gathered and used. Very early, enormously productive, and of medium size and the best possible quality; we fully believe that this new variety is destined to a standard squash. Pkt. 15c, 2 for 25c, oz. 40c.

THIS CATALOGUE REPRESENTS

Enterprise, Ability, Capital, Facilities, Merit.

ENTERPRISE—Any person examining this Catalogue or going through our house will see no lack of enterprise. The edition of our Catalogue is so large that two of the largest printing concerns in this city are taxed to their utmost to turn them out rapidly enough.

ABILITY—Come and look through our vast establishment and you will see we are able to conduct a large seed business, like this Catalogue represents.

CAPITAL—This is the vital part of any business. Money is the life. We have money to buy right and seeds bought right can be sold right.

FACILITIES—There is not a seed house in the country with better facilities to execute your orders. Besides we offer the advantage of central location.

MERIT WINS—We have built up our business on the merit of O.K. Seeds. They are as good for '94 as ever before. We ask for trade on our merit as seedsmen and the merit of our seeds. We will not resort to trickery to get trade. Other seeds may possess qualities as good as ours. A cabbage grows no larger nor does a flower smell sweeter because the BLOW HARD SEED CO. sells the seed. The highest prices are generally found in the largest catalogues, or where prizes are offered. The Northern Seedsmen deceives you in his statement. Our Seeds are grown North, South, East and West. Beautiful lithographs excite hopes that are seldom realized. The biggest buildings have nothing to do with the quality of the seeds. Eastern seedsmen grow the bulk of their seeds in the West and then tell the dear public to "plant only Eastern seeds." If you buy from the seedsmen a long time in business you pay roundly for the privilege. Old relies come high and oftentimes are not worth the price. Commission seeds—avoid them—they are like quack medicine—unreliable. Without extravagant claims, but with a neat Catalogue, no premiums, reasonable illustrations, high quality seeds and moderate prices, we offer our CELEBRATED O.K. SEEDS and hope to have your order.

OUR MAIL in the busy season is enormous, being more than can be delivered by the regular carrier, and we employ a special messenger to make frequent trips to the City Post-Office, which is five squares distant, 1,000 letters at a single delivery is nothing unusual, and we have four or more deliveries each day, besides newspapers containing our advertisements, circulars, samples, etc., swell the bulk greatly. The service of two clerks are required from 8 o'clock in the morning till 10 o'clock at night to open the letters, assort them and mark the remittances thereon. Our outgoing mail is so large as to excite surprise and comment from people passing by. One and several wagon loads to the post-office every day after the season opens.

Orchard and Garden says: "The finest we have ever raised. The acme of beauty and perfection, and undoubtedly will become the most popular yellow onion in cultivation."

Popula Gardening says: "Among the score or more of fine sorts of onions none can hold a candle to Prize-Taker. Our specimens were the finest onions we ever raised. The smallest bulbs weighed over a half pound each, and the yield was at the rate of over 1,000 bushels per acre. No other variety can successfully compete with the Prize-Taker."

**Pkt. 10c, 3
for 25c, oz.
30c, $\frac{1}{4}$ lb.
\$1.00, lb.
\$3.00.**

**GENUINE
PRIZE-TAKER
ONION.**

All the seeds obtained from you did well. The early Six Weeks Market yielded at the rate of 457 bushels per acre. Early Mastodon is the corn for this section. Yield at rate of 104 bushels per acre.

M. WITZLATCH, Wood Co., W. Va.

Wisconsin Tree Beans, splendid; Bush Lima, the finest for table I ever saw; Satisfaction Peas, splendid for table; Logan's Giant Tomato, I never saw its equal; 12 plants raised, 6 bu. some 24 in. in circumference; Mortgage-Lifter and E. Mastodon corn turned out 140 bu. per acre.

H. F. STONE,
Oakland Co., Mich.

NEW RADISH.
Market Gardeners'
Ideal Long Scarlet.

This is not a new radish strictly speaking, although many seedsmen would pass it off as such. It is an improvement on the old reliable Long Scarlet Short. It is a week or two earlier than the old strain, has a shorter and more compact top; remains in good condition longer. In shape is shorter and thicker. It offers an advantage if not possible to market one when pulled. The upper portion is deep red, shading off to white at the tip, a good thing making a radish of the most beautiful form and color. This radish will be represented in garden where its merits are known. Price, 20c, 1/4 lb 50c, lb \$1.50.

**Everitt's
Man-Weight Farm
and Garden Tools.**

Have you one on the farm? You need it almost daily. It will plant you corn, beans, seeds, etc., in hills or drills. With it you can hoe 3 to 5 acres daily. You can not afford to run a farm or garden without one of these machines. See back cover page and other parts of this catalogue.

LOGAN'S GIANT SEEDLING

UNEQUALED IN SIZE, UNSURPASSED IN PRODUCTIVENESS, SOLIDITY, QUALITY AND SWEETNESS.

A GREAT SOLID BALL OF TENDER, DELICIOUS MEAT, WITH VERY FEW SEEDS—THE BEST EVER PRODUCED.

Illustration of a specimen from Nature!

WE CONTROL THIS NOVELTY EXCLUSIVELY.

THIS Great Tomato can be described in a few words, as follows:

The largest. The most solid. The most productive. The best quality. Others claim wonderful properties, offer prizes to induce big reports, but our Logan Giant Seedling comes out victorious every time. If you have tried the largest Tomato heretofore, try this one now, and you will see that you did not have the largest and best heretofore. It is not only a new variety, but we claim for it in points of productiveness, size of fruit, exquisite quality and flavor as well as early ripening, *the best Tomato extant.* They grow to weigh over 3 pounds each and attain the enormous circumference of 2 feet. This tomato is not like many others, one-third seeds and water. They are a great solid ball of tender delicious meat, *with very few seeds.* They have frequently sold at 15 cents each in competition with other kinds at 35 cents per bushel. If the vines are trained on a support, they will grow ten feet high and be loaded with the finest fruit you ever placed your eyes on. We advise early orders, as last season we were obliged to cut down the size of our Packets to make them go around. We have five times as much seed this year, but we also expect a greater demand, although last year the demand was greater for this tomato than for anything else that we catalogued.

READ THE FOLLOWING REPORTS: (All letters are on file in our office).

"We never saw their equal for prolific bearing and size. It is a marvelous sight."
PENNA. FARMER.

"Have eaten the Logan Giant Tomato, and am pleased to say it is the greatest improvement I ever saw in any vegetable. It is the best tomato I ever saw."
D. H. CHRISTY, Pa.

"The earliest. The largest. The best yielder. The most delicious tomato I ever ate."
KENNEDY COLE, Pa.

"Two Giants weighed 36 ounces each. They are truly wonderful. The Giant Tomato grow very tall and fruited very large and prolific, hence, imagine my surprise to find them so solid, sweet and delicious. **The finest I ever ate.**"
MRS. I. C. HARRIS, Pa.

"I picked 16 pounds of Giant Tomatoes at one picking from one vine."
SAMUEL JOHNSON, Pa.

"I have bought the Logan Giant Tomatoes at \$3.00 per bushel, for sale in my store before other varieties were ripe. Ripened early."
H. J. LIEBERMAN, Pa.

"I bought ten new varieties last spring and gave them a fair comparative test. 'Logan Giant' stands first for size and quality. **I never raised nor seen such fine tomatoes before in my life.**"
J. B. CURTIS, N. Y.

"Mr. Wade, of Blooming Valley, brought to this office a cluster of 8 tomatoes all on a single stem, weighing 10 pounds. They are of the 'Logan Giant' variety. The quality is equal to the quantity."
PENNA. FARMER, Pa.

"Logan Giant Tomato is the best I ever saw. I sold single tomatoes for 10 cents each; the product of a single stem for 10 cents. Single plants bore 30 pounds of fruit. Twelve weighed 23½ pounds. They ripen with the earliest."
D. L. MARSHALL, Mo.

Logan's Giant Tomato can not be sold for less. They yield so few seeds that the price must always be high. Large tomatoes with not more than 12 seeds are quite usual. 1 pkt. of seed will grow about 20 bus. of tomatoes worth \$5 to \$10 more than 20 bus. of ordinary tomatoes.

Grand Orchard Collection. 82 Trees for \$3.50.

THE GREATEST BARGAIN OF ALL.

The average business man strives to give as little as possible for the money. The public are after getting all they can for their money. One of our rules is, give all we possibly can for the money charged. This is one of the reasons why our trade increases with such phenomenal rapidity. There are many bargains offered in our 1894 Catalogue, but on this sheet

we offer the Greatest one of all. An orchard of **82 Trees and Plants** for

Only \$3.50

Who ever heard of such an extravagant offer before? Study the illustration to left and the list below for a moment and consider what this collection would cost if bought from a tree agent, or even if you sent direct to any first-class nursery. In the first case, a dozen dollars would scarcely cover the cost, while in the second case fully half this much would be asked.

We can only afford to make this great collection of trees and plants from one of the largest nurseries in the country. In some cases we can not give the name of the particular variety that we will send. Different sorts are adapted to different parts of the country. We will always send the best trees, in these cases, for your section. All the trees are choice varieties, and each one will be correctly labeled. See the list.

them less if you take a dozen, but we will be much obliged if you will send this to a friend, after you order, so he may take advantage of the great bargain also.

If not ready to order this great orchard collection now, keep this Catalogue, as you will certainly want it before June 1st.

EXTRA SPECIAL: To all who order this collection now, and then send or hand this Catalogue to a friend, who they think will want the orchard collection also, we will have sent to them entirely free, for one year, a monthly paper devoted to fruit growing. The subscription price of which is 50c per year. It tells all about how to be successful in growing and marketing fruit. Ask for it if you want it. Address all orders to J. A. EVERITT, Seedsman, Indianapolis, Ind.

THE LIST

- 5 Apple Trees. 2 to 4 varieties.
- 1 Wilder Pear. New, best early.
- 1 Idaho Pear. New, early, very fine.
- 1 Choice Pear. Our selection.
- 1 Abundance Plum. New sort, from Japan.
- 1 Choice Plum. Our selection.
- 1 Elberta Peach. There is one orchard of 61,000 trees of this sort in the country.
- 1 Orange Quince. The good old sort.
- 1 American Sweet Chestnut. Best.
- 1 Royal Church Red Raspberry. Very fine.
- 6 Outhbert Raspberries. Our choice.
- 13 Choice Blackberries.
- 1 Fay's Prolific Currant.
- 4 Victoria Currants.
- 6 Fay Currant Cuttings. Plant deep.
- 1 Lancashire Lad Gooseberry. Very fine.
- 4 Houghton Gooseberries.
- 1 Diamond Grape. Best white.
- 1 Worden Grape. Excellent black.
- 25 Asparagus Roots. 2 years old.
- 1 Hydrangea. Hardy flowering shrub.
- 1 Russian Olive. A great novelty.
- 1 Horse Chestnut Tree.
- 2 Spiraea. A great spring and summer flower.
- 2 Hardy Rose Bushes. Queen of flowers.

Total 82, and the Price only \$3.50, about 4¢ each.

ARE YOU STARTING A NEW PLACE? IS YOUR OLD ORCHARD GIVING OUT? DON'T YOU WANT SOME NEW SORTS?

Order this collection. We guarantee safe arrival, but we can not ship until about March 15th. Order now. Early orders will be filled first. All orchard collections must go by freight or express at the expense of purchaser. One Collection \$3.50. We can not make

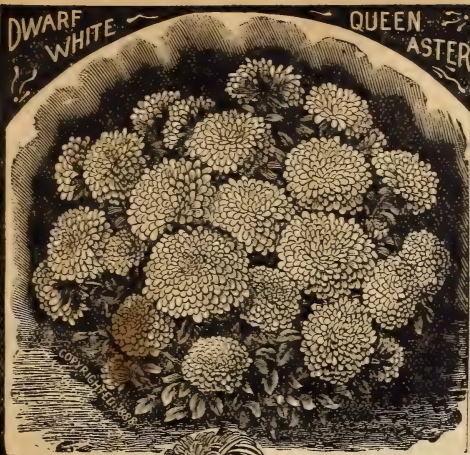

CINNAMON VINE

A beautiful and rapid climber, possessing the rare quality of emitting from its flowers the delightful odor of cinnamon, and very appropriately called the "Cinnamon Vine." The plants are grown from bulbs or roots, and are very nice for window ornaments, or out-door culture. They are perfectly hardy, the stem dying down every autumn, but growing again in the spring so rapidly as to completely cover any trellis or arbor very early in the season. The vines often run 25 feet or more, and when trained over and about a door or window make an ornament much admired, while its many clusters of delicate white flowers send out an amount of fragrance that is truly wonderful. It is easy to cultivate; has no insect enemies, and is not affected by drought, because it roots so deeply. The tubers are called "Chinese Yams;" (the botanical name being *Dioscorea Batatas*); they increase in size from year to year; are often two feet long at two or three years of age, and run straight down in deep soil. Flesh whiter than superfine flour and equally as good for table use as the very best potatoes. We have sold these bulbs for several years, and the plant has ever increased in popularity. We have always charged 25 cents for 3 plants, but this year we are prepared to offer 1 dozen bulbs in a neat box, by mail, post paid, for 25c, 3 boxes for 50c, 7 for \$1.00.

The Fragrant
Cinnamon Vine

PREPARED BY
J. A. EVERITT
SEEDSMAN
INDIANAPOLIS, IND.

NOVELTIES AND SPECIALTIES IN FLOWER SEEDS

53. **NEW DWARF WHITE QUEEN ASTERS**—This is one of the most beautiful varieties among this large and beautiful class of plants. It is impossible to praise this strain too highly. The plants are dwarf and bushy, growing only 10 to 12 inches high, branching freely in upright compact form. Excellent for pot culture.

and for bedding. Flowers are of extraordinary size and perfectly double; produced in the greatest profusion. Pkt. 10c.

12. **AMPELOPSIS—Veitchi.** (Boston or Japan Ivy.) One of the most valuable of our hardy climbing plants; it is extensively used for covering houses, clinging with tenacity to wood as well as brick or stone of any degree of smoothness. It far surpasses the Ivy. In summer the leaves overlap each other, forming a dense sheet of rich glossy green, which in the autumn changes to the most gorgeous shades of crimson, scarlet and yellow. Grows rapidly from seed. Pkt. 10c. 3 for 25c.

AMPELOPSIS—VEITCHI.

56. **COMET ASTERS**—The plants of this strain come perfectly true. Grow 12 to 15 inches high, forming fine regular plants covered with large double flowers, as shown in the illustration. The flowers measure $3\frac{1}{2}$ to 4 inches in diameter, resembling large flowered Japanese Chrysanthemums. This is one of the grandest floral specialties that we offer. Pkt. 10c.

Remember, \$1.00 pays for Flower or Vegetable Seeds in Packets to the Value of \$1.50.

36. **ALYSSUM. Little Gem**—The plants of this variety are of very compact spreading habit, growing only 3 to 4 inches high but a plant will spread over a surface 25 to 30 inches in circumference, bearing as high as 300 perfect spikes of flowers. Pkt. 10c.

TOM THUMB ANTIRRHINUM.

48. **Antirrhinums** usually survive the winter and flower even better the second than the first season. They are quite easily propagated by cuttings, and, if potted in the fall they make elegant pot plants for winter and early spring bloom. The Tom Thumb varieties grow only 8 inches high, of dwarf, compact habit, thickly studded with spikes of brilliant flowers. They are the best of all Antirrhinums, and one of the most showy garden or pot flowers. Their colors are many and brilliant. Pkt. 10c.

ANTIRRHINUM

MINIATURE SUNFLOWER—(Helianthus.) 339. h.a. The smallest and the most beautiful of all Sunflowers, growing 2 ft. high, branching in all directions, making a very symmetrical bush with dense foliage. Small, waxy leaves. The bright orange yellow flowers are produced, by hundreds, on each plant. Pkt. 10c, 3 for 25c.

237. COSMOS—The plants grow four to six feet high and are literally covered in the autumn with large, single dahlia-like flowers, ranging through shades of rose, purple, white, etc.; splendid for cutting purposes. Feathery foliage. Pkt. 10c, 3 for 25c.

CYCLOPS PERSEIC—Beautiful low-growing plants for pot culture, with elegantly marbled foliage. In the winter and spring a great profusion of exquisite flowers of rose red, white, are produced.

217. All colors. Mixed, 10c, 3 for 25c.

BEGONIA VERNON

100 BEGONIA VERNON—t.p. This remarkable variety of Begonias, comes, absolutely, true, from seed, and is of unusual value for bedding on account that it withstands our hot summer suns better than other strains. The handsome foliage and brilliant flowers make a plant unsurpassed for beauty. The flowers are brilliant deep red, require but little care and are bound to give great satisfaction. Pkt. 15c, 2 for 25c.

Do Any of Your Family Love Flowers?

You can get them so cheaply and easily of us, no person should be denied an abundance.

STOCKS—h.h.a. Brilliant and varied in color, equally well adapted for massing, bedding, edging or pot culture. Very profuse bloomers.

650. Dwarf German, Blood Red, 10c. 651. Crimson, 10c. 652. White, 10c. 653. Blue, 10c. 654. Mixed, 5c.

655. **Large Flowering German**—Produces long pyramidal spikes of beautiful double flowers, of a rich lavender color changing to azure blue, with a rich fragrance. For bedding or pot plant it is very fine. Pkt. 15c, 2 for 25c.

CAMPANULA—Cup and Saucer. 135. h.a. A beautiful variety. The bell or trumpet is nearly

four inches in diameter, presenting the form of a saucer, hence its name. The plant is of strong growth, quite hardy, blooms as abundantly as the old blue variety.

Is elegant and handsome when in flower, the blossoms literally hiding the plant; it is highly ornamental for borders or potted. Pkt. 10c, 3 for 25c.

MEXICAN FIREBALL

EUPHORBIA—(Mexican Fireball.) 266. h.a. A pretty hardy annual of the easiest culture, forming bushy plants 3 to 4 ft. high, with smooth glassy leaves, becoming tipped with greenish white flowers, leaves becoming blazed with dark, fiery scarlet tipped with green. Pkt. 10c, 3 for 25c.

341. **HELIOTROPE**—Dark Bouquet, h.h.a. A new variety of unusual beauty and richness. The large flower heads are intensely dark, of the deepest blue in color and most deliciously fragrant. Pkt. 10c, 3 for 25c.

MARIGOLD, h.a. These flowers have now, by careful and continuous selection, been raised to such a degree of excellence as to demand attention from all desirous of having a fine show of bloom in the garden during autumn.

For large gardens, mixed borders and general effect, they may be used with the greatest freedom.

415. "El Dorado." The finest type of this variety; flowers very large and double, many beautiful colors, mixed, Pkt. 10c.

416. French Dwarf, mixed, Pkt. 5c.

417. African Dwarf, mixed, Pkt. 5c.

MIGNONETTE, h.a. A well known fragrant favorite, which produces a pleasing contrast to the more showy occupants of the garden.

425. **Golden Queen**. Splendid spikes of golden yellow blossoms. Pkt. 10c, 3 for 25c.

426. **Parson's**, white, very beautiful. 5c.

430. **Giant Red**. Far superior to all others in size of flower spikes and brilliancy. Delightfully fragrant. Pkt. 10c, 3 for 25c.

431. **Mixed Sweet Mignonette**. Pkt. 5c.

GIANT RED MIGNONETTE

NASTURTIUM EMPRESS OF INDIA

NEW MAMMOTH SEEDLING VERBENAS

VERBENA—For garden beds massing, the Verbena is unrivaled; flowers of the most brilliant colors, blooming continuously from spring until late in the autumn. Although perennials, these form luxuriant plants and bloom profusely the first season from seed.

700. **Hybrida, striped**. Pkt. 10c.

701. **Hybrida, scarlet**. Pkt. 10c.

702. **Hybrida, blue**. Pkt. 10c.

703. **Fine Mixed**. Pkt. 5c.

704. **New Mammoth Seedling**. This distinct class of Verbenas is a great improvement on the older varieties. They produce flowers of great size, the florets being 1 inch in diameter. They bloom freely and our seed embraces all the best colors. Pkt. 10c, 3 for 25c.

435. **MIMOSA PUDICA**. (Sensitive Plant). Very curious. Pink flowers. Leaves droop on being touched. Pkt. 5c.

SWEET WILLIAM, h.p. The best varieties of Sweet William are of exceedingly beautiful colors, very large and almost perfect in form, with trusses of great size. The plants are perfectly hardy and may be increased by division of the roots.

750. **Fine mixed Single**. 5c.

751. **Fine mixed Double**. 5c.

406. **LOBELIA CARDINALIS**, h.h.a. This is the most distinct form of Lobelia in cultivation, and one of the handsomest of all out-door flowers. Its bright colored flowers, erect growth, and neat structure are admired by all. It is a very profuse bloomer, and keeps in flower until late in the fall. Pkt. 10c, 3 for 25c.

MIMULUS (Monkey Flower), h.p.p. Very free blooming class of plants, with spotted and blotched flowers, of bright colors. 436. **Tigrinus**. Pkt. 10c.

437. **Moschatus** (Musk Plant). Pkt. 10c.

455. **NASTURTIUM, Empress of India**, h.a. Flowers intense crimson scarlet, with a rich velvety gloss, profusely covering a compact bush with dark-tinted foliage 1 foot high. This is the most striking variety of its class. Pkt. 10c.

LOBELIA CARDINALIS

PHLOX DRUMMONDIA. NEW FRINGED AND STAR OF QUEDLINBURG—h.a. These Phloxes are so novel and distinct from any heretofore offered that they are entitled to rank as distinct species. We have space to show only the "Fringed variety." The "Starred" is on the same order, except the flower edge terminates in sharp points, forming star shapes. The beauty of these Phloxes are enhanced by the broad white margins bordering the edges of the petals. These strains embrace many colors. They are easily grown and flower profusely.

546. New Fringed. Pkt. 10c.
547. Star of Quedlinburg. 10c.

PANSIES—h.p. These lovely flowers are everybody's favorites, and are so well known as to need no lengthy description. Our collection embraces the best imported varieties. 490. Giant Trimardean, all colors, Pkt. 20c. 491. Yellow, Pkt. 10c. 492. Snow Queen (white), Pkt. 10c. 493. Faus, black, Pkt. 10c. 494. Striped, Pkt. 10c. 495. Blotched, Pkt. 10c. 496. Pure White, Pkt. 10c. 498. Imperial German, mixed, very grand, large strain, Pkt. 15c, 2 for 25c. 497. All varieties, mixed, Pkt. 6c.

489. **IMPERIAL GERMAN PANSIES**—h.a. Surpassing all other strains of these beautiful, popular flowers in their endless variety of colors. Unapproached in size and beautiful form of flowers, blooming throughout the entire summer.

It is impossible to describe with words their beauty. A trial will only suffice to show day by day the new combinations recurring through the whole season that will appear in coloring and forms.

We offer a splendid mixture, embracing the greatest variety. Pkt. 15c, 2 for 25c.

See general list beginning page 51.

POPPIES.

years many new varieties of Poppy have been introduced, but none of them can approach the Snowdrift for neat and compact habit of growth or immense size of flowers, frequently measuring $2\frac{1}{2}$ to 3 inches in diameter. It is a profuse bloomer, covering its foliage with pure white flowers, round, double, with finely frimbriated petals. Produces an abundance of bloom all summer. Pkt. 10c, 3 for 25c.

577. **POPPY VESUVIUS**—This is one of the most brilliant of all Poppies, the great double flowers resembling a glowing ball of fire, so vivid scarlet are they. They have, however, a distinct streak of white on each petal that will be found upon close examination. The flowers are 3 to 4 inches in diameter. Blooms profusely. Pkt. 10c, 3 for 25c.

44. **MOMORDICA INVOLUCRATA**—(New Red Balsam Apple) t.a. A beautiful new variety. The flowers are very large, creamy white dotted with black, and the males pure white with red pistils borne in lavish profusion. These are succeeded by sulphur yellow fruits 3 inches long, which change to scarlet. When ripe they burst and show the seeds of blood-red color. As the fruits and flowers are borne on the vine at the same time, the effect is gorgeous. Pkt. 15c.

ZINNIA—h.a. Fine, large flowers, of a great variety of colors—red, rose, crimson, scarlet, purple, orange, white and yellow. The flowers double as a Dahlia, remain in bloom from July till frost and make a fine display when grown in rows, the plants forming a dense hedge, covered with bloom. Height, 2 feet.

720. Yellow, 5c. 721. Scarlet, 5c. 722. Purple, 5c. 723. Violet, 5c. 724. Orange, 5c. 725. White, 5c. 726. Choice mixed, all colors, 5c. Tom Thumb, 10c.

442. **Mina Lobata**, h.a. Rapid-growing. Flowers in long racemes, crimson at first. 15 ft. high. Pkt. 10c.

GENERAL

LIST OF

VEGETABLE SEEDS

Interior of CITY RETAIL STORE, at
No. 123 WEST WASHINGTON STREET.
Branch, S.W. Cor. Market and Delaware Sts., opp. Principal City Market.

Cream,

NOT SKIMMED MILK is what we deal in, and the following list will be found to contain the CREAM of the Varieties. Hence, if we don't catalogue as many varieties as some other seedsmen, you can still get the CREAM or the BEST, from us, and the best is not too good for our customers. O. K. SEEDS GIVE BETTER AVERAGE RESULTS than those obtained from any other source at a less cost. WE COUNT ON YOUR ORDER SURE.

City Customers.

We are proud of our City Trade. It has increased each season, until now we count the best Market Gardeners as our customers. To afford better facilities for gardeners and others to obtain our celebrated seeds, we have opened a store at the South-West Corner of Market and Delaware Streets, immediately opposite the eastern market house, where will be kept a complete stock of Seeds, Plants, etc., which will be replenished daily from our great stock at headquarters, 123 W. Washington St. All interested parties are cordially invited to call and see us at either of our stores.

Parties purchasing at either of our City Stores will be given a discount equal to the postage and packing we save.

ARTICHOKES—Green Globe—The flower head in their green state is the part used of this variety. One oz. will produce about 500 plants. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.25.

MAMMOTH WHITE FRENCH—(Roots, see Farm Seeds).

ASPARAGUS—Connover's Colossal—A splendid variety of very large size and superior table qualities. One oz. will sow 50 feet of Drill. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.00.

PALMETTO—When it is understood that the Palmetto is not only much earlier but also a much better yielder and more even and regular in growth than any other variety, all growers will be ready to exchange for it. It is equally well adapted for cultivation North or South. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.00. Price of roots, either Colossal or Palmetto, by mail, doz. 25c; 50, \$1.00; 100, 1.75; by freight or express, 50 for 75c; 100, \$1.25; 1,000, \$10.00.

MERIT WINS AND PRICES TALK.

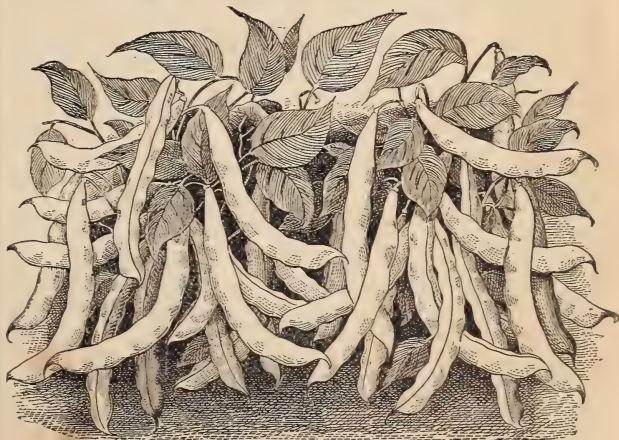

We have built up our great business on the foundation of good seeds at the lowest cost of production, with a fair margin added for profit after they are economically handled. Because of the immensity of our business, we can afford to deal liberally with our customers. Cut our trade in two and we would lose money. We believe the people will again rally to the support of

and Double
our Trade
for

1894.

LIGHTNING EARLY VALENTINE BEAN.

THE EARLIEST SNAP-SHORT IN THE WORLD. The most profitable variety for market. This variety is well named, as it is lightning in ripening in comparison with any other stock of this popular bean. The pods are large, it is very productive, and, when young, entirely stringless. It can not be recommended too highly to the market gardener, as he derives his greatest profit from the earliest crops. With the Lightning Early Valentine you beat your competitor one to two weeks, which means many dollars in profits. Sure to give satisfaction. Pkt. 10c, pt. 30c, qt. 50c, by mail, post paid. By freight or express, 1 peck \$1.50, bu. \$5.00.

Wardwell's Kidney Wax.

Best of All.

Rust-Proof Golden Wax.

3 EXCELLENT BUSH BEANS. 25c

One Package of Each for

One Quart to 100 feet of Row.

Price of Pkts., Pints and Quarts are Post Paid.
½ Peck at peck rates; ¼ Bushel at bushel rates.

1. Wardwell's Dwarf Kidney Wax.

Erect, hardy and productive, pods long, broad, flat, and of a delicate waxy yellow, brittle and entirely stringless. Beans white, with a reddish purple spot. Are very early and productive, and have never shown the slightest indication of rust or spot. A week earlier and yielding a third more than the Golden Wax. Pkt. 5c, pt. 25c, qt. 45c, ¼ bu. \$1.50, bu. \$5.50.

2. Best of all Bush Beans.

In its name is a broad claim, but we mean it, and we know the thousands of people who are fortunate enough to have this bean on their table next summer will support us in our claim that it is the **BEST OF ALL BUSH BEANS**. It is very early and bears a long time. Pods long, green, fleshy, tender and entirely stringless. Equally valuable for the family or market garden. Enormously productive. Pkt. 5c, pt. 25c, qt. 40c, ¼ bu. \$1.25, bu. \$4.50.

3. Rust-Proof Golden Wax.

This new variety must when fully known, take the place of the well-known Golden Wax. The Improved Rust-Proof Golden Wax is the handsomest and hardiest of all the Wax Beans. The pods are straight, long and thicker than Golden Wax, much superior in quality and absolutely rust-proof. It out-yields the Golden Wax two to one this season, and we think it will become the most popular of all Wax Beans. No progressive gardener should omit it from his list. Pkt. 5c, pt. 30c, qt. 50c, post paid; peck \$1.75, bu. \$6.00.

GRISWOLD'S EVERBEARING WAX—

This grand new variety is not excelled in quality and is unapproached in productiveness, as they begin to bear early and produce their magnificent pods throughout the entire season. Handsome pods, are entirely stringless and of rich, buttery flavor. Pkt. 10c, pt. 25c, qt. 50c, post paid. Peck \$1.75.

Early Yellow 6 Weeks—One of the earliest beans known. Seeds pale yellowish drab. Long green flat pods. Excellent quality. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.00.

WHITE MARROWFAT—A standard field variety for cooking dry. Largely grown. Quoted in all markets. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.00, bu. \$4.00.

GOLDEN WAX—A standard sort; very early; pods brittle, long, entirely stringless and of a rich golden wax color, of dwarf, compact habit, productive. Pkt. 5c, pt. 25c, qt. 45c, peck \$1.25, bu. \$5.50.

NEW EXTRA EARLY REFUGEE—This is a selection from the well known Refugee, and will be ready for the market ten days earlier, or about the time the ordinary Refugee is in flower. It is an immense yielder and sure to produce a crop in either a wet or dry season. Best for pickling. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.50.

4 GRAND POLE BEANS. 30c

1 pkt. of each worth 40c for about 1 quart to 150 hills.

1. Golden Andalusian.

We have sold this fine bean for five seasons, and not one complaint is on record, but it has had volumes of praise from our pleased customers from all parts of the country. Many pronounce it the most valuable of all. The pods are 6 to 8 inches long, thick, fleshy and stringless. It is very common to pick ¼ bushel from a single vine at one picking, and when placed on the table they have not a superior. They begin bearing when quite young and continue till frost. The beans are pure white and are a fine winter shell bean. Pkt. 10c, pt. 30c, qt. 50c, post paid; qt. 35c, peck \$2.50, bu. \$9.00, by freight or express.

2. Early Golden Cluster Wax.

We offered this for the first time four years ago, and market and private gardeners have written us in highest terms of praise. It grows rapidly, bearing very early clusters of three to six pods of rich golden color. Pods average about 8 in. in length, exceedingly tender and entirely stringless, retaining their plumpness and tenderness long after they have attained a large size, and continue to bear, if the pods are picked, until frost. Pkt. 10c, pt. 30c, qt. 50c, post paid; ¼ bu. \$2.25, by freight or express.

3. White Crease Back.

This excellent bean is known through some sections of the South as "Fat Horse Bean." For string beans it is simply perfection. Its handsome, green pods grow from 5 to 6 in. long, perfectly round, with a crease in the back. They ripen early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 10c, pt. 25c, qt. 40c, ¼ bu. \$1.75.

4. Kentucky Wonder or Old Homestead.

A very prolific sort, grows vigorously, and climbs well pods grow in large clusters, green, 9 to 10 in. long, nearly round; crisp and tender. Sure to give great satisfaction; excellent to grow in corn. Seed long, oval, brown color. We sell more of this variety of Pole Beans than of any other to our city customers. This hint may be of advantage to parties undecided what to purchase. Pkt. 10c, pt. 25c, qt. 40c, peck \$1.75.

Horticultural—A round speckled bean, used both in the pods and shelled. Pkt. 5c, pt. 25c, qt. 45c, peck \$1.50, bu. \$5.75.

Early White Dutch Case Knife—One of the earliest of all. Suitable for corn or poles, flat pods, well filled with fine, large beans. Excellent for winter use. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50, bu. \$5.75.

Red Speckled Cut-Short—An excellent variety and peculiarly valuable for planting among corn. Vines medium; pods short, round, tender and succulent. Good green or dry. Seeds medium size, white, with reddish brown dots. A wonderful yielder. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.50.

(Bush Beans Continued.)

IMPROVED EARLY RED VALENTINE—(Best selected stock)—Season 2 weeks earlier than the old valentine: much more prolific: pods green, unusually thick and fleshy, of the finest quality, unequalled in uniformity of ripening. Nearly the whole crop can be taken at one picking, making them most desirable for market gardeners. Pkt. 5c, pint 25c, quart 40c, $\frac{1}{4}$ bushel \$1.00, bushel \$4.00.

FIELD BEANS.

Below we offer our customers two of the earliest and most productive varieties of Field Beans in the country. The White Wonders we have sold for several years while the Wisconsin Tree we introduced only last season. They are both **O.K.** and bound to give our customers great satisfaction.

Last fall on account of the low price of wheat and the dry weather many acres of ground intended for wheat were not seeded. A large part of this can be **very profitably** devoted to growing beans, particularly if planted with such productive sorts as we offer.

WHITE WONDER FIELD BEAN.

The **White Wonder** is conceded by all our customers who have grown it to be the earliest, most productive and certain to produce a crop of all field beans they ever grew. Its only rival is our Wisconsin Tree Bean and the two make a strong team. It invariably gives more than *reasonable satisfaction*. It surpasses the grower. It out-yields the Navy when planted side by side with them by one-half to twice as much, besides coming much earlier. In a test it yielded at the rate of 500 bushels per acre. They can be planted after early potatoes or other early crops, and still make their crop, or the beans can be taken off and the ground sown to millet. The pods are large and filled with medium sized, pure white beans. Excellent for cooking and baking. Habit dwarf, very bushy and wonderfully full of pods. Just figure the profits on an acre yielding 40 to 90 bushels at \$2.00 per bushel. If you don't grow for market, get a pint or quart of the best beans for home use during winter. Plant about $\frac{3}{4}$ bushel per acre. Pkt. 5c, pt. 25c, qt. 40c, free by mail. By express or freight, $\frac{1}{4}$ bu. \$1.25, bu. \$4.00.

Improved Early Red Valentine.

E.
S.

WISCONSIN TREE BEAN.

This valuable variety for field culture is quite distinct from the California, or Mexican Tree Bean. The beans are twice as large and are far more productive, also much earlier. It is one of the most prolific beans known. Grows to the height of 18 to 20 inches, bearing its grain so high that the pods do not touch the ground, enabling it to stand a wet spell without injury to the crop. The beans are **very white**, cooking in much less time than the Navy, and of fine flavor. They yield 40 to 100 bushels to the acre. Parties who have been growing the old Tree Bean will find this a great improvement, more reliable and more profitable to grow. Plant $\frac{1}{2}$ bushel per acre, rows 30 inches apart, and have the stalks stand 6 to 8 inches apart in the row. When the crop is matured, the leaves drop off and leave the long full pods ready to pick or the stalks ready to pull. We guarantee this bean to give great satisfaction. Pkt. 10c, pt. 25c, qt. 40c, by mail; peck \$1.20, bu. \$4.50.

Lazy Wives' Pole Bean.

No good wife would want to be called a "lazy wife," yet she will be excused for exhibiting a lazy spell when "bean picking" time comes, if she has the foresight to plant this variety. They are called lazy wives because they hang so full and the pods are so long and broad that a mess is soon picked. One of our lady customers did not like the name; she changed it at her home to "Lazy Man's Wife's Beans." Our friends may call them by the name that suits them best.

The pods are **wonderfully broad, thick, fleshy and entirely stringless**, retaining all their good qualities until nearly ripe; a very desirable quality. The peculiar taste and agreeable flavor of this bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 10c, 3 for 25c, $\frac{1}{2}$ pt. 30c, qt. 50c, by mail.

LIMA BEANS

Everything you can desire in the shape of Lima Beans you will find on this page. One quart will plant about 150 hills.

HORTICULTURAL LIMA

DREER'S IMPROVED POLE LIMA—An improvement on the Large Lima. They are plumper and richer; remain green longer, which is an advantage to the market gardener. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.25.

LARGE WHITE POLE LIMA—This well known and delicious bean is everywhere esteemed. Very large. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.25.

KING OF THE GARDEN POLE LIMA—A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over nine inches in length, and containing seven great large beans. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.25.

CHALLENGE POLE LIMA—Have been constantly improved by saving beans from the strongest vines and best filled pods. They yield an amazing quantity of shelled beans. Pkt. 10c, pt. 30c, qt. 50c, 1/2 bu. \$2.25.

HORTICULTURAL POLE LIMA—This is a highly important novelty, as it is in every respect entirely distinct and meritorious. Cross between the common Lima and Horticultural beans. Very prolific, bearing 5 to 7 beans in each pod, fully 3 weeks earlier than any other Lima. Pkt. 10c, pt.

10c, qt. 75c.

The Jackson Wonder Dwarf Lima Bean.

The Jackson Wonder is the latest Dwarf Lima to appear on the market and in some respects is quite novel and distinct from all the others. The bushes grow 18 to 30 inches tall. When the pods are young they may be used as snap beans, when dry as Lima beans. The whole plant when loaded with foliage and beans may be used for ensilage, or the beans can be ground into a beautiful white flour. In this shape they can be shipped to all parts of the world and used for thickening soups, etc. They are immensely productive, bearing until frost comes. Drought does not affect their growth. When cooked they are rich, marrowy and fine flavored. Pkt. 10c, pt. 40c, qt. 70c by t. or ex. qt. 50c, pk. \$3.50.

HENDERSON'S BUSH LIMA

A few years ago a Bush Lima Bean was unknown. Henderson's was the first offered and the public were quick to recognize its great merit. It is extremely early, coming 2 or 3 weeks ahead of any other Lima. Enormously productive, bearing continuously until killed by frost. This variety is largely grown as a field crop, for its dry beans, being a reliable and heavy yielder, consequently a very profitable crop. We offer them at a moderate price. A light soil inclining to sand suits them best. Plant about 1/2 bushel to the acre. Pkt. 10c, pt. 30c, qt. 50c, by mail. By freight or express, peck \$2.00.

Henderson's Bush Lima.

BURPEE'S BUSH LIMA

358 Pods Borne on the Prize Bush.

BURPEE'S BUSH LIMA.

This is the true bush form of the large and luscious White Lima, and comes absolutely true from seed. The bushes grow 18 to 20 inches high, of stout growth and always erect, yet branching so vigorously that each

plant develops into a magnificent circular bush, from 2 feet to 3 feet in diameter. The leaves are of very large size and of great substance. The

bush character is thoroughly established, not one plant in a thousand showing any disposition to "run." The thickness of the main stalk and branches of the plant, as also the unusual size, healthy green color and thick leathery substance of

the leaves indicate the strong constitution of this variety, by which it is enabled to bear large crops, and is also a sure cropper. It is an immense yielder, each bush bearing from 50 to 200 of handsome large pods, well filled with very large beans, which are identical in size and luscious flavor to the well-known large pole Limas. By the introduction of this most valuable novelty, the largest and best Lima Beans can now be raised in quantity at small cost, without the expense and labor attached to the use of poles. Pkt. 10c, pt. 40c, qt. 70c, by mail. By freight or express, 50c per qt., \$3.75 per peck.

DREER'S BUSH LIMA

This Bush Lima bears the same relation to the other pole varieties, being short, thick, chubby and very delicious. Our limited space will not allow a full description or illustration, but we recommend them, for cultivation, along with the other three sorts. Pkt. 10c, pt. 40c, qt. 70c, by mail. By freight or exp., qt. 50c, peck \$3.75.

ONE Package each of the 4 Great Bush Lima Beans for 30c, by mail. Pole " " " " " 30c, " "

BEETS.

Beet seeds are a very short crop this season.

(Table Varieties.)

Sow all kinds of Seeds with Everitt's Man-Weight Drill.

One oz. will sow 50 feet of drill, 5 lb. per acre.

Price of all varieties of Beets: Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 60c, post paid; by freight or express, 2 lbs. or more at 50c per pound.

ECLIPSE—This variety is a great acquisition to our list of turnip beets. Our seed has always given the greatest satisfaction among market gardeners. It is as early as the Egyptian, and much more desirable, owing to its globe shape, great smoothness and regularity, having a firm, small top, very sweet, flesh fine and dark blood color.

EXTRA EARLY EGYPTIAN BLOOD TURNIP—A standard sort; ten days to two weeks earlier than the Blood Turnip. Owing to smallness of the top it can be planted very close. It is of fair quality and medium size; fine for forcing.

EDMAND'S TURNIP BEET—A selected strain which is very uniform and even in type; and flesh is deep blood-red color and exceedingly sweet and tender; round and smooth; of good market size. It is very early, and for marketmen's use is justly popular and much called for wherever it has been sold.

BASTIAN'S EXTRA EARLY BLOOD TURNIP—Profitable for the market gardener; very early, of quick, large growth; fine turnip form, and bright red color.

IMPROVED BLOOD TURNIP BEET—This is the best strain of this popular sort to be found in the country. It is grown especially for us from seed, the result of years of careful selection, which has increased its size and made it earlier than the common Blood Turnip. Color rich, deep red, fine grain, solid root. Excellent for all purposes, and a splendid keeper.

DEWING'S IMPROVED BLOOD TURNIP—Fine turnip form, very symmetrical in shape and free from any fibrous roots; flesh deep blood-red, very tender and sweet; early, and when sown late, desirable for winter. **HAIF-LONG BLOOD**—An excellent second early. Good also for winter use.

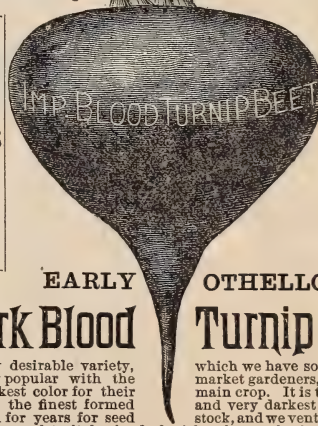

IMPROVED LONG BLOOD RED—One of the finest beets in the country for winter family use; also, on account of its great productiveness very valuable to grow as a stock feed for cattle. Quality is very fine, sweet, crisp and tender; color rich red; withstands drought.

Early Flat Bassano—Early, roots flat, turnip-shaped; flesh white, circled with rose color; grows to a good size on light soil; a fine market sort; of excellent quality when young.

Early Yellow Turnip—Similar to Blood Turnip in form, but yellow flesh.

Swiss Chard, Silver or Sea Kale Beet—A distinct vegetable, and makes superior greens. The ribs are used as asparagus, the leaves as spinach. We recommend all our customers to grow it.

Improved Long Blood Red.

**EARLY
Dark Blood**

**OTHELLO
Turnip Beet**

This very desirable variety, become very popular with the city of the darkest color for their fine selection of the finest formed annually selected for years for seed is no beet in this country equal to it for its dark rich color, perfection of form, or sweetness of flavor; foliage, dark crimson. Cooks sweet, tender and crisp. In every way we recommend this as a valuable sort for the market and home garden. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

I have used largely of O. K. seeds and always found them strictly first-class. I can not say the same for seeds from some other seedmen.

T. B. BAILEY, Mapleton, Ind.

We have good gardens from O. K. seeds and have used them for six years.

Wm. L. BREMAN, Harlan Co., Neb.

All your seeds do well here. I have a fine garden every year.

T. W. WALLACE, Fairfield, Tenn.

My Japanese Buckwheat is a sight to see. It is grand. Your seeds are magnificent.

D. W. STORRY, Blairstown, Pa.

Mangel Wurzel and Sugar BEETS.

Price of all varieties of Mangels: Pkt. 5c, oz. 8c, $\frac{1}{4}$ lb. 20c, lb. 60c, post paid. By frt. or ex., 2 lbs. or more at 40c per lb. Sow with Everitt's Man Weight Drill.

A cheap and valuable food for stock. Sow five pounds per acre.

IMPROVED MAMMOTH LONG RED MANGEL—This mammoth variety grows to an immense size; roots are massive, straight and regular in size, broad shouldered, small top, free from coarseness and of the most excellent feeding and keeping qualities, single roots weighing from 30 to 50 pounds each, and always of very fine texture and good quality. Under high cultivation over 2,000 bushels per acre have been grown. To secure the best results good seed must be used. Our strain is exceptionally fine, and will give great results.

CHAMPION YELLOW GLOBE MANGEL—Of superb quality and an enormous cropper, the great weight of 84 tons per acre having been grown of it, and single bulbs weighing 45 lb. each. Produces heavy crops on light soil.

MAMMOTH GOLDEN GIANT MANGEL—This variety is intermediate in shape between the long red and yellow globe. It is a very handsome root, with remarkably high shoulders, neat top and few leaves. It is nearly as broad at the top as at bottom, and the result is that every root is very heavy. The deep yellow color of its skin, and its richness in saccharine matter and flesh-forming substances make this root a favorite with leading farmers.

mers. A most excellent sort for shallow and light soil.

GOLDEN TANKARD MANGEL—This is an entirely distinct type of Mangel, of recent introduction, and highly prized wherever introduced. In England it is largely grown by dairymen and sheep raisers; the former prize it not only for its great yield, but for the rich character of the milk it produces, while the latter claim sheep fed on it thrive better and appear in much finer condition. It differs from all other mangels, having deep yellow colored flesh to the very core.

EVERITT'S JERSEY QUEEN MANGEL—A superior long red Mangel, which grows to immense size, and is enormously productive. In the best dairy regions of Europe this variety is almost exclusively grown, and it is the cheapest food they can raise on their high-priced land.

This is one of the most profitable variety to raise in America, and on rich ground 1,200 bushels per acre can be grown at a cost not exceeding 5c per bushel for all expenses, but really worth for stock food 20c per bushel.

FRENCH YELLOW SUGAR BEET—Grows to a large size, much above ground; roots half long, yellow; grown in this country for feeding stock. In France it is cultivated extensively for the extraction of sugar.

LANE'S IMPROVED IMPERIAL SUGAR BEET—This American variety has proved the best for the uses which such beets are put to in this country. It is not so sweet as the French Sugar beets grown especially for sugar making, but the roots are longer and more symmetrical, of fine grain and very sweet, making it good for table use or for cattle feeding.

VILMORIN'S IMPROVED IMPERIAL

SUGAR BEET—A medium sized white sugar beet, brought by the most careful selection to the highest perfection, both in the constancy of shape, size and color of the roots and their high sugar content. Greatly esteemed by sugar manufacturers.

BRUSSELS SPROUTS.

Improved Dwarf—The plant grows about two feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbage. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 60c.

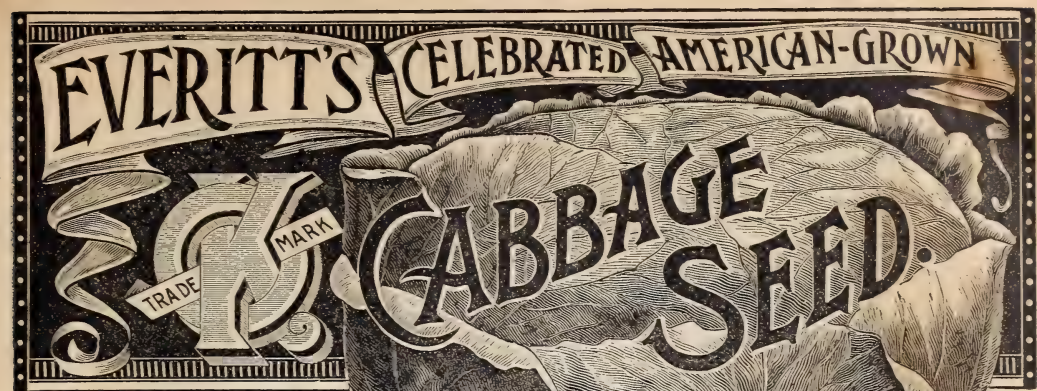

BROCOLI.

Early Purple Cape—This is the best variety for our climate. It produces large heads of a brownish purple color, very close and compact, and of excellent flavor. Pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. \$1.00.

FACTS

Don't think that because one seedsman asks a higher price than another that his seeds must necessarily be better. It is often the case that one seedsman charges 50 per cent. more than another for seeds that come from the same grower. Yet don't buy low-priced seeds unless you have good reason to think the quality is high. The quality of EVERITT'S O.K. SEEDS is always high, regardless of the price. Please remember this.

O.K. seeds are the best seeds I ever got from any house. Your cabbage made the biggest yield I ever saw and the finest heads. Beans excellent. Potatoes as fine as I ever saw. H. W. Woods, Huntingdon, Ind.

Good Cabbage Seed

Is one of our **GREATEST SPECIALTIES.**

We realize the importance of good seed in raising a crop of this staple article; also that it is universally grown in every garden for home use and for market. Hence, a reputation gained on good cabbage seed will influence orders for many other articles. As stated on the next page, our cabbages have as clear a record or pedigree as any stockman's fancy animals. Gardeners can not do better than to plant **Everitt's Celebrated American Grown O. K. Cabbage Seed.**

Short Stem
Drumhead.

EVERITT'S SHORT STEM DRUMHEAD CABBAGE.

This Famous Matchless Variety is a great stand-by. It has no superior as a

winter cabbage. As a variety for truckers to grow for shipment it can not be excelled. Very reliable to head in the south. Grows very compact, with few loose leaves, allowing close setting and yielding almost as many mammoth heads per acre as small headed sorts. Withstands drought well, and makes a large, round, firm head, which seldom bursts or rots. Heads frequently weigh over 30 pounds each, and are always hard and of fine quality. Be sure you start right by sowing **Everitt's Short Stem Drumhead Cabbage Seed**, and you will come out right in the end. Pkt. 10c, 3 for 25c, oz. 25c, $\frac{1}{4}$ lb. 85c, per lb. \$3.00.

NEW LATE CABBAGE.

Autumn King.

A new strain of late cabbage which is highly spoken of by all market and family gardeners who have thus far tested it. The heads are of enormous size and very solid. It has few outer leaves, as shown in the accompanying illustration, and owing to this fact it is claimed that **Autumn King** will produce a greater weight of crop from the same space of ground than any other late cabbage. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

4th. QUALITY. Tenderness is the result of rapid growth, and as the **All Head Early** comes in quicker than any of the other flat Cabbages it is consequently more tender; the veins and mid-ribs of the leaves are also finer than those of any other variety.

5th. ADAPTATION. While **All Head Early** is all that can be desired for earliness, it is also valuable for a late or Winter Cabbage. Seed of the **All Head** sown in July, and plants set out about the middle of August will bring heads large and solid, which are sure to winter well.

6th. YIELD. By reason of the compact habit of growth and absence of loose leaves, fully 1,000 more heads can be obtained to the acre than of most other varieties of good size. Set the plants 18 inches apart in rows, with 3 feet between the rows for cultivation, and **Nine Thousand Six Hundred and Eighty (9680)** plants can be set on one acre, *ninety-five per cent.* of which, in an ordinary season, and with reasonable cultivation, will make good merchantable heads. Price, pkt. 10c, oz. 30c, $\frac{1}{4}$ lb. 85c, lb. \$3.00.

All Head Early

CABBAGE

The introducer of this Cabbage makes the following strong claims. Our test has been highly satisfactory, and we unhesitatingly recommend the **All Head Early** to our friends:

1st. EARLINESS. It is the earliest of all large Cabbages, being at least a week earlier than *Early Summer*.
2d. SIZE. It is fully one-third larger than the *Early Summer*, and therefore much more profitable to the market gardener—considerations of the greatest importance.

3d. UNIFORMITY. The **All Head Early** is unquestionably the nearest approach to a thoroughbred Cabbage of any variety yet introduced, both as regards size and uniformity of development. The means employed to establish this variety secured the largest early heads, with the fewest loose leaves.

SELECTED JERSEY
WAKEFIELD.

9 SPLENDID VARIETIES OF CABBAGES.

We pay as much attention to producing seed of these nine popular varieties as any stockman does in breeding his fine stock. They are largely grown by many of our best gardeners. Our trade is large, hence our prices can be reasonable. We charge for the seed only, and not an extra per cent to make up premiums for largest heads, which you have not one chance in ten thousand to win.

For each acre of Cabbage you want to plant, sow 1 1/2 pound of seed.

One ounce will produce about 2,500 plants.

EVERITT'S EARLIEST.—The earliest of all and the best very early cabbage in the country. Produces fine solid heads in 70 days from sowing the seed. This is not a bunch of leaves, but a fair size, solid head. Our customers will find this a great step forward, and adds another triumph to the long list of successes of our celebrated seeds. It is a fine, early cabbage. Can be planted close together, making it possible to get large crops. Pkt. 10c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

EVERITT'S EARLY GIANT.—Not quite so early as the preceding, but a very early sort that we thought proper to call it. Early in summer you have cabbage heads equalling in size the fall and winter sorts. Forms very solid heads, with short stems and not much loose leaf. It is a fine, early cabbage. Our customers know it is one of the things that every person who receives this catalogue should send for. Its large size so early in the season will be a great point in favor of market gardeners, while it is one of the best fall and winter sorts. Pkt. 10c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

ALL SEASONS.—This grand cabbage has been sold by us for seven years, and if there is any one article that has given better satisfaction than the many others that we catalogued, it certainly is the All Seasons Cabbage. Not only has it proved itself suited for all seasons, but is praised by our customers in all

sections. If sown early will produce magnificent heads early in the season, and if sown late makes a superior winter sort. The heads are not liable to burst as many others. This cabbage we now sell in large quantities to many large growers who prefer it to all others. Pkt. 5c, oz. 15c, 1/4 lb. 60c, lb. \$2.25. By express at \$2.15.

SUREHEAD CABBAGE.—The heads are large, round, somewhat flattened on the top, very solid, tender and rich, with very few outer leaves, being nearly all a solid, compact head, but the most wonderful feature of the Surehead Cabbage is its ability to withstand the drought. It has made one single head on account of the extreme drought. In every instance it has given universal satisfaction. Our stock seed was obtained direct from the originator at a very high price, and has been kept strictly pure and unadulterated ever since. Pkt. 5c, oz. 15c, 1/4 lb. 60c, lb. \$2.25.

FLAT DUTCH CABBAGE.—This is a large, round, flat-headed cabbage of the Flat Dutch type in the country, not excepting the "Premium" and other strains listed by various seedsmen, and yet the heads are very solid as a large round cabbage. It is a fine, early cabbage. We have sold it for many years highly. Our stock is all American grown, as is all our cabbage seed. Pkt. 5c, oz. 15c, 1/4 lb. 50c, lb. \$1.75, 2 lbs. by express at \$1.60.

SELECTED EARLY JERSEY WAKEFIELD.—We pride ourselves on being able to offer a strain of this excellent

early cabbage that we are willing to place in competition with that procured from any other source. Our seed is certain to produce a crop having large, shapely heads, small outer leaves, and solid. Pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$2.25, 2 lbs. by express at \$2.15.

IMPROVED EARLY WINGSTADT.—One of the best Es-64 seeds for general sowing and growing. Heads regularly uniform shape, very hard, and keep well both summer and winter. Our seed can be relied upon as being the best. Pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$2.00, 2 lbs. or more by express at \$1.75.

IMPROVED EARLY SUMMER.—Unsurpassed by any other strain of this peerless early cabbage. Flat, large, solid heads will form in 30 days from seed sown with proper care. It is one of the best early sorts with short outer leaves. 10,000 to 12,000 per acre can be planted. Does not burst like many other sorts. For the home or market garden it can not be too highly recommended. It has given immense satisfaction everywhere. The seed is in your order. Pkt. 5c, oz. 20c, 1/4 lb. 75c, lb. \$2.50, 2 lbs. or more by express at \$1.75.

HENRY'S SUCCESSION.—As a variety for both early and late use, it scarcely has an equal. The Succession comes one week later than the Early Summer, and is so finely bred that in a field of ten across every head was a perfect specimen, and brought paying prices, while other kinds were sold at a loss. We know our customers run no risk in planting large quantities of the Succession Cabbage, but much will be gained in having the best crop ever raised. Pkt. 5c, oz. 20c, 1/4 lb. 75c, lb. \$2.50.

A Grand New Cabbage—Brill's Nonsuch.

This new, distinct and valuable variety of Cabbage we offered last season for the first time. It is a cross between the *Newark Early Flat Dutch* and *Brill's Excelsior Late Flat Dutch*. In size, medium between these two. In season, a few days later than the *Early Newark*. Possesses all the fine qualities of both parents. *Can be sown in the fall and will not run to seed like most second early sorts, when wintered over.* This fact alone will make it a favorite in the south and with northern growers who still use cold frames, and its combined good qualities will make it a universal favorite for summer, fall, or winter crop. This is really an "All Seasons" variety. Sown in the fall or in early hot-beds it will head immediately after the Wakefield, and may be sown at intervals until July 1st to 10th, when the sowing for winter use should be made. The originator, who is the largest grower of cabbage seed on Long Island, says: "The 'Nonsuch' is unquestionably the best Cabbage for general purposes ever introduced. Succeeds admirably as a second early, summer, fall or winter variety in every section of the United States and Canada. Long Island gardeners and others who saw this Cabbage growing willingly paid \$10.00 per pound for the seed." We hope every one of our customers will include in their orders a package of this fine cabbage. Pkt. 10c, 3 for 25c, oz. 20c, $\frac{1}{4}$ lb. \$1.00, 1 lb. \$3.50.

Fottler's Improved Brunswick—One of the most satisfactory early Drumhead varieties. Produces a large, firm, solid head, often weighing from 20 to 30 pounds. The quality is excellent. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, 1 lb. \$2.25.

LOUISVILLE EARLY DRUMHEAD—A very choice variety, following immediately after our Improved Early Summer. This variety is extensively cultivated for the Indianapolis market as a late summer and fall variety; when sown late makes a splendid winter cabbage. Large, solid heads, with few loose leaves. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, 1 lb. \$2.50.

Early Etampes—Forms fine, solid, pointed heads. Of extra quality. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, 1 lb. \$1.50.

Early York—A well-known early sort. Heads small, but firm. May be planted eighteen inches apart. Pkt. 5c, oz. 35c, $\frac{1}{4}$ lb. 40c, 1 lb. \$1.50.

Marblehead Mammoth Drumhead—The largest headed cabbage. Its size is indeed mammoth, and yet the heads are real solid. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, 1 lb. \$2.00.

Early Snowball Cauliflower.

EARLY FLAT DUTCH—Wonderfully popular wherever grown. A good second early, of excellent flavor. Heads large, round and solid. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, 1 lb. \$2.50.

Savoy Cabbages.

The Savoy approaches nearer to the flavor of the cauliflower than any of the cabbages. Every family should grow some for their own use.

DRUMHEAD SAVOY—A very large-headed variety, partaking of the size of the Drumhead Cabbage; flavor of the Savoy. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, 1 lb. \$2.25.

IMPROVED AMERICAN—Very sure to head. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, 1 lb. \$2.25.

You can get Everitt's Manual, Weight Cultivator and Dail Free. See page 35.

Imp. Am. Savoy Cabbage.

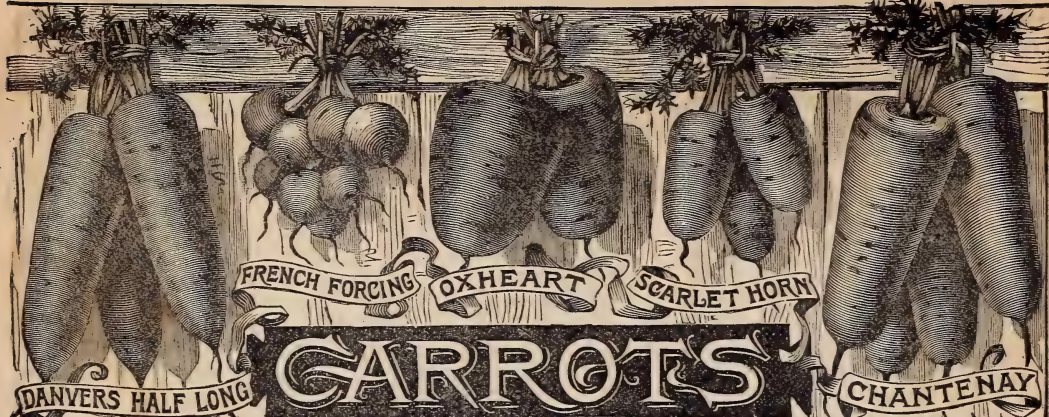

CAULIFLOWER.

EARLY SNOWBALL—Probably grown more than all other varieties together, for forcing or wintering over for early crop. It is exceedingly early and hardy and is one of the surest to make a solid, compact head. For these reasons it is also growing more in favor for planting for the late summer and fall crop. We spare no pains or expense to produce the best seed possible, and confidently recommend it as equal to that offered by anyone. Pkt. 20c, $\frac{1}{4}$ oz. \$1.25, oz. \$2.25, $\frac{1}{4}$ lb. \$8.00.

EXTRA EARLY DWARF ERFURT—Our stock is almost as early as Early Snowball and is very desirable for forcing or for planting out doors. Plants compact, with few narrow, upright leaves, making it the best for close planting; forms solid, compact heads under very unfavorable conditions and is therefore one of the most desirable for general use. Our stock of this is unsurpassed. Pkt. 20c, $\frac{1}{4}$ oz. \$1.00, oz. \$2.00, $\frac{1}{4}$ lb. \$7.50.

Early Paris—An excellent early sort. Short stalks, white head. Pkt. 10c, $\frac{1}{4}$ oz. 35c, oz. 60c, $\frac{1}{4}$ lb. \$2.00.

Veitch's Autumn Giant—Heads very large, beautiful white, firm and compact. Remains long fit for use. A valuable sort. Pkt. 10c, $\frac{1}{4}$ oz. 35c, oz. 60c, $\frac{1}{4}$ lb. \$2.00.

ODDS AND ENDS.

CRESS OR PEPPER GRASS—Sow early in spring, very thickly, in shallow drills. The sowings should be repeated every week, as it soon runs to seed. Used as a small salad. Extra cured. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

WATER CRESS—True. Pkt. 10c, oz. 25c, ¼ lb. 75c.

CHICORY, LARGE ROOTED OR COFFEE—Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

COLLARDS—A variety of cabbage. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.20.

CORN SALAD—Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 85c.

Green Curled Endive.

ENDIVE.

GREEN CURLED—Not only most useful as a salad, but it is highly ornamental from its delicately cut and colored leaves. It is much used for garnishing. (See cut). Pkt. 5c, oz. 15c, ¼ lb. 30c.

BROAD LEAVED BATAVIA—Chiefly used for flavoring. Price the same as above.

KOHL RABI—Early White Vienna—Very early, small, handsome, white bulbs. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

Early Purple Vienna—Identical with former, except in color. Pkt. 5c, oz. 15c, ¼ lb. 45c, lb. \$1.50.

CARROTS.

Sow 1 oz. to 200 ft. of Drill, 3 lbs. to the acre. Sow all kinds of seeds with Everitt's Man-Weight Drill.

The Carrot is one of the most wholesome and nutritious of our garden roots, and deserves to be more extensively used both for culinary and stock feeding purposes. We urge our readers to give some of the early table sorts a trial. For feeding stock, especially horses and milch cows, the carrot can not be surpassed, and it should be grown largely by farmers each season for this purpose. Full directions for cultivation on each package.

EARLY FRENCH FORCING—The earliest variety, largely grown for forcing purposes; globe shaped root of an orange red color. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY SCARLET HORN—Best for early planting out of doors. Tops small, coarsely divided; roots top shaped, but tapering abruptly to a small top; surface dented, skin orange red. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 85c.

DANVER'S HALF-LONG ORANGE—A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety, 20 to 30 tons being no unusual crop per acre. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 85c. By express, 75c per pound.

Large White Belgian—Grows one-third out of the ground; immense yield; large size; easily gathered; very suitable for stock. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 75c. By express, 65c per pound.

NEW CHANTENAY—This new half-long stump-rooted carrot is one of the most productive varieties known, has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in texture, and of a beautiful rich orange color. Well worthy of a thorough trial. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 90c.

IMPROVED LONG ORANGE—Long roots, good yielder. Good for table or stock. We offer the best strain of this fine variety. Pkt. 4c, oz. 8c, ¼ lb. 20c, lb. 75c. By express at 65c per lb.

RED SAINT VALLEY—A large, beautiful Carrot, of a rich, deep orange-red color. The roots grow very straight and smooth, from ten to twelve inches long. Very fine quality for table use, and very productive. Pkt. 4c, oz. 8c, ¼ lb. 25c, lb. 85c.

HALF-LONG SCARLET NANTES, STUMP ROOTED—Tops medium; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in center, but with no distinct core; of the finest quality. This and the preceding are the varieties so extensively used in France for culinary purposes, and only need to be known to supersede the coarser sorts for garden culture. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 85c.

Ox-Heart—This new carrot comes from France. It is intermediate in length between the half-long varieties and the Short Horn, but much thicker than the latter, attaining at the top 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation. Pkt. 5c, oz. 8c, ¼ lb. 20c, lb. 85c.

GIANT WILTSHIRE—This is the Goliath among the carrot family. Under rich manuring it will grow to be nearly the size of an average Mangold wurzel. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

ing celery in existence. With the **Eureka Self-Blanching**, choice blanched celery can be raised as easily as a head of cabbage or lettuce. We have sold to thousands of market gardeners, and they say they never raised any other crop that gave their customers as much satisfaction as the **Eureka Celery**. Stalks beautiful in appearance, dwarf, compact in growth, and very solid; color of outer leaves, cream, tinted with green; stalks and inner leaves creamy white; ribs very crisp, tender, and of **THE MOST SUPERIOR FLAVOR**. Pkt. 10c, 6 pkts. 50c, oz. 50c.

KALAMAZOO BROAD-RIBBED CELERY. It is a distinct variety, and its broad ribs, thick and closely set, are solid, crisp, and of fine flavor. Grows rapidly, and by reason of its neat and compact growth and showy appearance, makes a grand market variety. A first-class keeper, and taken all around is a variety that can be raised with great profit by home and market gardeners. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c.

WHITE PLUME—Each year adds to the popularity and value of this variety. Many market gardeners now plant their entire crop of it with the most profitable results. The heart and stalk is naturally white, and consequently requires very little earthing to blanch it. Eating qualities are the very best, but will not keep late in the winter. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c.

Boston Market—A very superior market variety; much esteemed for family and market use and a good keeper. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

GOLDEN SELF-BLANCHING—A remarkably stalky and strong growing variety; heavy stalks, solid and delicious flavor, *self-blanching* and a good keeper. One of the very best for early market. Pkt. 10c, 5 pkts. 25c, oz. 40c.

GOLDEN HEART—In quality, appearance and size this variety leaves nothing to be desired. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

CRAWFORD'S HALF DWARF—A great favorite with market gardeners. Early, solid, of vigorous growth, and nutty flavor; very ornamental and exceeds many of the larger growing kinds in weight. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

PERFECTION HARTWELL—The best flavored, most crisp and tender of the white varieties. The plants are a little taller than the Crawford's Half Dwarf, and a little later in maturing. The stalks are medium sized, round, very solid, crisp and tender, and of exceedingly fine and nutty flavor. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

NEW ROSE—It is a curious fact that the English markets demand nine-tenths of all their celery to be red, crimson or rose-colored, while our American markets almost ignore the red celeries. This would not be the case if our consumers were convinced of the fact that the red or rose celeries are better in many respects than the white. They are more solid, hence keep better, and have to a greater degree that nutty flavor so desirable in celery. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c.

White Plume.

Perfection

Hartwell.

Golden Self-Blanching.

Sweet Corn.

PLANT YOUR SWEET CORN IN HILLS OR DRILLS
with EVERITT'S MAN WEIGHT DRILL.

1 bu. will plant about 6 acres, 1 qt. 200 hills.

We quote plants and quarts of Sweet Corn by mail, pre-paid. If to be sent by freight or ex. deduct 5c. per pb., 40c per qt.

PRICE.—We sell all kinds of Sweet Corn, unless otherwise quoted, as follows: By mail, post paid, 75c. bu. \$2.40; 5 bu. or more at \$2.25 per bu.

Extra Early Adams.—The earliest white corn grown; ready for use in 60 days; used extensively wherever introduced. Can be planted earlier than the sugar varieties.

Early Adam.—Similar to above, but larger and not quite so early.

CORNY SUGAR CORN.—Ears are very handsome, sweet and juicy, and are the only early variety marketed in the United States. How is that for profit? It is the earliest of all the sugar varieties. **TWO CROPS CAN BE RAISED ON THE SAME GROUND IN ONE SEASON.**

EARLY MINNESOTA.—A well-known early dwarf variety; ears fine size and excellent quality.

CROSBY'S EARLY SUGAR.—Early and a great favorite in the markets of all the large cities. It is a rather small ear, but is productive and of good is considered the best of all the sugar varieties.

SHOE PEG.—A choice sort grown. The kernel is small, very long, white and exceedingly tender, sweet, and of a rich, juicy flavor that is not equaled by any other sort. Stalk of medium height, without suckers. In making it is medium late ear corn. For home use and choice market trade, it is unsurpassed.

PERRY HYBRID.—A new extra early variety with large, fine ears, and of the best Minnesota quality.

EGYPTIAN SWEET.—One of the best late varieties and

CHOICEST FLOWER SEEDS.
5 Cents per Packet and Upward.
\$1.50 Worth for \$1.00.

certainly the handsomest of all the late sorts. Ears large, none more uniform, and exceeds all in filling out and pore white. Very productive and used extensively for canning purposes.

STOWELL'S EVERGREEN.—Grown more extensively than any other variety, being a great favorite with canners and market gardeners. Ears large, and of good size; kernels very deep, tender and sugary; very productive, and remains a long time in fit condition for table use.

EVERITT'S EXCELSIOR.—Ripe early; has large 12 to 18-rowed ears and deep grains. One of the largest sweet corns grown. For home use and choice market trade, it is unsurpassed.

MAMMOTH SWEET.—This variety produces the largest ears of any sort with which we are acquainted. Some times weighing two or

three pounds. It is of excellent quality, sweet, tender and delicious and its only fault (if this can be considered one) is that it is not so early as some of the other varieties.

HICKOX.—A most excellent sort for home use or marketing. Ears very long, 12-rowed, large and uniform, quality excellent.

RUSSELL'S PROLIFIC.—Grown largely in the West, closely following the Corn Belt in maturity. Ears large, and of good shape; quality the best.

EARLY ADAMS CORN, EARLY MINNESOTA, CROSBY'S EARLY, SHOE PEG, PERRY'S HYBRID, EGYPTIAN, STOWELL'S EVERGREEN, EVERITT'S EXCELSIOR, MAMMOTH.

POP CORN.

Plant Pop Corn in hills with EVERITT'S MAN-WEIGHT DRILL and Cultivate the crop with EVERITT'S MAN-WEIGHT CULTIVATOR.

Plant 1 lb. for 250 HILLS.

MAPLEDALE PROLIFIC

MAPLEDALE PROLIFIC—A most profitable variety, bearing as high as 18 good ears on one stalk, but from our past season's trial we find 4 to 6 ears a good average. Besides its prolific character, the quality of the corn is superior. Ears 6 to 7 inches long, pure white grains, and pops large, pure white, and tender. Pkt. 5c, lb. 25c, 4 lbs. 85c, by mail; by express or freight, 10c per lb.

QUEEN'S GOLDEN—The handsomest of all pop corns. Large ears, golden yellow grains. A great yielder and extremely tender when popped. We have had a very large trade in this variety for the past three years, and every one of our customers should plant at least a few hills. Pkt. 5c, lb. 25c, 4 lbs. 85c, by mail; by express or freight, 10c per lb.

SILVER LACE—Grows 5 to 6 feet high, very productive; producing 3 to 4 perfect ears on a stalk. The ears are very handsome; 5 to 6 inches long and always filled out to the end with smooth, round, metallic, white grains. Superior quality when popped. Pkt. 5c, lb. 25c, 4 lbs. 85c, by mail.

WHITE RICE—The standard market variety. Pkt. 5c, lb. 25c, 4 lbs. 75c, by mail; 10c lbs. by freight or express.

BOYS' FAVORITE—Quite a novel sort; grows of many different colors. All growing on the same stalk. Very rich. You should plant. Pkt. 10c, ½ lb. 20c, lb. 45c, by mail.

ear. The quality is superior. grow a few hills of this, sure. Pkt. 10c, ½ lb. 20c, lb. 45c, by mail.

SNOW BALL—Very like the flakes of snow falling as it pops and like a pile of pure white snow as it lies in a heap. Tender, rich, melting. You can not desire more in quality. Early and productive. Pkt. 10c, ½ lb. 25c, lb. 35c, by mail.

EGG PLANT

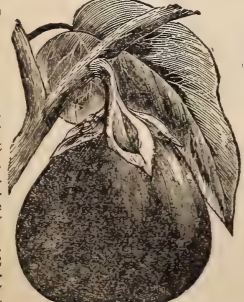

For Vegetable Plants, see page 48.

No gardener should be without a few plants of this most delicious vegetable. If all were acquainted with their excellence they would be grown as generally as tomatoes.

NEW YORK IMPROVED LARGE PURPLE—The leading variety grown by market men everywhere; fruit large, smooth and deep purple; flesh white and of good quality. Pkt. 10c, oz. 30c, ¼ lb. \$1.00, lb. \$3.50.

Early Long Purple—Hardier and earlier than the New York Purple, succeeding further north. Fruit from 6 to 9 inches long. Dark purple, good quality; one of the best varieties. Pkt. 10c, oz. 25c, ¼ lb. 85c, lb. \$2.50.

Extra Early Dwarf Round Purple—Same in general appearance to New York Purple, but smaller. Its great merit is its hardiness and extra earliness, hence it is valuable for northern sections. Pkt. 5c, oz. 30c, ¼ lb. 75c, lb. \$3.00.

N. Y. Imp. Large Purple.

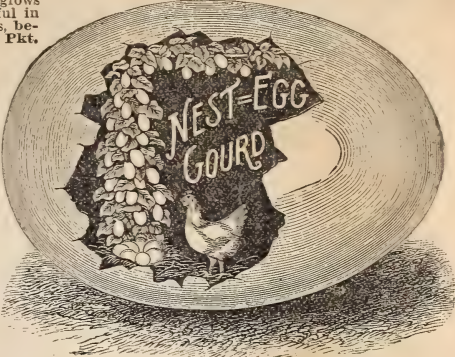

GOURDS

The following varieties will be found very useful about every house and barn: **NEST-EGG**—They exactly resemble the eggs of hens, and are very useful as nest eggs, never breaking or freezing, and are never injured by wet. By using them many eggs can be saved. The plant grows very rapidly, and is useful in covering unsightly places, being quite ornamental. Pkt. 10c, oz. 25c.

DIPPER—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through readily. Pkt. 10c, oz. 25c.

SUGAR TROUGH—Grow to hold from 4 to 10 gallons, with a hard, thick shell, making very light but durable substitutes for buckets or boxes, having been kept in use for 5 years. Pkt. 10c, oz. 25c.

DISHCLOTH—Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Start the seed early in the house or hot-bed, and transplant. Pkt. 10c, oz. 40c.

Dwarf Green Curled Scotch.

Cottage Kale—A variety of great favor; an immense cropper. Pkt. 5c, oz. 10c, ¼ lb. 30c, lb. \$1.00.

LEEK.

Large London—A large strong plant, with broad leaves. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

MUSTARD.

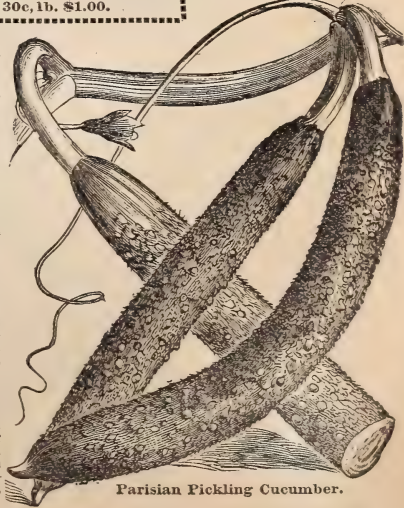

Black, or Brown. Pkt. 5c, oz. 10c, lb. 45c.

White—Best for salad or culinary purposes. Pkt. 5c, ¼ lb. 15c, lb. 45c.

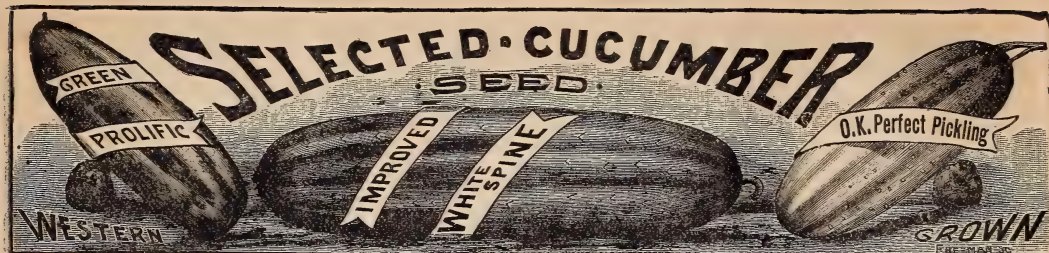

NEW CHINESE—Highly esteemed for salads, particularly in the south. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 85c.

Cucumbers.

PARISIAN PROLIFIC PICKLING CUCUMBERS—New and very desirable. This new French sort promises to be a great acquisition. The fruit is very long, slender, cylindrical, densely covered with fine prickles, and deep, rich green in color. The flesh is very crisp and tender, making it one of the best for slicing, as well as for pickles. The vine produces its fruit in clusters, and is enormously productive. Pkt. 10c, 3 for 25c, oz. 40c, ¼ lb. \$1.25c.

Parisian Pickling Cucumber.

We will sell any 5 Varieties of Cucumbers listed on this page for 20 cents; 10 Varieties for 40 cents.

GREEN PROLIFIC OR BOSTON PICKLING—A very prolific variety of fine qualities. With good culture 200,000 can be raised on an acre. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

IMPROVED EARLY WHITE SPINE—One of the best sorts for table use. Vines vigorous, fruiting early and abundantly; fruit uniformly straight and handsome, light green with a few white spines; flesh tender and of excellent flavor. In this country, this variety is used more, perhaps, than any other for forcing under glass. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

IMPROVED LONG GREEN—Produced by selecting from Long Green; forming fruit for the table nearly as early as the shorter sort, about 12 inches long, firm and crisp, with very few seeds. The young fruit makes one of the best of pickles. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

NEW EVERBEARING—Of small size, very early, enormously productive, and valuable as a green pickler. One vine exhibits at the same time cucumbers in every stage of growth; the small ones being perfect in shape, of a fine green color, and just the size for pickling. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

Imp. Long Green.

Early Green Cluster.

EARLY RUSSIAN—The earliest of all; small size, splendid for pickles; productive. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

EARLY FRAME—A standard early sort for the table and pickles. Vigorous growth and productive. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

EARLY GREEN CLUSTER—A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

WHITE JAPAN—Productive and of good quality. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

Early Frame.

Early Russian.

Arlington White Spine.

Giant Pera.

O.K. PERFECT PICKLING—Certainly one of the finest pickling cucumbers in the market. Early, and a great bearer, well formed, firm and crisp. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

GIANT PERA—A variety remarkable for its great size, often attaining a length of 18 inches and 10 inches in circumference. Notwithstanding this immense size, their quality is excellent. They are fit to eat at all stages of their growth, even when full grown, and are free from the green cucumber taste. We know that every purchaser of this seed will be immensely pleased. Pkt. 10c, 3 pkts. for 25c, oz. 30c, $\frac{1}{4}$ lb. 60c, lb. \$1.75.

WESTERFIELD'S CHICAGO PICKLING—Very popular with Chicago market gardeners, and extensively grown in that vicinity. Fruit, medium length, pointed at each end, with very large and prominent spines; color, deep green. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

Westerfield's Chicago Pickling.

GHERKINS—Very small and prickly fruit, used expressly for pickling. Pkt. 5c, oz. 20c.

SNAKE—This cucumber grows sometimes to the length of six feet, curled up like a large snake. Pkt. 10c.

ARLINGTON WHITE SPINE—A selection from the White Spine, being more pointed at each end. The young fruits are unusually crisp and tender, and are of a very dark green color, so that the variety is considered by many to be the best for small pickles. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

NICHOLS' MEDIUM GREEN—Very thick through and full at both ends. The very handsome in appearance, and of fine quality for table use. The vines are vigorous in growth and very productive. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 80c.

Nichols' Medium Green.

1 Pkt. each of the 8 splendid varieties illustrated on this page for 30 cts.

BLACK SEEDED SIMPSON—Grows fully double the size of the Early Curled Simpson, and is better in every way. Its much lighter colored, leaves being almost white. One of the very best. Stands summer heat splendidly. Largely grown. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

BUTTERCUP—This new variety comes very highly recommended. For beauty of foliage, extreme tenderness and delicacy of flavor, it is hard to beat. Always forms good solid heads. It is medium early and is equally suitable for either summer or winter growth. It is undoubtedly one of the best of all the new varieties. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

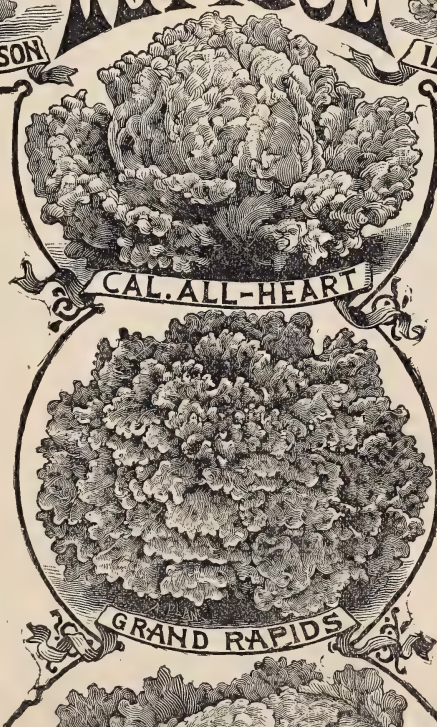

CALIFORNIA ALL-HEART LETTUCE—The originator says of this lettuce:

"No praise is too high, as its superior does not exist," and after a fair trial, we can endorse his claims and highly recommend the California All-heart Lettuce. Its handsome shape and appearance are well shown in the engraving made from nature. It heads up like a cabbage and almost as solid, of a beautiful light green shade, almost white, and a very rich flavor. Grows rapidly and is tender and sweet at all times. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c.

GRAND RAPIDS LETTUCE—This variety originated at Grand Rapids, Mich., where it is largely grown for shipment and where it is considered by many, the best loose headed lettuce for forcing under glass. Leaves medium size, of light, yellowish green color, much crimped, and frilled thin, but of very upright growth; forms a fair sized but loose head; crisp, tender and of good quality. Owing to its upright habit it may be planted very closely. It is of extremely rapid growth; very little liable to rot; will stand without spoiling a week to ten days after it is fit to cut, and retains its freshness a long time after cutting. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.40.

DENVER MARKET LETTUCE—An early variety of Head Lettuce, either for forcing or open ground. It forms large solid heads of a light green color, and is very slow to go to seed. The leaves are crisp and tender, and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind of lettuce now grown. This variety is one of the finest novelties offered for some time, and has come to stay, and will find a place in every garden. C. C. Morse & Co., seed growers, Santa Clara, Cal., says it is the best novelty ever sent them, and tried in their trial grounds, together with 90 other varieties of lettuce, they found it the best of all.

Geo. S. Haskell, Rockford, Ill., says: "It is the finest acquisition in lettuce since Black Seeded Simpson was introduced." Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

\$1.00 PAYS FOR SEEDS IN PACKETS TO AMOUNT OF \$1.50.
Makes 5c Packages About 3c each.

1 Pkt. each of the 8 splendid varieties illustrated on this page, 30 cts.

IMPROVED HANSON—The finest strain of this popular variety in the country is what we offer. Our seed will produce mammoth heads almost as solid as cabbage, and delicious, sweet, crisp and tender. Stands drought and scorching heat better than many others. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

TENNIS BALL—A fine early sort; very hardy; small head. One of the best for forcing under glass or early planting outdoor. Heads are small, but extremely solid; should not be planted late in summer, as it then runs to seed quickly. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

TILTON'S WHITE STAR (SEED WHITE). (See illustration)—A new and distinct sort of great merit. Of the Black Seeded Simpson type, but grows larger and more rapidly; has a broader, thicker, darker colored, less frilled at the edge, leaf; forms a larger, more distinct and solid central cluster of leaves, making almost a head; blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and owing to the thick leaf keep long after cutting without wilting. For forcing and early planting out doors, this is a decided improvement over other varieties of this class, for either purpose. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

THE DEACON—Forms large and very solid heads, of attractive green color, very crisp, tender and of first-rate quality. It is one of the very best varieties to withstand summer heat, and slow to run to seed. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

EARLY CURLED SILESIA—The first to produce edible leaves. For forcing and early spring sowing it is very popular. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

IMPROVED DEFIANCE LETTUCE—Among the few lettuces of merit recently introduced, we place this sort in the front rank of summer varieties. It produces a splendid, large, solid head of the cabbage type, remaining a long time in prime condition without going to seed. It is of a light green color, fine quality, crisp, tender, and nearly every plant will make a fine solid head in the hottest weather. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

Paris White—Pkt. 5c, oz. 10c.
"ALL SUMMER LETTUCE"—One dozen varieties mixed. Will give you excellent lettuce all summer from one sowing. Try a packet this season. Large pkt. 10c, oz. 20c.

3 Excellent Varieties of LETTUCE

1 PACKET OF EACH FOR 15 CENTS.

CALIFORNIA CREAM BUTTER—A distinct variety of cabbage lettuce from California. It forms round, solid heads, as shown in the illustration. The leaves are of a very rich cream-yellow color—most refreshing in appearance, and particularly rich and buttery to the taste. The heads are of good size, compact, very hard and solid. It is medium early, and one of the very best summer varieties of hard lettuce we have ever seen. Black seeded. The heads are so solid that generally they have to be cut before any seed stalk can make its appearance. Every person who sends us an order this season will want a packet or more of this lettuce. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

EVERLASTING—Every gardener knows the importance of having a lettuce that is slow to run to seed, and they should also know that sort excels all others in this respect. It will remain almost all summer in prime condition. It is also early and remarkable for the size of its head. Self-blanching, crisp, tender and of excellent flavor. This is one of the finest varieties we know of, and will please everybody for family or market garden. Particularly do we urge market gardeners to grow it, and it will put money in their purses, as no variety will bring more money nor produce a more permanent crop. Pkt. 10c, 3 pkts. 25c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

TOMHANNOC—Entirely distinct from all other existing varieties, and of superlative fine quality. All growing in the same soil and under the same conditions, it is pronounced of it extra flavor and remarkable for retaining its fine quality for an unusual length of time. It forms a beautiful plant ten to twelve inches high; withal the leaves are wonderfully crisp and tender. It does not form heads; grows very quickly, is ready to cut early, remains for weeks of the finest quality. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

other existing varieties, and of superlative fine quality. All growing in the same soil and under the same conditions, it is pronounced of it extra flavor and remarkable for retaining its fine quality for an unusual length of time. It forms a beautiful plant ten to twelve inches high; withal the leaves are wonderfully crisp and tender. It does not form heads; grows very quickly, is ready to cut early, remains for weeks of the finest quality. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

WINTER PINEAPPLE MUSKMELON.

This melon differs from all other muskmelons, not only in character of the plant, but also in shape and appearance of the fruit and its wonderful keeping qualities. The vine is a strong and healthy grower, thriving on any good soil, and bears abundantly, the melons weighing from 9 to 11 pounds each, very thick-meated, almost solid. No other muskmelon that we have ever

tasted can compare with this variety in delicious taste and fine eating qualities. They have a pleasant and rich, spicy, pineapple flavor, possessed by no other muskmelon, and cannot fail to satisfy and be appreciated by the most fastidious when in prime condition.

The flesh is a light green color, and although firm, is very rich and melting, and can be eaten with the greatest relish clear to the outer skin. Aside from its great productiveness and superior quality, the most valuable recommendation this new melon has is its remarkable keeping qualities. They do not ripen on the vines like other melons, but must be picked before the hard frost, carefully laid away in a dry, cool room or cellar, where there is no danger of freezing. When wanted for use, bring them into a warm room, where they will ripen up and be ready to eat in a few days. The Winter Pineapple Muskmelon has been kept solid, sweet and delicious in this way until March and April, retaining their spicy and delicious taste equal to, or better than any of the common muskmelons pulled fresh from the vines in summer. The great advantage of having melons of fine quality to sell in the winter can well be appreciated by market gardeners and truckers. The originator of this melon has been supplying his customers with these fine melons through the winter months, at prices more than three times as much as other varieties of muskmelons are sold for in the regular season. Pkt. 10c, 3 for 25c, $\frac{1}{4}$ lb. 75c.

DIXIE—The great new watermelon, surpassing the Famous Kolb Gem as a shipper and without a peer in fine quality and productiveness.

This superb watermelon, which has taken the market by storm where introduced, is a cross between the Kolb Gem and Old Fashioned Mountain Sweet, surpassing the former in shipping qualities and fully equaling the latter in fine

other existing varieties, and of superlative fine quality. All growing in the same soil and under the same conditions, it is pronounced of it extra flavor and remarkable for retaining its fine quality for an unusual length of time. It forms a beautiful plant ten to twelve inches high; withal the leaves are wonderfully crisp and tender. It does not form heads; grows very quickly, is ready to cut early, remains for weeks of the finest quality. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

eating quality and flavor, being a week to ten days earlier than either with a remarkably thin, hard rind; it keeps three times as long as either, before showing decay. The vines grow strong and rapidly, with more laterals than any other melon, and have the singular and very valuable quality of rooting from every joint, adding greatly to the productiveness and life of the vines. The meat is fine and of superior quality. These strong claims have been more than verified by hundreds of growers for the past two seasons, and the melon grower who plants largely of DIXIEs, plants wisely. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. \$1.00, 3 lbs. or over at 85c per lb. by freight or express.

7 BEAUTIFUL DELICIOUS MUSK MELONS 7

ONE PACKAGE OF EACH MELON ILLUSTRATED ABOVE FOR 30 CENTS.

If you want the best and most productive melon for marketing in baskets, plant our O.K. Netted Gem. See Novelties and Specialties. If you want the best $\frac{1}{2}$ bushel baskets for marketing the melons, we can furnish them at \$7.00 per 100.

IMPROVED BANANA MUSK MELON—When we first heard of this melon we were doubtful of the correctness of the claims made for it, but on investigation we found it was certainly a valuable variety. During the past five seasons we sent out over 50,000 packages, and we have been flooded with letters of praise, and have sufficient in our office to fill a book as large as this catalogue, if all were printed. The longest melon—45 inches—was raised by Mrs. J. Davis, of Long Leaf, N. C., who received \$30 in gold from us, and she says she sold the melon for \$1. Many melons are reported measuring 40 inches, but the general length is from 25 to 36 inches. Frequently as many as a dozen melons will be borne on a single vine, all measuring over 25 inches. They are extremely prolific. Flesh very thick, being almost solid-salmon color, and more delicious than any other musk melon when thoroughly ripe. Every farmer or gardener in the country should grow it for his own family use, while for market they bring an extra price, being largely sought after in large cities. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 25c, lb. 85c.

GROWER'S PRIDE—This delicious melon originated from a cross between the Prolific Nutmeg and Bay View, and for beauty, productiveness and delicious flavor is second to no other sort grown. In prolific bearing it is a perfect marvel, the ground being literally covered with the large, round, deep-ribbed beauties. Vines of rapid growth, producing fruit very quickly from the blossom, which matures medium early, of large size, weighing from 7 to 10 lbs. each. Flesh remarkably thick, dark green, melting, and unsurpassed in flavor and richness. Pkt. 10c, oz. 20c. $\frac{1}{4}$ lb. 35c, lb. \$1.00.

SCHUMWAY'S GIANT—The largest melon ever introduced. Seeds are four times as large as other melons, thus proclaiming them a distinct sort. The melons average as large as half

bushel measures. Outside green, turning white cream when ripe; rich salmon-colored flesh. Flavor rich, sweet and melting. Never stringy. Every person who reads about this melon should get some seed. It is one of the finest novelties we offer. Pkt. 10c, oz. 20c. $\frac{1}{4}$ lb. 35c, lb. \$1.25.

EXTRA EARLY HACKENSACK—Very similar to the Hackensack, but ten days earlier. The fact that this improved Hackensack melon comes so much earlier than the other varieties, will enable growers to put them on the market when they will bring double the price that can be obtained for the old sort. They grow large, round-shape, flattened at both ends, skin green, of rich sugary flavor. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more at 55c per lb. by express.

IMPROVED MONTREAL MARKET—A magnificent musk melon. Our strain of seed is the best in the country. The fruit is round and flattened, as is shown in the illustration, deeply and regularly ribbed, skin green and densely netted; extremely thick flesh of exquisite flavor. Grow large, of uniform size, and yields immensely. Frequently grow to weigh more than 30 pounds. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more at 55c, by express.

OSAGE—Extensively grown for hotel trade. It grows to medium size, is egg-shaped, as shown in our illustration. The skin is very thin, of dark green color, and slightly netted; flesh is of salmon-color, remarkably sweet and spicy in flavor, extremely thick and delicious to the mind. The seed cavity is very small. All lovers and shippers of fine melons should try it. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c, 2 lbs. or more at 65c by express.

THE DEL MONICO—The shape and appearance of this new melon is well depicted in the above illustration. The flesh is of a beautiful orange pink, and for excellence in quality is

among the very best. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 25c, lb. 85c, 2 lbs. or more by express, at 65c.

JENNY LIND—Small size, but of best quality; season early. Pkt. 5c, oz. 8c. $\frac{1}{4}$ lb. 20c, lb. 65c, 2 lbs. by express 50c per lb.

THE BANQUET—This superb melon represents years of careful selection and improvement of a stock of Musk Melons at the hands of the largest and most experienced grower of melons in the world. The raiser regards it as his greatest production. Of medium size, flat at both ends. In quality it has no superior. The flesh is uniformly deep and of that granulated character that always indicates a good melon; the color is a dark rich salmon. Pkt. 5c, oz. 15c. $\frac{1}{4}$ lb. 30c.

CASSABA—Very large, oblong, netted skin, excellent flavor. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 20c, 1 lb. 60c, 2 lbs. or more at 50c, by express.

CHRISTIANA—One of the most delicious and quickest growing of all melons, only adapted, however, to the family garden, as it must be eaten just as it falls from the vine of its own accord. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more at 60c per lb.

BAY VIEW—With ordinary culture the Bay View will grow to weigh from 10 to 15 lbs., while with extra cultivation it will weigh from 17 to 20 lbs., with a length from 16 to 18 inches. Light green, flesh very thick, luscious and sweet. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more by express 60c.

PROLIFIC NUTMEG—Large growth, fine form, skin and flesh green; very delicious. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more by express 60c.

ACME, OR BALTIMORE—A very productive, oblong musk melon, that is quite popular in the Baltimore market. The fruit resembles the Bay View, but are more pointed at the ends. Of large size, ribbed, and heavily netted. A good shipper. Flesh quite thick, light green and of good quality. Pkt. 5c, oz. 10c. $\frac{1}{4}$ lb. 20c, lb. 75c, 2 lbs. or more by express at 60c.

8 Standard Melons

Price of each variety in this column: Pkt. 5c, oz. 10c, 1-4 lb. 25c, lb. 75c, by mail, post paid; 2 lbs. or more of any one kind, by express or freight 65c per lb.

Scaly Bark.—The melons grow oblong in shape. The skin smooth, dark green in color, mottled, striped; fair quality.

VICK'S EARLY.—This melon is highly prized for its extra earliness. Oblong in shape, smooth, size medium, flesh bright pink, solid and sweet.

GYPSY or GEORGIA RATTLESNAKE.—A superior early market variety; large, oblong; skin green mottled and striped.

SEMINOLE.—Extra early, enormously productive, large and of most delicious flavor. It is of two distinct colors, gray and light green. Melons of both colors and exactly the same in size, shape and color are found on the same vine.

EARLY CALIFORNIA.—Very large size, light green color, thin but tough rind, an excellent market variety, almost equal to Ice Cream; fine flavor.

BLACK SPANISH.—Medium size, round, color very dark green, flesh scarlet, seeds black, flavor rich and sugary.

ICE CREAM.—Medium size, nearly round, pale green, thin rind, flesh scarlet and solid, seeds white, flavor of the very best.

COLORADO PRESERVING.—An improvement on the green preserving melon; enormously productive and of better quality, and making very clear transparent preserves of fine flavor.

red, luscious, crisp and sugary. An excellent keeper, and bear transit to distant markets well. Their great size, handsome appearance, thin rind, red flesh and delicious taste are captivating. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, 2 lbs. or more by express at 65c per lb.

KOLB'S GEM.—A hybrid of the Scaly Bark and Rattlesnake, and an excellent shipping variety. It has a very rough rind and carries in good condition. The flesh is bright red and of good flavor. The melons grow to a fair market size, from 20 to 50 lbs each in weight. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, 2 lbs. by express at 55c per lb.

GREEN AND GOLD.—Green without, gold within. The melons grow to a good size, ranging from 25 to 45 pounds in weight, and in productiveness equals any of the red-fleshed sorts, while in delicious flavor surpasses them all. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, 2 or more lbs. at 65c, by express.

6 Great Watermelons.

1 Packet Each for 25 Cents.

HOOSIER KING.—This magnificent melon was produced in Indiana by a large melon-grower by hybridization and careful selection, until he produced a melon that controlled the market. For years he has been growing them on his farm, and shipping to the Indianapolis market, much to his own profit and to the annoyance of other shippers, as his melons were sought after by retailers and consumers in preference to any others. Read what Mr. Rees, who handles the melon in this city, has to say about the Hoosier King:

"The Hoosier King is the finest, largest and best quality melon that comes into this market. They arrive in better condition, are uniformly larger size, and sell for more money than any other variety; besides, the consumer who once tries them will have no other."

R. H. REES, Indianapolis, Ind.

The skin is beautifully striped, being two shades of green, light and dark, seeds black, flesh brilliant red, solid, rich, sweet and luscious; skin thin and tough. They will stand very rough handling. Size, large, to very large. Melons of 60 lbs. weight can be easily raised. Every melon-grower will find the Hoosier King fully equal to our recommendation. Pkt. 5c, oz. 15c, ¼ lb. 35c, per lb. \$1.00.

FLORIDA FAVORITE.—This new variety is of medium size, very prolific, and unexcelled as a table variety. The rind is too thin and crisp to make it a long-distance shipping melon, but for home use or near-at-home markets it will give great satisfaction. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, 2 lbs. by express at 65c per lb.

MAMMOTH IRON CLAD.—One of the largest varieties known. With ordinary cultivation many melons weigh 60 to 70 lbs. each. They have frequently been dropped 3 feet and even from the shoulder of a man without bursting or showing any bruise. They keep in fine condition for one month after being ripe. The heart is very large. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, 2 lbs. or more by express at 65c.

CUBAN QUEEN.—Flesh bright

red, luscious, crisp and sugary. An excellent keeper, and bear transit to distant markets well. Their great size, handsome appearance, thin rind, red flesh and delicious taste are captivating. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c, 2 lbs. by express at 55c per lb.

GREEN AND GOLD.—Green without, gold within. The melons grow to a good size, ranging from 25 to 45 pounds in weight, and in productiveness equals any of the red-fleshed sorts, while in delicious flavor surpasses them all. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c, 2 or more lbs. at 65c, by express.

EVERITT'S CELEBRATED ONION SEED.

GROWING OUR ONIONS FOR SEED.

STORAGE OF ONION SEED
WE SELL MANY THOUSANDS OF POUNDS

SOWING ONION SEED WITH EVERITT'S
MAN-WEIGHT DRILL—BEST IN THE WORLD.

CULTIVATING A CROP OF ONIONS
WITH EVERITT'S MAN-WEIGHT CULTIVATOR.

CROP FROM EVERITT'S CELEBRATED O.K. ONION SEED.

HOW TO RAISE ONIONS.

- 1st. Obtain good seed.
- 2d. A rich, sandy loam, with a light mixture of clay is the best soil; although any soil that will produce a good crop of corn will grow a crop of onions, *except* a stiff clay. Very light sand, swamp and raw muck land are not desirable.
- 3d. Fertilize heavily. The manure must be well rotted or composted. Fine ground bone and phosphates are very suitable. About 600 to 800 pounds per acre.
- 4th. Sow the seed very early. 5 lbs. to the acre for large onions; 50 lbs. per acre for sets. Can sow later for sets.
- 5th. Give thorough, clean cultivation. Everitt's Man-Weight Machine is the best. See last cover page of this catalogue.
- 6th. The New Onion Culture is a valuable book to all onion growers. Price, 50 cents, or can be selected free on orders amounting to \$3.00 for onion seed. Tells how to raise 1,000 to 2,000 bushels per acre.

Success certain. However, we have an immense supply, and want it understood that we are in the onion seed business large enough to compete with any reliable house furnishing reliable seeds and will be glad to have the opportunity to fill any order at prices made by a reliable, reputable house. See "A Grand Prize," next column.

LEADING
SPECIALTIES.

Yellow Globe Danvers
Large Red Westerfield

ONION

A GRAND PRIZE

The person who plants **O.K. SEEDS** is sure of his reward in the superior crop they will produce, but the person who will see his neighbors and get customers for O.K. Seeds should be rewarded also.

THEREFORE,

to any person who will send us an order for 50 pounds of Onion Seeds for his own use, or it may be a club order, we will send as a premium one of our **COMBINED MAN-WEIGHT CULTIVATORS AND DRILLS**. Value, \$12.00.

Any variety or any number of varieties may be selected to make up the 50 pounds. Go out and see your neighbor who is going to raise onions, and make up your club at once. Our prices are moderate. Our Man-Weight Cultivators and Drills are the best in the market. See last page of cover.

ALL THE GOOD ONION SEED IN AMERICA

Is not owned by us, but all the onion seed we have is good. We have carefully canvassed the yield of onion seed crops in '93 and think our prices are as low as good seed can be sold at.

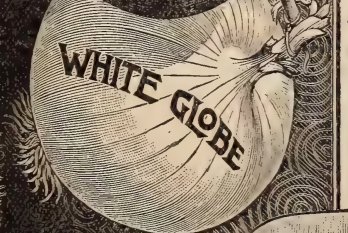

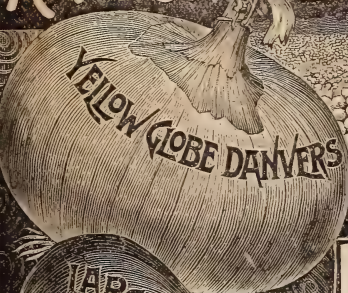

J. A. EVERITT, Seedsman, INDIANAPOLIS, IND.

AMERICAN ONION SEED

NE&G
CO.

GROWING OUR ONION SEED

7 ONE PACKAGE OF EACH OF THE 7 FINE ONIONS, ILLUSTRATED ON THIS PAGE, FOR 30c.

YELLOW GLOBE DANVERS—Can not be too highly recommended. It is more extensively grown than any other kind. Produces 600 bushels per acre from seed sown in spring. Very handsome, round, of good size, with thin, straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well and sells readily at the highest price. We offer the best seed only, that will produce the finest bulbs, and sell thousands of pounds annually. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.45, 3 lbs. or over by express at \$1.30.

LARGE RED WETHERFIELD—This is one of our greatest specialties, and next to Yellow Globe Danvers, we sell the largest quantity of seed of it. It is the grandest red onion grown. There is no sort equal to it in yield, in keeping qualities, in fine flavor, and for market. In every section of America it is a great success. Is a remarkable keeper, and an enormous yielder. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.45, 3 lbs. or more by express at \$1.30.

LARGE RED GLOBE—This is a very handsome variety, and is deserving of general cultivation. It matures quite early; grows to a large size; skin deep red; flesh fine grained, mild and tender. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.50, 3 lbs. or more by express at \$1.35.

WHITE GLOBE—A large globe-shaped onion; firm, fine grained of mild flavor; keeps well. This is one of the handsomest onions grown, of beautiful shape, clear, white skin, and commands the highest market price. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50, post paid, by mail.

SOUTHPORT LARGE YELLOW GLOBE—This new variety is entirely distinct from the Danvers. It is a very handsome, round or globe-shaped variety, of large size, with thin yellow skin, white flesh, fine grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming, and entirely free from scallions. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 75c, lb. \$2.50, 3 lbs and over by express, \$2.35.

PHILADELPHIA SILVERSKIN—This is the variety so extensively grown in the vicinity of Philadelphia for the production of white sets. Though not so desirable as a mature onion, this is one of the best for sets. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 85c, lb. \$3.00.

WHITE SILVERSKIN, or WHITE PORTUGAL—Very desirable for family use; flavor mild and pleasant; skin silvery white; of handsome appearance; highly esteemed for pickling when young, also for market in early winter. Extensively planted for White Onion Sets. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 85c, lb. \$3.00.

EXTRA EARLY RED—Very early, medium size, deep red color. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 60c, lb. 85c, 3 lbs. or over by express at \$1.75 per lb.

EXTRA EARLY WHITE BARLETTA—Without doubt the very earliest onion in cultivation. Pure white color, very mild and delicate flavor. For table use and pickling it is most valuable. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

AMERICAN EXTRA EARLY PEARL.

This remarkable onion is one of the earliest and in great size, thickness, rapid growth, bottoming and keeping qualities, it is all that can be desired. It grows to an enormous size, of pearly white color, the outer skin having a most showy, waxy appearance, flesh of a pure snow white, and flavor so mild that it can be eaten like an apple. It grows with wonderful rapidity. This onion has the valuable quality of resisting Northern winters. Sow the seed in the spring, thickly, and raise sets. These can be set out in September or October, and early in May the onions are as large as hen's eggs. Pkt. 10c, 3 for 25c, oz. 30c, $\frac{1}{4}$ lb. \$1.00, lb. \$3.50.

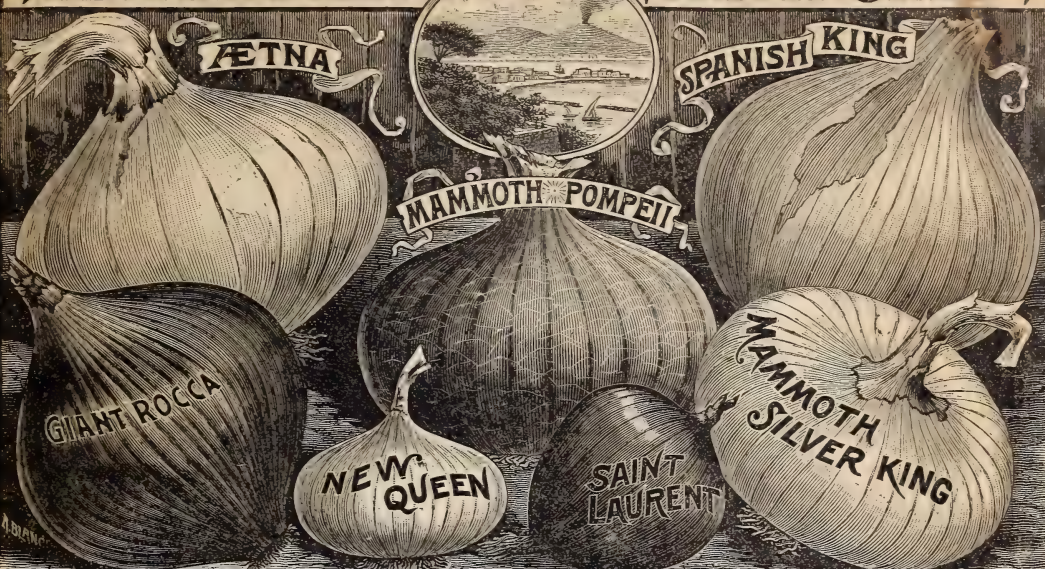

GIANT VESUVIUS

This new Giant Italian Onion is one of the most beautiful of the many fine sorts from that country. The bulbs are of a handsome globe-shape, and grow to weigh 2 to 3 lbs. each the first year from seed. Skin red; flesh white; flavor mild and sweet. A great novelty that our friends should not fail to plant. Pkt. 10c, 3 for 25c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

PKT. 10 CENTS,
3 FOR
25c.

*NEW*ITALIAN*ONION*SEED*

THE GREATEST ONIONS THAT CAN BE GROWN IN AMERICA.

One package each of the 7 beautiful, grand varieties illustrated above for only 40 cents, or we will sell one large package containing seed of all the varieties for 20 cents. As all the varieties require similar treatment, this mixed package will be a highly satisfactory way of growing them and a great feature in any family garden. By our descriptions and illustrations they can be separated when grown.

ITALIAN ONIONS.

These are the large, handsome onions seen on fruit stands in our large cities and handled by fancy grocers. Until a few years ago the supply was obtained from Bermuda. Later their cultivation was begun in our southern states with much success. It has been proven that they are a success in every section of the United States, and we recommend them highly for summer and autumn use in the family, while if marketed they command fancy prices.

All of the varieties grow very rapidly from seed, and are much sweeter and of more delicate flavor than our American onions; in fact the varieties forming mammoth bulbs of the most beautiful shape and color, weighing 2 to 4 pounds the first year from the seed. What do not attain full size the first year may be set out the next spring, when they will grow to great size. While we advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planting part of the Italians.

AETNA. A very distinct variety and one of the handsomest in shape and color. The skin is a beautiful silvery white; the flesh pure white, very mild and pleasant flavor; can be eaten raw like fruit. The bulbs form very quickly from seed and grow to great size. Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. \$2.00.

Giant Rocca or Naples. One of the best known of the Italian onions in this country. Quite extensively grown in some sections, where

they produce immense crops; single bulbs weighing 1½ to 2 pounds each. Flavor very mild and delicate; color, light brown; flesh, white; very handsome; globular shape; a good keeper. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.75.

Mammoth Pompeii Very large growth, weighing from 2 to 4 pounds each under good cultivation the first year from the seed. Skin very thin and delicate in appearance, of a beautiful reddish brown color, flesh pure white, flavor very mild and sweet. Pkt. 10c, oz. 20c, ¼ lb. 60c, lb. \$2.25.

Spanish King The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks, and have produced more bushels (1.137) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention, and although only offered to a limited extent, they are always picked out and selected at three times the prices of any other sort on sale. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

Mammoth Silver King This is unquestionably one of the largest and most beautiful onions in the world. Single specimens, by sworn testimony, have weighed as much as five and one-quarter pounds. No other onion ever introduced has excelled these immense weights, and no other onion excels in mild and delicate flavor, or has a more handsome and beautiful appearance. So mild are they in taste that they can be eaten raw like an apple, and for ornamenting show windows at restaurants, or exhibiting at fairs, they certainly are invaluable. The skin is a beautifully silvery white; the flesh snow white, fine grained and exceedingly mild and pleasant flavored. They grow uniformly large, smooth, perfect in form and shape, ripen early and always command a high price in the market. The Mammoth Silver King can easily be grown in nearly every section of the United States from seed the first year to weigh from 3 to 4 pounds, and if the smaller bulbs are planted out the second season they will attain weights of 4 to 5 pounds each. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

NEW QUEEN Quite in contrast with the other varieties; this is quite small. In season it is very early. The quality is excellent, being very mild. Pure white outside and inside. Can be sown from February to July. Largely grown for pickling. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.50.

Saint Laurent This is quite a novelty. In shape it is almost flat at the top and narrows gradually towards the base of the bulb; resembles a pear with its stem downward. The skin is copper colored, very thin and brittle; flesh white. Pkt. 10c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

Giant White Italian Tripoli Of large size and most beautiful form, with fine white skin. The first season from the black seed, it will grow an onion from 1 to 1½ pound, but to attain the full size the bulbs should be set out the following spring. Pkt. 5c, oz. 15c, ¼ lb. 50c, lb. \$1.50.

ONION SETS.

We can not furnish sets of Italian Onions. They are best raised from seed.

- White Onion Sets**, qt. 40c, 3 qts. \$1.00 by mail.
- Yellow Onion Sets**, qt. 30c, 4 qts. \$1.00 by mail.
- Red Onion Sets**, qt. 30c, 4 qts. \$1.00 by mail.
- Egyptian or Perennial Tree Onion Sets** for fall planting, qt. 30c, 4 qts. \$1.00 by mail.
- White Multiplier Onion Sets.** A very valuable sort for very early plant in spring, being ready for market 3 or 4 weeks ahead of any other onion from sets. Qt. 40c, 3 qts. \$1.00 by mail.
- American Extra Early Pearl Onion Sets** (See description on preceding page). For fall planting. This variety is hardy to stand our winters. Qt. 40c, 3 qts. \$1.00 by mail. Ready in September.

Prices in large quantities furnished on application.

SAISFACTION PEA.

THE MOST TOOTHsome AND DELICIOUS FLAVORED OF ALL.

This delicious Pea, first introduced by us four years ago, is fast gaining in popularity, and many of our customers are now placing their main reliance on them and consider them superior to any other for fine table qualities.

The vine grows vigorously to the height of about two and a half feet, requiring no brush or sticks to hold them up, being very stocky and robust, and literally filled with large showy pods, which almost hide completely their dark green foliage. They follow closely our Extra Early Reliance, being ready for the table in fifty-six days from germination, and continue in bearing longer than any other early sort. The peas when green are unusually large and of a fine, deep green color; when dry are very distinct in appearance, being much more wrinkled than any other sort. Satisfaction has come to stay. Pkt. 10c, pt. 25c, qt. 40c, post-paid. 4 qts. \$1.00, peck \$1.75, bu. \$6.50, by freight or express.

SAISFACTION FOR ALL

A GREAT PEA.
SHOULD BE GROWN IN EVERY GARDEN.

Mammoth Melting Sugar Pea.

MAMMOTH MELTING SUGAR PEA.

(Edible pods.) This variety is ahead of all others, not only in size of pod and prolific bearing, but also for its delicious quality. It grows to the height of five or six feet, bears a profusion of large, broad pods, which are generally found in pairs, and which are so brittle that they snap without any string. The pods when cooked are very sweet and tender, and it should be used similar to wax beans. To parties who have never used the sugar peas, we will say that they are not shelled like the ordinary peas, but are cooked pods and all. They are more delicious than the ordinary varieties, and you should not think of planting any other kind of sugar peas than Melting Sugar, because it is the most prolific, the most tender and the best flavored. Price, pkt. 10c, pt. 30c, qt. 60c; by mail, by freight or express, per qt. 40c.

PARSNIPS.

1 oz. of Seed to 200 feet of Drill, 5 to 6 lbs. per acre.

A deep, rich, sandy loam is preferable. Sow in drills fifteen or eighteen inches apart and thin to six or eight inches in the row. The roots are improved by leaving in the ground during the winter. Excellent food for cattle and also for table use.

IMPROVED CROWN PARSNIPS—A selection from the hollow crown—finer, more symmetrical in shape, more sugary and tender. A very heavy cropper, smooth, and the finest variety for the home or market garden. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 50c.

LONG WHITE—A standard variety of great merit. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

Improved Hollow Crowned—For stock or for table this is one of the best grown. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

PARSLEY.

1 oz. to 200 feet of Drill.

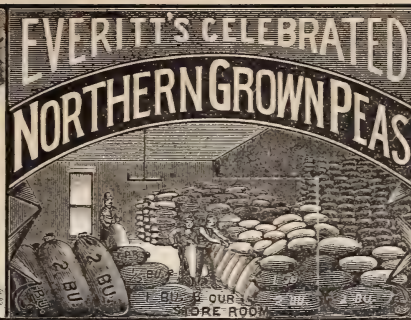

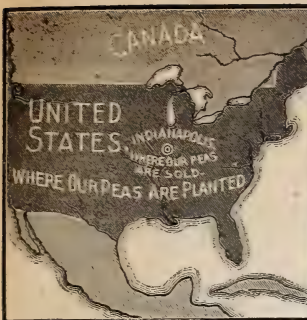

Parsley.

Fine Curled or Double Parsley—Used principally as a garnish for the table. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 75c.

New Fern-Leaved—A new variety; very ornamental in form and coloring. Pkt. 5c, oz. 15c, ¼ lb. 40c, lb. 81.25.

Everitt's Extra Early Reliance.

In all the essentials of an early market or home garden pea this is perfection. It has made friends wherever planted, and is acknowledged by all acquainted with its merits, as being unexcelled in earliness and productiveness. They are now largely grown by the best gardeners in the country. Height about two feet, vines loaded with well-filled pods. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50, 5 bus. \$20.00, 10 bus. \$35.00.

PEAS

Plant 1 pint to 50 feet of Drill, about 1½ bus. per acre. In the following list * means Extra Early; * means Early; others late.

Packages, Pints and Quarts are sent Post Paid by mail at prices named.

McLEAN'S LITTLE GEM—A dwarf, prolific, green, wrinkled marrow, having all the flavor of late wrinkled peas. Height, one foot; require no support. Largely grown for canning. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50, 5 bus. \$20.00, 10 bus. \$37.50.

MARKET GARDEN—A most excellent second early pea, particularly suited for the market garden on account of its great productiveness as well as good quality. It grows about two feet high, very stocky, and requires no sticks. Pkt. 5c, pt. 20c, qt. 35c, ¼ bu. \$1.25, bu. \$4.50, 5 bus. \$22.00.

AMERICAN WONDER—So well and favorably known that it scarcely needs description. Our seed is strictly true to name and the choicest strain. Extra early; requires no bushing; exquisite flavor. The vine grows from 8 to 20 in. high, according to soil and season. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.75, bu. \$6.00, 5 bus. \$28.00.

EVERBEARING—This new pea is a cross between the Little Gem and Champion of England. Height of vine 15 inches to 2 feet; pods 3 to 4 inches long, each pod producing from 6 to 8 large wrinkled peas. Its habit of growth is of a peculiar branching character, forming as many as ten stalks from one root stalk. The great value is found in its long-continued bearing. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50.

ALASKA—This beautiful blue pea has become a standard variety and is the earliest of all blue peas, proving to be not only several days earlier than most early sorts, but of larger size and 10 per cent. more productive. The vines are dwarf, growing only about twenty inches high; very uniform, maturing the crop for one picking; of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.75.

NEW ABUNDANCE—This new variety is the most prolific known. Plant, half dwarf; 15 to 18 inches high; foliage, large, thick, full and dark green. Pods, 3 to 3½ inches long, roundish and well filled, containing six to eight large wrinkled peas of excellent quality. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.75.

FIRST AND BEST—Vines small; about 18 inches high, bearing 3 to 7 straight handsome pods, each containing six to eight medium sized round peas of good quality. Matures all the pods in about 45 days. Valuable for market gardeners. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50, 5 bu. \$16.00, 10 bu. \$33.00.

KENTISH INVICTA—A round, blue variety, producing straight and handsome well-filled pods, and is quite early. We regard it as a market variety of unsurpassed excellence, and can be planted for a general crop, as well as early one. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50, 5 bu. \$16.00, 10 bu. \$33.00.

PRIDE OF THE MARKET—Requires no sticks and are quite unequalled in productiveness. Robust, free-branching habit, 18 to 20 inches high, and are immensely productive. The pods are so large in size and handsome in appearance that they take high rank for exhibition purposes, and the peas, when on the table, are of so splendid a quality that it would be difficult to overpraise them. Pkt. 5c, pt. 25c, qt. 40c, ½ bu. \$1.50, bu. \$5.75.

BLACK EYED MARROWFAT—A favorite variety; grows about five feet high; a profuse bearer; pods large and well filled. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. \$2.50, 5 bu. \$12.00, 10 bu. \$22.50.

LARGE WHITE MARROWFAT—A favorite sort. About six feet high. Pods large, broad, and well filled, of excellent quality. Pkt. 5c, pt. 20c, qt. 30c, peck 75c, bu. \$2.75, 5 bu. \$12.00.

EXTRA EARLY PREMIUM GEM—Very fine dwarf pea, of Little Gem type, on which it is a decided improvement; larger pods; more productive. Best and most profitable Early Wrinkled Pea for market gardeners, and for family gardens there is none better. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50, 5 bu. \$22.00, 10 bu. \$40.00.

CHAMPION OF ENGLAND—A standard sort, sought after in all markets. Can not be excelled for family use; productive; high flavor; seeds wrinkled. Five feet high. Pkt. 5c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.25, 5 bu. \$16.00, 10 bu. \$30.00.

TELEPHONE—A tall, wrinkled marrow; very productive, and of the best quality, with long pods containing 7 to 10 very fine flavored peas. Height about four feet. Pkt. 5c, pt. 30c, qt. 35c, peck \$1.50, bu. \$3.50.

TALL WHITE SUGAR (Edible peas)—Seeds white; vigorous and prolific. Foliage, light green; a well-known variety; height, 3 feet. Pkt. 5c, pt. 25c, qt. 40c, peck \$1.75, bu. \$7.00.

See Melting Sugar Pea in novelties. The best of this class.

Monstrous Pepper.

PEPPER—GOLDEN DAWN—A most beautiful golden yellow, making it most elegant in the list. The flavor is particularly sweet and mild, and entirely free from any fiery flavor, so much so, that they can be eaten like fruit. Pkt. 5c, oz. 20c, ¼ lb. 75c.

PROCOPP'S GIANT—The real giant among all peppers, frequently growing 8 to 9 inches long by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh, nearly a half inch thick, sweet and mild. Every exhibitor should grow them to add to his collection. Pkt. 10c, 3 pkts. 25c, oz. 50c.

RUBY KING—This magnificent pepper grows 4½ inches long by 3¼ to 4 inches broad. When ripe, they are a bright, ruby red color, remarkably mild and pleasant in flavor, having no fiery taste whatever. Single plants ripen 8 to 15 fruits. Pkt. 5c, oz. 30c, ¼ lb. 75c.

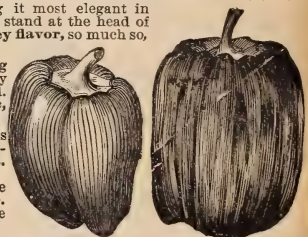

LARGE BELL, or BULL NOSE—Early, very large, square form, pleasant to the taste, very suitable for filling with cabbage. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50.

Long Red Cayenne—Bright red color. This is the vegetable that furnishes the cayenne pepper of commerce. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50.

Large Sweet Spanish—Early. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50.

Monstrous, or Mammoth—Mammoth size. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50.

LARGE SWEET MOUNTAIN—Very large and excellent for mangoes. Pkt. 5c, oz. 20c, ¼ lb. 75c, lb. \$2.50.

Ruby King.

Golden Dawn.

Large Bell or Bull Nose.

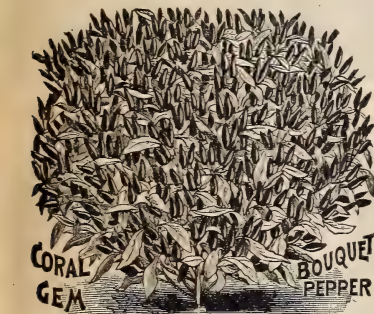

2 VALUABLE PEPPERS

AS BEAUTIFUL AS ROSES.

1 Packet of Each for 15 cents.

CHINESE CELESTIAL—It is not only a most useful pepper, but one of the most beautiful plants in existence. The plant begins to set peppers early and continues until frost, branching freely and bearing profusely. The pods are borne upright, conical in shape, and up to the time they are full-grown are of a delicate, creamy-yellow, and when fully grown, change to an intense vivid scarlet, making a plant when loaded with fruit, part of one color and part of another, an object of the most striking beauty and oddity. Peppers two to three inches long, of clear, sharp flavor, and superior for any of the uses to which peppers can be put. Pkt. 10c, 3 for 25c, oz. 50c.

CORAL GEM BOUQUET—Its beautiful little pods of shining red color are so thickly set as to give it the appearance of a bouquet of corals. As a pot plant it is a most rapid selling article; besides its great beauty, it serves the housekeeper in a most convenient way when pods are wanted for seasoning. In the open ground the plant grows to a height of about two feet, and is so densely set with pods as to bend its branches. A splendid sort for making pepper-sauce. Pkt. 10c, 3 for 25c, oz. 50c.

Mammoth Etampes.

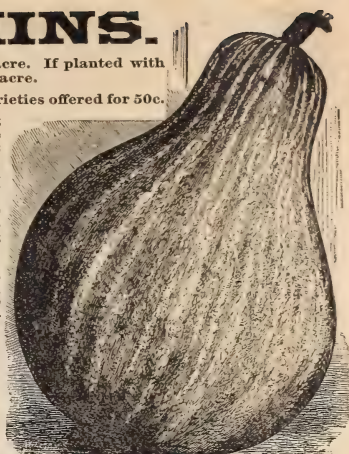

PUMPKINS.

1 oz. will plant 40 hills; 5 lbs. per acre. If planted with corn, 1 to 2 lbs. per acre.

We will sell one pkt. each of the 13 varieties offered for 50c.

TENNESSEE SWEET POTATO—It grows to a medium size, pear-shaped, a little ribbed, color creamy white, sometimes lightly striped with green flesh, thick, white, remarkably fine grained, dry and brittle, and of most excellent flavor; very productive and keeps perfectly sound until late in the spring; has no superior for making pies and custards. When cooked it has somewhat the appearance of sweet potatoes, but of more delicious taste. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 90c.

GENUINE MAMMOTH TRUE POT-IRON—It grows to an enormous size, three feet or more in diameter and 100 to 200 pounds or more in weight. Salmon-

Tennessee Sweet Potato Pumpkin.

GOLDEN MARROW—Shape round oblong, very slightly ribbed. Golden orange color, cooks soft and tender and is the best of keepers; very vigorous growth and immensely productive. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 75c.

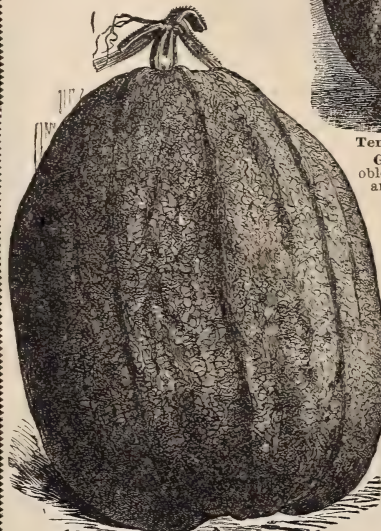

MAMMOTH TOURS—A productive French variety, which grows to an immense size, often weighing 100 pounds. Grown for cattle and for table use. We offer the genuine, true article. Seed saved from selected specimens. These seeds have frequently sold at fairs at 10c to 25c each. Pkt. 5c, oz. 10c, ½ lb. 25c, lb. 85c.

CONNECTICUT FIELD—Large, color yellow; largely raised for feeding stock. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c, bu. \$2.50.

LARGE CHEESE—Superior to most of the field-grown sorts; very hardy and decidedly productive. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

INDIANA CORNFIELD PUMPKIN—This is the best variety we ever saw for raising with corn. Grows to a large size, solid, and is relished by stock; also valuable for pies and canning. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c, 5 lbs. or more, by express, at 50c per lb.

CASHAW—Excellent table qualities; well adapted to Southern States; light cream shell; flesh salmon color; very productive. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

Mammoth Tours.

colored skin, flesh bright yellow, fine-grained and of excellent quality. Pkt. 10c, oz. 20c, ½ lb. 60c, lb. \$2.00.

MAMMOTH ETAMPES—This excellent pumpkin comes from France. The skin is of a very bright, glossy red, and presents a most handsome appearance, whether for exhibition or on market. Thick-meated, flesh very rich in color and of excellent quality. It matures very early. With good cultivation it attains mammoth weights, but in only ordinary soil grows about 2 ft. in diameter. It is very productive and a most profitable sort to grow. Pkt. 5c, oz. 15c, ½ lb. 40c, lb. \$1.25.

QUAKER PIE PUMPKIN—A distinct variety from New York State, where it has been grown for many years by a family of Quakers, or Friends. The shape is nearly oval, tapering slightly toward the ends. Color, creamy white, both inside and out; flesh is sweet and rich, and an excellent keeper. Pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

(41)

Mammoth Pot Iron Pumpkin.

3 GREATEST PIE PUMPKINS

1 PACKAGE OF EACH, 20 CENTS.

GOLDEN OBLONG PUMPKIN—The prolific character and shape of this pumpkin is shown in the engraving. Grows fifteen to twenty inches in length. Shell, a rich golden orange color; flesh, light yellow. Very rich and fine, making the very best pumpkin pies. A great keeper for winter. Fourteen good pumpkins have been raised on a single vine. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

JAPANESE PIE PUMPKIN—This excellent and odd variety comes from Japan, and is largely grown as a choice pie and cooking pumpkin. The illustration shows the exact shape of the pumpkin.

Golden Oblong Pumpkin.

kinds, and the Jap certainly has a full supply for pumpkin pies during the winter. They ripen early, keep well and are very productive. Flesh is very thick, being nearly solid, unusually fine grained, dry and sweet, having the flavor of sweet potatoes. The seeds are peculiarly marked with Japanese characters, making them quite a novelty. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

WINTER LUXURY PUMPKIN—This new pumpkin, first offered by us last year, is the result of six years' careful selection and improvement by a veteran pumpkin grower, and is pronounced by him very best pumpkin for pies that they uniformly to a diameter of nine to ten yellow or straw color and very finely netted muskmelon. As a winter keeper unequalled. Pkt. 10c, oz. 35c, $\frac{1}{4}$ lb.

and his neighbors the have ever known. It grows inches. In color, a beautiful and closely netted, like a and cooking variety it stands \$1.25.

Japanese Pie Pumpkin.

NEXT WINTER.

Sow
O.K.
SEEDS

You can not make
a better start.

We see in an Eastern paper the following: "The West is pushing for the seed trade in an energetic manner. Already there are many large houses, all in a prosperous condition. The West has an advantage over the East, being in the center of the country instead of on the edge."

VOY—A sort of the finest quality, and producing nearly twice the weight of crop as other sorts, and is also the hardest of all Spinachs. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. Pkt. 4c, oz. 8c, $\frac{1}{4}$ lb. 15c, lb. 35c.

BLOOMSDALE—Perhaps the best variety in the country for general crop. The leaves are numerous and partially rolled. It is much liked by gardeners wherever introduced. Pkt. 4c, oz. 8c, $\frac{1}{4}$ lb. 15c, lb. 35c.

AMERICAN SA-

thick and fleshy.
Pkt. 4c, oz. 8c,
 $\frac{1}{4}$ lb. 15c, lb. 35c.

SALSIFY.

MAMMOTH SANDWICH ISLAND—Mammoth, indeed, as compared with the common kinds. It is pure white in color and has all the good qualities of the other, which, with its great size, will recommend it to all gardeners. It should be found in every garden in the land. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.
Long White—Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

RHUBARB. Victoria—Very large stalks, from two to three inches broad and from two to three feet high. Excellent for pies. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.
Rhubarb Roots—By mail, 30c per lb., 4 lbs. \$1.00. By freight or express, \$1.50 per dozen.

SPINACH.

We will send 5 lbs. or more of any variety of Spinach by freight or express, at 25c per lb.

Thick-Leaved Round—Generally preferred for early sowing, and is a popular sort with market gardeners. Leaves large,

American Savoy.

GOOD RADISHES.

PRICE, unless otherwise quoted. We sell all varieties of Radishes at 10¢, 5¢, 10¢, 15¢, 20¢, 25¢, 30¢, 35¢, 40¢, 45¢, 50¢, 55¢, 60¢, 65¢, 70¢, 75¢, 80¢, 85¢, 90¢, 95¢, 1.00, 1.10, 1.20, 1.30, 1.40, 1.50, 1.60, 1.70, 1.80, 1.90, 2.00, 2.10, 2.20, 2.30, 2.40, 2.50, 2.60, 2.70, 2.80, 2.90, 3.00, 3.10, 3.20, 3.30, 3.40, 3.50, 3.60, 3.70, 3.80, 3.90, 4.00, 4.10, 4.20, 4.30, 4.40, 4.50, 4.60, 4.70, 4.80, 4.90, 5.00, 5.10, 5.20, 5.30, 5.40, 5.50, 5.60, 5.70, 5.80, 5.90, 6.00, 6.10, 6.20, 6.30, 6.40, 6.50, 6.60, 6.70, 6.80, 6.90, 7.00, 7.10, 7.20, 7.30, 7.40, 7.50, 7.60, 7.70, 7.80, 7.90, 8.00, 8.10, 8.20, 8.30, 8.40, 8.50, 8.60, 8.70, 8.80, 8.90, 9.00, 9.10, 9.20, 9.30, 9.40, 9.50, 9.60, 9.70, 9.80, 9.90, 10.00, 10.10, 10.20, 10.30, 10.40, 10.50, 10.60, 10.70, 10.80, 10.90, 11.00, 11.10, 11.20, 11.30, 11.40, 11.50, 11.60, 11.70, 11.80, 11.90, 12.00, 12.10, 12.20, 12.30, 12.40, 12.50, 12.60, 12.70, 12.80, 12.90, 13.00, 13.10, 13.20, 13.30, 13.40, 13.50, 13.60, 13.70, 13.80, 13.90, 14.00, 14.10, 14.20, 14.30, 14.40, 14.50, 14.60, 14.70, 14.80, 14.90, 15.00, 15.10, 15.20, 15.30, 15.40, 15.50, 15.60, 15.70, 15.80, 15.90, 16.00, 16.10, 16.20, 16.30, 16.40, 16.50, 16.60, 16.70, 16.80, 16.90, 17.00, 17.10, 17.20, 17.30, 17.40, 17.50, 17.60, 17.70, 17.80, 17.90, 18.00, 18.10, 18.20, 18.30, 18.40, 18.50, 18.60, 18.70, 18.80, 18.90, 19.00, 19.10, 19.20, 19.30, 19.40, 19.50, 19.60, 19.70, 19.80, 19.90, 20.00, 20.10, 20.20, 20.30, 20.40, 20.50, 20.60, 20.70, 20.80, 20.90, 21.00, 21.10, 21.20, 21.30, 21.40, 21.50, 21.60, 21.70, 21.80, 21.90, 22.00, 22.10, 22.20, 22.30, 22.40, 22.50, 22.60, 22.70, 22.80, 22.90, 23.00, 23.10, 23.20, 23.30, 23.40, 23.50, 23.60, 23.70, 23.80, 23.90, 24.00, 24.10, 24.20, 24.30, 24.40, 24.50, 24.60, 24.70, 24.80, 24.90, 25.00, 25.10, 25.20, 25.30, 25.40, 25.50, 25.60, 25.70, 25.80, 25.90, 26.00, 26.10, 26.20, 26.30, 26.40, 26.50, 26.60, 26.70, 26.80, 26.90, 27.00, 27.10, 27.20, 27.30, 27.40, 27.50, 27.60, 27.70, 27.80, 27.90, 28.00, 28.10, 28.20, 28.30, 28.40, 28.50, 28.60, 28.70, 28.80, 28.90, 29.00, 29.10, 29.20, 29.30, 29.40, 29.50, 29.60, 29.70, 29.80, 29.90, 30.00, 30.10, 30.20, 30.30, 30.40, 30.50, 30.60, 30.70, 30.80, 30.90, 31.00, 31.10, 31.20, 31.30, 31.40, 31.50, 31.60, 31.70, 31.80, 31.90, 32.00, 32.10, 32.20, 32.30, 32.40, 32.50, 32.60, 32.70, 32.80, 32.90, 33.00, 33.10, 33.20, 33.30, 33.40, 33.50, 33.60, 33.70, 33.80, 33.90, 34.00, 34.10, 34.20, 34.30, 34.40, 34.50, 34.60, 34.70, 34.80, 34.90, 35.00, 35.10, 35.20, 35.30, 35.40, 35.50, 35.60, 35.70, 35.80, 35.90, 36.00, 36.10, 36.20, 36.30, 36.40, 36.50, 36.60, 36.70, 36.80, 36.90, 37.00, 37.10, 37.20, 37.30, 37.40, 37.50, 37.60, 37.70, 37.80, 37.90, 38.00, 38.10, 38.20, 38.30, 38.40, 38.50, 38.60, 38.70, 38.80, 38.90, 39.00, 39.10, 39.20, 39.30, 39.40, 39.50, 39.60, 39.70, 39.80, 39.90, 40.00, 40.10, 40.20, 40.30, 40.40, 40.50, 40.60, 40.70, 40.80, 40.90, 41.00, 41.10, 41.20, 41.30, 41.40, 41.50, 41.60, 41.70, 41.80, 41.90, 42.00, 42.10, 42.20, 42.30, 42.40, 42.50, 42.60, 42.70, 42.80, 42.90, 43.00, 43.10, 43.20, 43.30, 43.40, 43.50, 43.60, 43.70, 43.80, 43.90, 44.00, 44.10, 44.20, 44.30, 44.40, 44.50, 44.60, 44.70, 44.80, 44.90, 45.00, 45.10, 45.20, 45.30, 45.40, 45.50, 45.60, 45.70, 45.80, 45.90, 46.00, 46.10, 46.20, 46.30, 46.40, 46.50, 46.60, 46.70, 46.80, 46.90, 47.00, 47.10, 47.20, 47.30, 47.40, 47.50, 47.60, 47.70, 47.80, 47.90, 48.00, 48.10, 48.20, 48.30, 48.40, 48.50, 48.60, 48.70, 48.80, 48.90, 49.00, 49.10, 49.20, 49.30, 49.40, 49.50, 49.60, 49.70, 49.80, 49.90, 50.00, 50.10, 50.20, 50.30, 50.40, 50.50, 50.60, 50.70, 50.80, 50.90, 51.00, 51.10, 51.20, 51.30, 51.40, 51.50, 51.60, 51.70, 51.80, 51.90, 52.00, 52.10, 52.20, 52.30, 52.40, 52.50, 52.60, 52.70, 52.80, 52.90, 53.00, 53.10, 53.20, 53.30, 53.40, 53.50, 53.60, 53.70, 53.80, 53.90, 54.00, 54.10, 54.20, 54.30, 54.40, 54.50, 54.60, 54.70, 54.80, 54.90, 55.00, 55.10, 55.20, 55.30, 55.40, 55.50, 55.60, 55.70, 55.80, 55.90, 56.00, 56.10, 56.20, 56.30, 56.40, 56.50, 56.60, 56.70, 56.80, 56.90, 57.00, 57.10, 57.20, 57.30, 57.40, 57.50, 57.60, 57.70, 57.80, 57.90, 58.00, 58.10, 58.20, 58.30, 58.40, 58.50, 58.60, 58.70, 58.80, 58.9

STRELAND—Another year's trial has thus shown radish still at the head of the list as the best and earliest long radish in existence. It almost invariably draws the first premium at fairs where exhibited, and all who have grown them say they are the best long radish in the country. One of the

[illegible]

LONG WHITE PERFECTION—The finest and most beautiful long white radish in cultivation. Most attractive, straight and smooth, as shown in illustration, tender, mild flavor, grow quickly.

IMPROVED EARLY LONG SCARLET SHORT TOP—Standard sort for private gardens and market use; of quick growth, color bright scarlet; long, straight and smooth; crisp and tender.

NEWCOMER—This New Zealand, first offered by us three years ago, has been a big success story. It's the only one of its kind in the place with our market and family gardeners. It's the earliest, the most productive, the most reliable, the most sturdy, the half-long shape and fine appearance they really sell as doubtless the best of ordinary varieties. Quality very fine, and they hold their own in the best heat and drought to a remarkable extent, small top and stems to suit.

GIANT WHITE STUTTGART—This popular variety is very early, and grows well. Both leaves and stems are pure snowy white. It is withstanding the heat and drought almost as well as size. Notwithstanding its large size, the quality is always first.

LARGE WHITE GLOBE—A very nice round summer turnip, very large, firm, brittle and not pithy.

Railish. Of beautiful form, pur white skin and flesh, which is very crisp and brittle.

EARLY WHITE OLIVE-SHAPED—Of olive-shape, with skin and crisp, white flesh. Growing quickly, and is very early. A very good variety.

IMP. EARLY SCARLET TURNIP—A decided improvement, both in earliness and brilliancy of color, over the scarlet turnip, and is especially recommended to market gardeners.

EARLY SCARLET TURNIP, WHITE TIPPED—A bean-

EARLY WHITE TURNIP—A round, turnip-rooted radish with small top and of quick growth; both skin and flesh purr white, crisp and tender.

EARLY FRENCH BREAKFAST—Of quick growth; earliest of all; very tender and beautiful; oval shape; scarlet, tipped with white; great favorite.

EALY—**WOODS' EARLY FLAME**—A long, thin, shaped and russet-colored sort; grows much larger than the white-flamed variety, and has a larger top. **Best kind for raising.** **WOODS' EARLY FLAME**—A long, thin, russet-colored variety, long as the long searlet, exceedingly small top; most excellent for breeding.

NEW WHITE STAPLER—This valuable variety appears to be one of the most popular summer radishes grown. Ours is handsome (of long shape), keeping beautifully to a point, becoming and of a delightful purple, and almost transparent, very delicate from time of sowing the seed, and continues to grow without losing its fine quality, and remains in a tender condition longer than any other summer sort.

SUMMER VALETTE. **MIXED**—Includes all the summer varieties in our list. Gives great satisfaction. **Pkt. 5c, oz. 25c, lb. 2.50 to 3.00.**

❖SOME GREAT OFFERS❖

For **\$1.00** we will send the **Farm Journal** (monthly), **Household Call** (weekly), **Poultry Keeper** (monthly), **Park's Floral Magazine** (monthly), all one year, by **First Paid**.

For **30 CENTS** we will send any one, Or any person ordering \$2.00 worth of seeds can have any one of the packages for \$1.00 worth and two, \$1.50 worth any three, \$5.00 worth all four.

Your subscriptions will not be entered unless you say you want the papers.

3 GRAND NEW RADISHES

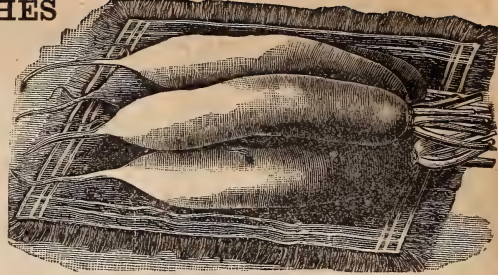

BRIGHTEST LONG SCARLET White Tipped—The handsomest long radish grown. Of great merit. Resembles the Early Long Scarlet in shape and size, being fit for use in 25 days after sowing. The most remarkable quality, however, is its color, which is the brightest scarlet, except the tails which are tipped white. This sort will outsell any other long red radish that is put in competition with it on the market and it is an extra fine sort for the home garden, the quality being very good. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

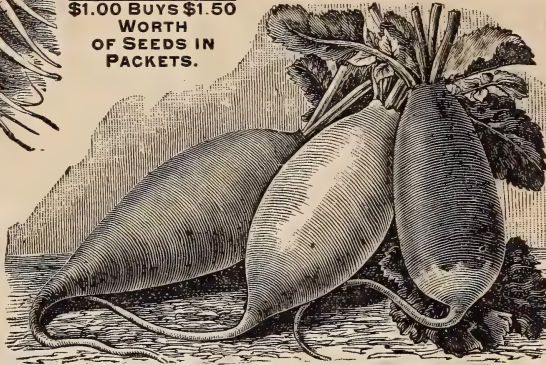

Worthy a place in every garden. 1 pkt. of each, 15c. by mail.

GLASS RADISH—This new radish is a fine acquisition. It is a long radish of light pink color, white tipped and of very uniform size. The flesh is of a transparent white, always crisp and brittle, even if grown to a large size, and mild flavored. It is named "Glass Radish" on account of the fine transparency of the flesh. All who have tried it pronounce it one of the finest among all the radishes. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c.

\$1.00 BUYS \$1.50 WORTH OF SEEDS IN PACKETS.

New Glass Radish.

TWENTY DAYS FORCING OR THE STARTLE—A new and very distinct type of the well known olive shaped radish, which is of perfect form, smooth skin, fine color, and has very short leaves. This, combined with its extremely quick growth, taking only three weeks to mature, renders it extraordinarily valuable for forcing, while it does equally well in the open ground. The flesh is pure white, crisp and of a very pleasant taste. Owing to its short leaves, it can be sown very thickly. Will become a great favorite with gardeners. Pkt. 10c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.50.

WINTER RADISHES.

The following varieties should be sown in August or September, and stored in pits or the cellar on approach of winter, for use during the winter. Our collection embraces all the desirable sorts. **Our Mixed Seed will give great satisfaction.**

CALIFORNIA MAMMOTH WHITE—A Chinese variety introduced into California; is adapted to a large size; flesh quite solid, and of good flavor. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

LONG BLACK SPANISH—One of the latest as well as the hardest of the radishes. Roots oblong, black, of a very large size and firm texture. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

WHITE CHINESE—Root nearly cylindrical, six to seven inches long, and nearly three inches in diameter; neck rounded, skin white, flesh white, compact, piquant and very appetizing. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

ROUND BLACK SPANISH—Black skin, white flesh, and roots globe-shaped. The flavor is piquant. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

CHINESE ROSE—This variety has become very popular with market gardeners. It is of a half-long shape, pink color, and flesh as solid as an apple. It should be sown during August. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

WINTER VARIETIES, MIXED—Includes all the winter varieties in our list. Large pkt. 10c, $\frac{1}{4}$ lb. 30c, lb. 85c.

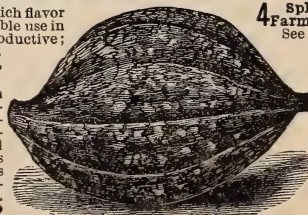

3 FINE SQUASHES

Brazilian Sugar.

BRAZIL SUGAR—Very rich flavor and sweet. It is liked for table use in every stage of its growth; productive; weigh from two to four lbs. each. Flesh yellow. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

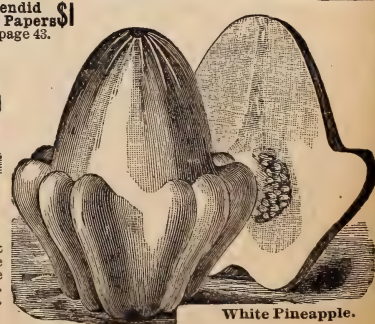

MARBLEHEAD—An excellent variety, resembling the Hubbard. A combination of sweetness, dryness and delicious flavor is remarkable. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

Marblehead.

WHITE PINEAPPLE—This is one of the most beautiful squashes we ever saw, as well as one of the most productive. Superior quality, desirable size and novel shape, attracting attention everywhere. Equally valuable for summer or winter. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 85c.

4 Splendid Farm Papers \$1
See page 43.

White Pineapple.

SQUASHES.

MAMMOTH CHILI—This is the largest of the squash family, being simply immense. The largest squash on record—292 pounds—was of this variety. If you want to secure the premium at your county fair, plant some of this seed. Color, orange-yellow, smooth skin; flesh very thick and fine grained, good and nutritious. A profitable variety to grow for stock feeding. Keeps well through the winter. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

NEW MAMMOTH WHITE BUSH, SCALLOPED—The great improvement in this variety has been effected by careful selection, so that the squashes are very uniform in shape and wonderfully prolific. They are fit to use very early, are of a beautiful white color, and grow to an immense size—12 to 15 inches across. The illustration shows a single squash, while the bush-like habit of growth is exactly the same as the old variety. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 80c.

EARLY ORANGE MARROW SQUASH—This is really an improved Boston Marrow, but has proved two weeks earlier and much more productive. The skin is a rich, deep orange, making the squash of very handsome appearance. It grows as large as the Hubbard; the flesh is very thick, fine grained and of choice quality. The squashes are in prime condition from September to January. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

COCOZELLE BUSH—This is a distinct type of Bush Squash; the plants grow very compact and uniform in height and the vines do not run. The squashes are oblong in shape, green and white striped. A remarkable feature of this variety is that the little green squashes when still very small, only two to four inches long, are most delicious in flavor. They can either be boiled whole or sliced and fried like egg plant, and are nearly, if not quite, equal in flavor, while

they are much more easily raised. Must be used while immature and will be appreciated as a novelty in growth and as a dainty and wholesome dish on any table. Pkt. 10c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

IMPROVED HUBBARD—Generally considered the best winter squash grown; flesh dark yellow, fine grained, dry and sweet; very hard shell, will keep till spring; productive; color, green, when ripe. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

YELLOW BUSH, or GOLDEN CUSTARD—A popular variety. Grows to large size and of unsurpassed quality. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

ESSEX HYBRID SQUASH—A very productive squash, of the finest quality, and an excellent keeper, specimens having been kept until June, as sound and good as when gathered. It is of early, quick growth, and can be raised very successfully as a second crop, following early potatoes, peas, etc. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 65c, postpaid.

SIBLEY, or PIKE'S PEAK—Shell, pale-green in color, very hard and flinty, but so very thin and smooth as to occasion the least possible waste in baking. The flesh is solid and thick; a vivid brilliant orange color, dry and of a rich delicate flavor. They range in weight from eight to eleven pounds. Vine remarkable vigorous and ripens its fruit simultaneously with the Hubbard. In productiveness the new Sibley Squash is remarkable, and ripens its fruit so evenly that nearly the whole crop may be gathered at one picking. In keeping qualities it remains in a good dry cellar perfectly sound, until the last of March. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

GIANT SUMMER CROOKNECK—This new strain is even earlier than the common variety, while the squashes grow to an extra large size, measuring from eighteen inches to two feet long and of finest quality. Their handsome appearance commands an extra price on the market. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, lb. 75c.

WINTER CROOKNECK—The best of keepers. Color, pale-green; excellent for table use. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

PERFECT GEM—A vigorous growing and wonderfully productive variety. Twenty-four perfect squashes have been produced on a single vine in a distance of three feet. Three to four inches in diameter, creamy white color. Flesh fine grained, cooks dry and is of a sweet and delicious flavor; equally valuable for summer and winter. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 75c.

TOMATOES.

Our seed is saved with great care. We never buy seed saved at canning factories, which usually is badly mixed and proves a great annoyance and loss to the planter.

1 oz. will produce about 4000 plants. Sow about 2 ozs. of seed in beds for each acre of crop you want to grow.

MIKADO—Also called Turner's Hybrid, is one of the finest, largest, most solid, and most productive tomatoes grown. The heaviest tomato ever grown of this mammoth variety was grown from O. K. Seeds—weight, 4 lbs. 2 ozs. Rapid grower, thick stalk; outyields all other varieties; beautiful shape and color; ripens all over evenly without hard core; the weight averages from 1 to 4 lbs. They are unequalled in flavor, particularly when eaten raw. Every person who has a garden should not fail to plant this beautiful and good tomato. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

EARLY ESSEX HYBRID—This is one of the most profitable tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best tomatoes for shipping or marketing. We recommend it highly. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

OPTIMUS—Grows uniform in size and is very early. The large handsome tomatoes are free from cracks and are borne in clusters of three to five. The flesh is fine grained and solid, of a bright crimson scarlet color. One noticeable feature is the splendid keeping and shipping quality of the tomato. We highly recommend it. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

IMPROVED TROPHY—Fruit very large, smooth and solid, fine color; very productive; a well-known and popular market sort. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

PERFECTION—Shaped like the Acme, but somewhat larger, of the same flavor, fully as early, perfectly smooth, blood-red in color, with more solid flesh and fewer seeds and produces more and larger fruit at the end of the season. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

THE GIANT CLIMBING TOMATO.

THE
GIANT
CLIMBING
TOMATO

GREAT progress has been made in late years in the improvement of the tomato. Quite in contrast with the small ill-shaped, sour specimens of a few years ago the large, smooth, sweet fruits so easily raised now. Great rivalry exists in localities as to who can raise the earliest or the largest tomatoes. We offer in the **GIANT CLIMBING TOMATO** the greatest novelty in this line, and whoever raises it, according to directions printed on each package, will have an attraction that will draw all eyes toward their garden.

This is not a tree tomato. The term "tree," frequently applied to tomatoes, is generally intended to mislead. We do not call grapes "Tree Grapes," because they will climb up a trellis. The **GIANT CLIMBING TOMATO** needs a support to climb upon, when they will grow 10 to 15 feet high, bearing fruit all along the vine from the ground up. The tomatoes grow to weigh from 2 to 4 lbs. each, and in size 10 to 16 ins. in circumference. Nearly all the tomatoes are smooth and regular in shape; color glossy red; sound to the core, with very few seeds. The flavor is all that can be desired. They are ever-bearing, only cut off by frost. These tomatoes can be grown on the garden fence, on the sunny side of a house or outbuilding, or in any position where a support is provided.

The more public the situation the more will they be admired. We print a few reports. Many more could be given, if space permitted:

Your Giant Climbing Tomatoes are immense. I have them weighing 2 lbs. and the people see that they are wonderful.
Geo. R. Booth, Ludlow, Mass.

One plant of Giant Tomatoes grew over 8 feet high. The best cluster was 7 tomatoes, weighing 6 lbs. all ripe at one time.
Wm. Yeates, Tusculum, Pa.

The Giant Climbing Tomatoes were wonderful in size and fine quality. One fruit weighed 3 lbs. 1 oz.

The Giant Tomatoes averaged a yield of nearly a bushel to each plant. One vine grew 14 feet high.
H. D. Mearns, Bohrestown, Pa.

It is a pleasure to see your Giant Climbing Tomatoes grow, and any person can well be proud of them. They are mammoth in size and wonderful in tall growth. I have one specimen measuring 16 ins. in circumference and over 6 ins. in diameter. Fine flavor and better than I thought they could be. You can not recommend them too highly.
Mrs. Wm. C. Cramer, West Branch, Cal.

From the Giant Tomato seed I raised the greatest crop I ever saw. One weighed 3 lbs. and many 2 lbs. each.
E. J. Duse, Malvern, Va.

I raised one stem of Giant Climbing Tomatoes containing 37 fruits. My heaviest tomato weighed 3 lbs. 3 1/2 oz.; measured 8 1/2 ins. in diameter. They are enormous field-ers.
T. Harris, Abbott, Neb.

Price of Everitt's Giant Climbing Tomato Seed.

As this tomato is a very shy bearer of seed the price will always be high, yet when you consider that each plant, with proper care, will produce nearly a bushel of tomatoes, the price should not be considered. 1 liberal package 20c, 3 for 50c, 8 for \$1.00. Families should club together and get them at wholesale rates.

(46)

Don't fail to include Logan's Giant and Everitt's Earliest of All Tomatoes in your order. See Novelties.

LIVINGSTON'S NEW BEAUTY-A fine variety, coming from originator of Acme, Paragon, Perfection and Favorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of

four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping. Pkt. 5c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

SELECTED ACME—One of the earliest in cultivation. Fruit of medium size, perfect form, round, slightly depressed at the poles; pinkish purplish color. Ripens evenly and has no green core. Bears continually until frost comes. Pkt. 5c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

NEW STONE—This main crop variety of tomatoes is very large and bright scarlet red color, smooth shape. Its distinguishing feature, and from this it takes its name, is its great solidity. The flesh is very firm. One of the best shippers. A grand canning variety, unsurpassed for keeping. Pkt. 10c, 3 for 25c, 1/2 oz. 20c, oz. 35c.

THE IGNOTUM—(Unknown). Grows to very large size and is very solid. Selected Acme. It is remarkably smooth, regular in size and very solid. It is of handsome deep red color, ripening to the stem and free from crack or rot. It is one of the finest market sorts. Pkt. 5c, oz. 25c, 1/4 lb. 75c, lb. \$2.50.

Golden Queen—There are many varieties of fine red tomatoes, but every gardener will hail with delight this fine yellow sort. In size, shape, solidity and productiveness it is not surpassed by any other tomato. Beautiful yellow color; just the thing for slicing and preserving. Should be found in every garden. They will delight everybody. Pkt. 5c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

LIVINGSTON'S FAVORITE—Ripens evenly and early, holds its size to the end of the season. It is very prolific, few seeds, solid flesh, bears shipping long distances. Pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$1.85.

Cardinal—A beautiful cardinal red, very glossy looking when ripe; the flesh of the same brilliant color ripens evenly through, having no hard green core like many others; very few seeds. In shape it is perfect, beefing round and unusually smooth and solid. Pkt. 5c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

Paragon—Very similar to that of Livingston's Favorite. Pkt. 5c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

Tomatoes for Preserving—Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum. Pkt. 5c, oz. 25c.

PONDEROSO—A mammoth variety introduced by Henderson, for which \$250.00 was paid for a name. We will sell you a packet for 10c, or 3 for 25c.

CAUTION There are the short growing bush (called Tree) Tomatoes and the long growing (called Tree) Tomatoes, but if you want the true Giant Climbing Tomato, order your seed of us and you will not be disappointed.

PEACH TOMATO.

This very useful and beautiful oddity is sure to attract attention and favorable comment, whether growing in the garden or served on the table. It is almost identical with some forms of peaches, both in shape and color. The fruit is produced in clusters; is very solid with red interior, and red, pinkish and green blush on the outside skin, which can be easily peeled, like

the skin of a peach. Vines compact in habit and very productive. For preserving, Peach Tomato is hard to beat. Pkt. 10c, oz. 30c, 2 oz. 50c.

EARLY WHITE FLAT DUTCH—(Strap-leaved). Size, medium. Flat, white, sweet, tender; rich for table; spring and fall.

WHITE EGG—A valuable variety of very rapid growth; egg-shaped, thin white skin, solid, firm, fine-grained flesh; sweet, mild flavor; good size; excellent, either as an early or late variety; keeps well.

TURNIPS. TABLE VARIETIES.

1 oz. will plant 250 feet of Drill.

Sow about 1 pound broad-cast per acre.

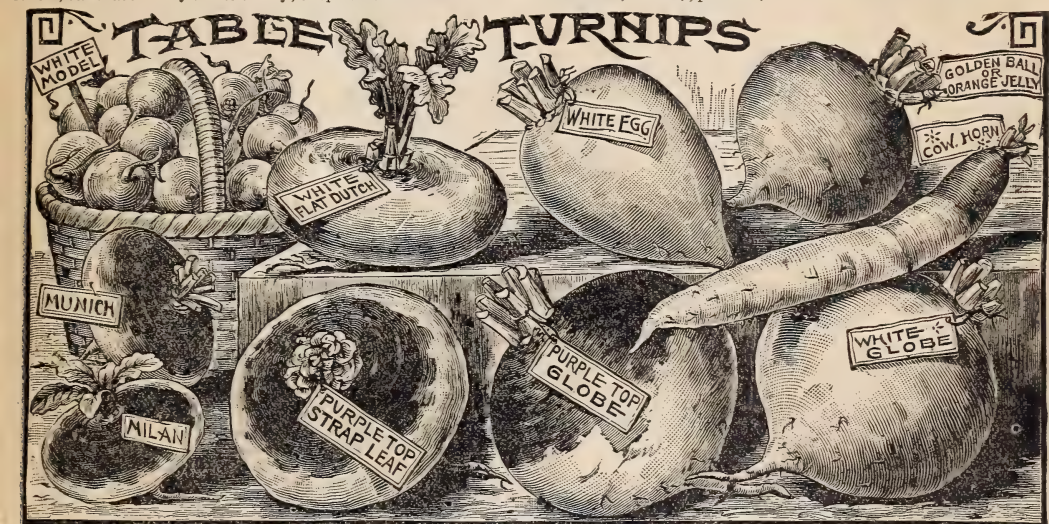

We sell any of the following varieties, unless noted, at pkt. 5c, oz. 12c, ¼ lb. 20c, lb. 50c by mail; by freight or express, per lb. 40c.

Early Six Weeks or Snowball—This new turnip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild; free from side roots. Pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

PURPLE TOP MUNCH—One of the earliest in cultivation, making an excellent spring garden turnip. Grows entirely above ground; pure white, with a bright purplish red top and few leaves. *Flesh, fine-grained and sweet.* Very productive, and certainly one of the handsomest turnips in cultivation.

RED or PURPLE-TOP STRAP LEAVED—One of the most popular varieties, both for table and stock. Grows to a large size, solid, crisp and mild flavor. We have the best strain of this popular variety that can be found anywhere. *None better.*

EXTRA EARLY MILAN—The earliest flat turnip in cultivation. The bulb is very flat, of medium size, quite smooth with a bright purple top; leaves few, short and of light color, growing very compact, and making an exceedingly small and neat top; flesh pure white, of choicest quality, hard, solid and fine-grained; an excellent keeper. Pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

RED or PURPLE TOP GLOBE—This is the most productive variety and one of the handsomest. It is a beauty. The quality also is very fine for table, and owing to its great yielding propensities, can be grown with great profit for stock.

GOLDEN BALL or ORANGE JELLY—A very beautiful and bright yellow turnip of medium size and of universally sweet and delicious flavor. It is hardy and one of the best keepers. Always brings a good price in the market.

Long White Cow Corn—One of the very best for culinary purposes. *Flesh white, fine-grained, sweet; keeps well.*

LARGE WHITE GLOBE—The roots in rich ground will often attain the weight of 12 pounds. An extra good fall and winter turnip, skin white and smooth, roots grow quickly and form a perfect globe.

Sweet German or Long White French—*Flesh white, hard and firm, partaking much of the nature of a Ruta-Baga.* Must be sown much earlier than the flat turnips. In the autumn and early winter it is apt to be hard, but mellow like an apple by keeping.

YELLOW ABERDEEN—Medium size, round shape, pale yellow, tender, sugary, hardy, productive.

AMBER GLOBE—One of the best varieties for table use, well adapted for field culture; large size; keeps well.

MIXED TABLE VARIETIES—Large pkt. 10c, ¼ lb. 20c, per lb. 60c, by mail.

Swedes, or Ruta-Bagas.

Price same as Turnips.

Grown for stock feed, and could be profitably cultivated on a much larger scale.

CARTER'S IMPERIAL—A hardy sort, excellent for table use or feeding stock. Does not run to long necks. This should be sown a month earlier than the other varieties.

LAING'S IMPROVED RUTA-BAGAS—One of the earliest and best for table. Handsomest variety, first-class quality.

LARGE WHITE FRENCH—Excellent for table use as well as stock. Large size, solid, mild and sweet. A desirable sort.

In July we will publish a **SPECIAL TURNIP Catalogue**. Send for it.

EVERITT'S MAN WEIGHT FARM AND GARDEN TOOLS.

See last page of cover. If you are a Farmer, Gardener, Nurseryman or Truckee, you need

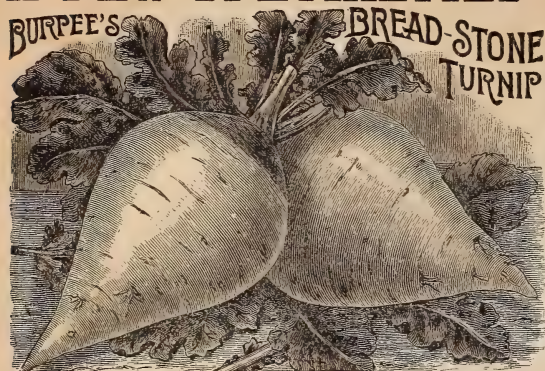

a set of these wonderful machines. Where labor is scarce or where it is expensive they will prove the most valuable machine on the place. **YOU CAN GET ONE FREE** by making up an order for onion seed. See page 35. The **Man-Weight Machines** embrace many tools in one. Why buy a great variety of tools when you can get all in one combination? *A word to the wise.*

ONION SETS.

We will quote prices any time by letter, as they are liable to change. We will accept orders in bulk at following prices as long as the market does not change:

White Bottom Set	¾ Bu.	\$1.40, 1 Bu.	\$4.50
Yellow " "	¾ "	1.25, 1 "	4.00
Red " "	¾ "	1.25, 1 "	4.00
White Multiplier	¾ "	1.50, 1 "	5.00

A FEW SPECIALTIES and ODDS AND ENDS are Listed on this Page.

BREAD-STONE—Our illustration shows the shape: while of the *Ruta-Baga* type, they are of such *extra fine quality* that they deserve to be classed with the *best table turnips*. Of medium size, very quick growing, and the roots are very smooth, white, with faint-colored top. The flesh is *perfectly white*, fine grained, and cooks in *only fifteen minutes*, remarkably tender and very sweet, without the strong odor and flavor so objectionable in many varieties. *It is the finest table turnip for winter and spring use.* Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

PEDIGREE TOBACCO.

Improved by continuous selection and grown on the crown shoots only.

PRICE OF ANY VARIETY—Pkt. 10c, oz. 25c, $\frac{1}{4}$ lb. 50c, lb. \$2.00.

BRADLEY BROAD LEAF—A popular variety for export, manufacturing, or cigars. A good, reliable variety.

TUCKAHOE—A first-class variety in every respect. Leaf long and extra fine—the perfection of a wrapper.

YELLOW PRYOR—Preferred by many for bright, and succeeds where other yellow sorts fail. The west is given its preference.

SWEET ORONOKO—Used for first-class plug fillers, and makes, when sun-cured, the best natural chewing leaf. A favorite for the "home-spun" wherever known.

HAVANA—Grown from imported seed. Better than direct imported seed for American planters.

CONNECTICUT SEED LEAF—The largest, finest and best of this indispensable kind. Every seed stock carefully selected.

PENNSYLVANIA SEED LEAF—The best grown in the famous Lancaster County district.

BLUE PRYOR—The genuine James River favorite. Rich shipper.

MAMMOTH RUSSIAN SUN FLOWER—Is grown for its seed, which are valuable for stock, particularly poultry. It is considered the *best egg-producing food known*. They eat it greedily, fatten on it, obtain a bright, lustrous plumage and strong healthy condition, that fully illustrates the wonderful benefits from its use. It can be raised as cheaply as corn, having yielded at the rate of 120 bushels per acre. Single heads measure 12 to 22 inches across and contain an immense quantity of seed. It can be sown at any time up to the middle of July. Pkt. 5c, $\frac{1}{4}$ lb. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, $\frac{1}{4}$ bu. 75c, bu. \$2.50.

VEGETABLE PLANTS.

All Plants must be sent by Express.

These plants are grown expressly for our trade by an experienced gardener who we employ for that purpose. They can be obtained fresh from the beds, and on short notice as long as supplies last, 500 at 1,000 rate.

(In July). Embracing most popular sorts. 100 50c, 1,000 \$4.00.

EGG PLANTS—(Ready May 10th). New York Imp. Purple. Doz. 25c, 50 75c, 100 \$1.25.

PEPPER PLANTS—(Ready May 10th). Most popular sorts. Doz. 20c, 50 60c, 100 \$1.00.

SWEET POTATO PLANTS—(Ready May 10th). Popular sorts of yellow and red 50 for 25c. 100 40c, 1,000 \$2.50, 5,000 or more at \$2.25 per 1,000.

ASPARAGUS ROOTS. See page 17.

MAMMOTH WHITE FRENCH ARTICHOKE.

THE GREATEST FOOD FOR HOGS.

Yields 400 to 1,000 Bus. per Acre.

The wonderful productiveness and ease with which these Artichokes can be produced is always a surprise to those who cultivate them for the first time. They are an excellent food for cattle, sheep and horses, and the cheapest and healthiest hog food raised; one acre being equal to five acres of corn for building up large healthy frames with plenty of bones and muscle. They not only grow rapidly, but fatten on them, only requiring corn for a short time in the finishing process. The hogs harvest them themselves, thus saving all expense, even that of feeding. Freezing and thawing does not injure them, and the hogs will feed themselves from October 1st, in this latitude, until the late spring, when grass has come, except when the ground is frozen solid. No farmer can do better than plant a piece of ground to Artichokes without delay. They are a certain preventative of disease. On good corn land they produce 400 to 1,000 bushels per acre. The tops, which are produced in immense quantity, make excellent food for horses, cattle, sheep and mules when properly cured. To destroy them, plow under when they have attained a four inch height.

They should be planted early in the spring, cut small like potatoes. Plant 18 inches apart in rows three feet apart. The next spring break up the ground. The plants will appear all over the surface. Run through both ways and leave plants stand in hills like corn. Select well drained lands. Three bushels will plant an acre. Owing to the drought last summer our crop was short, and prices are necessarily higher. 1 lb. 35c, 4 lbs. 75c by mail. By freight or express, $\frac{1}{4}$ bu. 75c, bu. \$2.00, bbl. of 3 bu., for an acre, \$3.00.

SPANISH PEANUTS.

An early variety, growing perfectly erect, can be cultivated with the plow exclusively. The pea is small, but remarkably solid, no pops, and the yield per acre very large. Because of their early habit and easy cultivation, the most profitable variety to grow for fattening hogs. The foliage growing erect, is easily harvested, and makes the richest hay known. Plant any time from April to July. Plant in rows two feet apart, and seed eight inches in the drill. Pkt. 10c, lb. 30c, 4 lbs. \$1. by mail, post-paid. By freight or express $\frac{1}{4}$ bu. 75c, bu. \$2.75.

BEAUTIFUL FLOWERS —FROM— BULBS

Select List of
SUMMER FLOWERING
BULBS.

IN ENGLAND, FRANCE, GERMANY, and other older countries, the beautiful flowers from bulbs are universally grown in almost every home; whether among the wealthy, or

the poorer cottagers, a wealth of flowers are found in the house to brighten it during the dreary winter, and the garden and lawn are ablaze with their beauty in early spring and summer. The only reason why they are not as generally grown in this country is because their beauty has not been recognized and their ease of

culture and cheapness understood.

In no other way can equal results be obtained for the same cost of money or time. Our prices place these beautiful gems within the reach of all, and there can be no failure about growing them, as most varieties will grow as readily as a potato stuck into the ground, while many failures result when seeds are sown to produce flowers.

Let everybody, whether in the city or country, plant some of our bulbs. Full directions for growing accompany each shipment.

Few flowers can compare with those from our Summer Flowering Bulbs. So easy of culture and quick in giving returns. The bulbs can be kept over winter, and will continue, year after year, to return in beauty the original trifling investment. Our bulbs are all of the highest grade and will be sent BY MAIL, POST PAID AT PRICES QUOTED, $\frac{1}{4}$ DOZ. AT DOZ. RATES.

For every DOLLAR remitted us for bulbs the purchaser may select 25 CENTS WORTH EXTRA. Thus, if you send \$1.00, select Bulbs amounting to \$1.25, for \$2.00 select to value of \$2.50, etc. WE PAY POSTAGE.

APOIS TUBEROSA.

A valuable hardy tuberous-rooted climber closely resembling the common Wistaria in vine and foliage, and having clusters of rich, deep purple flowers, which have a strong, delicious violet fragrance. Plant the bulb near a trellis, fence, tree or any place where you may wish a climber. They grow to a great height and bloom profusely. The bulbs are perfectly hardy and should not be taken up over winter. Each, 10c, per doz. 75c.

Apois Tuberosa.

BEGONIAS.

TUBEROUS-ROOTED.

The Tuberous-Rooted Begonias are among the most beautiful of our flowering bulbs. They will bloom throughout the summer, requiring no more care than a Geranium. The colors range from the most delicate shades of yellow and salmon to crimson, white and scarlet. The tubers may be preserved dry in winter, by packing in charcoal dust. Choice Single Varieties—Mixed, 15c. each, \$1.25 per doz. Choice Double Varieties—Mixed, 30c. each, \$3.50 per doz.

Flowering Begonias.

TUBEROSES.

NEW EXCELSIOR PEARL.

This is the best variety and is a general favorite and the most popular of all flowers for button-hole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberose, and are borne in great profusion. Of dwarf habit, perfectly double and of most delicious fragrance.

Extra sized flowering bulbs, 5c. each, 6 for 25c, 45c. per doz., 25 for 85c, 100 for \$2.75, post paid. By express at expense of purchaser, 100 for \$2.00, 200 for \$3.50.

New Excelsior Pearl Tuberoses.

Chinese Sacred Lily, Joss Flower, or Flower of the Gods.

This is one great blooming bulb which is more eagerly sought after than any other flower in cultivation; and we are pleased to announce that we are able to supply the demand with the true large-flowering variety, direct from China of our own importation. The bulbs are very large, and each one sends up from 5 to 12 spikes, which bear clusters of large, perfect, waxy-white blossom, with a yellow center, and of a powerful and delicious fragrance, which is not excelled by any other flower. They grow well in pots of soil; but the most popular way of blooming them is the Chinese method, as follows: Fill a bowl, or some similar vessel, with pebbles, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles and place in a warm sunny window. The bulb will at once commence a rapid growth and bloom in two or three weeks. Price of extra large bulb, by mail, post paid, 20c each, 3 for 50c.

Chinese Sacred Lily.

LILIES

1/4 Dozens at Dozen Rates.

LILIUM AURATUM (The Golden-Banded Lily of Japan)—The Yam-yura or Hill Lily of the Japanese. Ivory-white ground, thickly strewn with purplestuds; the center of each petal has a broad band of light golden yellow extending from tip to base. Grandest of all the Lily family. The flowers measure nearly a foot across, and possess a most delicious fragrance. They should be in every garden. Price, each, 25c, doz. \$2.50, by mail, post paid; by express or freight, 1 doz. \$3.00.

LILIUM HARRISII (Bermuda Easter Lily)—It is a constant bloomer, flowering very early, very showy on the plant or for table, parlor or church decoration. Flowers are larger and longer than other sorts, and a great many more of them. A grand pot plant. This is one of our specialties. Each 20c, doz. \$2.00, by mail; doz. \$1.50, by express.

LILIUM TEXIFOLIUM (the Core-Lily of Siberia)—A very showy and graceful Lily of Siberia. It is of dwarf habit, reaching the height of about eighteen

ins., and bearing pretty drooping flowers of a most brilliant shade of red. A little beauty indeed. Each 20c, doz. \$2.00, by mail; by express, 1 doz. \$1.75.

SPECIAL OFFER

For 60 cents we will send one bulb of each Harrisii, Auratum and Texifolium, by mail.

Speciosum Album, pure white, very fragrant. Each 25c, doz. \$2.50.

Speciosum Rubrum, rose, spotted with crimson. Each 25c, doz. \$2.50.

Candidum (Lily of the Annunciation)—This Lily is the emblem of purity. The deep lemon anthers contrast beautifully with the wax-like petals. The fragrance is delicious and never oppressive. It is one of the best Lilies to grow in the house or outside. Perfectly hardy. Each 15c, 25c, dozen, \$1.00.

Tigrinum (Double Tiger Lily)—A plant of stately habit, growing from 4 to 6 feet high, bearing an immense number of double, bright orange red flowers spotted with black. Each 15c, doz. \$1.50.

Lilium Auratum. (Golden Banded Japan).

LILY OF THE VALLEY—It is one of the most useful and greatly admired plants grown; bell-shaped flowers, pure white; are highly prized for cutting purposes; they are the most charming when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. Doz. 30c, 25 for 60c, 50 for \$1.00.

AMARYLLIS.

Belladonna Major. Large California Bulbs. One of the most beautiful and satisfactory of this large family. It is a strong grower and blooms freely; flowers are large, of a delicate rosy color and white throat, borne on a tall stalk in a bouquet-like cluster. Our bulbs are extra large and strong grown in open ground. Each 50c, 3 for \$1.25, by mail.

Formosissima. (Jacobean Lily)—Flowers of a deep velvety crimson, handsomely formed and very striking. Each 25c.

Johnsonii—One of the best sorts, strong growing and free blooming; flowers large, crimson, striped with white. Fine strong bulbs. Each 75c.

CALADIUMS. Euclettum (Elephant's Ears)—The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant on lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter. Each 20c, doz. \$2.00, 1/2 doz. same rate.

WHITE CALLA—There is probably no plant so popular for house culture as the White Calla. Its beautiful snow-white flowers and spear-shaped leaves are found in mostly every window garden. It requires plenty of water, and can be made to flower at almost any season of the year. Strong roots 20c, doz. \$2.00.

Caladium (Elephant's Ear.)

New Dwarf French Cannas.

The new varieties of Crozy's Dwarf Cannas are distinguished by the luxuriance and diversity of their foliage, but more particularly by the unusual size, profusion and brilliancy of their flowers. They are an indispensable adjunct to every well-ordered flower garden. Their charming colors and short, compact habit of growth will make them general favorites. Each, 20c, doz. \$2.

THE BEAUTIFUL
CINNAMON VINE.

See Page 12 for this Beautiful Climber.

GLADIOLI

GLADIOLUS—The most beautiful of all summer flowers from bulbs. The long spikes of bloom include in the different varieties almost every desirable color. Plant middle of April to June 1st, 6 to 9 in. apart and 4 in. deep. In fall remove to cool cellar till spring. Our varieties are all choice and include many rare sorts.

Choice Seedlings mixed. Each 6c, doz. 60c.

Red and Pink mixed. Each 5c, doz. 50c.

Yellow. Each 5c, doz. 45c.

White and Light Colored mixed. Each 6c, doz. 60c.

Extra Fine mixture. Each 5c, 3 for 10c, doz. 30c; by express 50 for \$1.00, 100 for \$1.75, 500 or more at 1 1/2c each.

THE CHOICEST SELECTED FLOWER SEEDS. THE BEST THE WORLD PRODUCES

POLYANTHA ROSES.

The new **Polyantha** or **Fairy Roses** are a beautiful class of dwarf everblooming Roses from Japan, and few plants that come from that flowery land can equal these in unique beauty and profusion of bloom. They are hardy in our climate, **everblooming**, each branch bearing a cluster of from ten to twenty-five flowers, and each flower a gem in itself. The flowers are very delicate in color, and graceful in the arrangement of petals, while in fragrance they rival the most delicious Tea Rose.

For planting as borders to beds, or along the edges of paths or drives, they can not be surpassed, while they make most attractive beds in solid or mixed colors for summer flowering.

Our seed has been saved from the most beautiful named varieties of this lovely class. The seed should be started early in boxes in the house, and transplanted in the spring. About 50 per cent. will flower the first summer, while the plants that do not bloom can be potted in the fall and will flower profusely during the winter. **Pkt. 15c, 2 pkts. 25c, 5 pkts. 50c.**

For Novelties
and Specialties,
see pages 13 to 16.

Polyantha Roses.

BEAUTIFUL PLANTS.

FREE BY MAIL. SENT EVERYWHERE.

Who will not have some of our beautiful plants at the almost give-away prices quoted below? We have hundreds, thousands and tens of thousands of plants growing and ready for our customers, but we lack space in this Catalogue to give a detailed description of all, so we offer them in the different collections as below. Please examine this list before ordering your plants and see if you can not get what you want from us at half what you would pay elsewhere.

We guarantee all collections will be made up of desirable varieties, and contain many choice and rare sorts that we would mention particularly if space permitted.

All plants will be carefully packed and delivered free to your postoffice at the low prices quoted.

Plants are generally known as Annuals, Biennials and Perennials—Annuals are those plants that flower and mature their seeds within a year after they are sown and then perish. Biennials are those plants that flower the second and sometimes third year after the seed is sown, and then perish. Perennials are those plants that generally do not bloom until the second year, and then live and bloom for several years in succession.

The following list will be found convenient to many making their selections:
In the list "a" stands for annuals, "b" for biennial, "p" for perennial, "h" for hardy, "hh" for half hardy, "t" for tender.

SEEDS FOR SPECIAL PURPOSES.

Plants of taller growth suited for Large Beds, Backgrounds or Centers, around which smaller kinds may be grouped. Antirrhinum, Aquilegia, Asters, Balsam, Cacalia, Calendula, Delphinium, Gaillardia, Hollyhocks, Marigold, Mirabilis, Salpiglossis, Scabiosa, Stocks, Sweet William, Zinnia, etc.

Climbing plants for trellises, Verandas, Pillars, etc. Flowering Beans, Canary Flower, Cinnamon Vine (see page 12), Cobea, Cypress Vine, Ornamental Gourds, Ipomea, Flowering Peas, Thunbergia, Tropaeolum Majus, etc.

Spreading or Trailing Plants adapted to Vases, Hanging Baskets, Rockeries, etc. Abronia, Alyssum, Gilla, Lobelia, Maurandia, Myosotis, Neomphila, Nolana, Sanvitalia, Verbena, etc.

Low-growing Plants of spreading habit, adapted to Small Beds, Ribbons, Massing or Edging. Abronia, Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Catchfly, Centaurea, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethrum, Tropaeolum Minor, Verbena, etc. SELECTION OF COLORS—If it is desired to fill separate beds with flowers of a single color, and of such kinds as will have a fine appearance and bloom the whole season, select from the Phlox Drummondii, Pansy, Verbena, Petunia, Salpiglossis, stocks, Balsams, Zinnias, etc.

FRAGRANT FLOWERS—The Mignonette, Sweet Pea, Alyssum, stocks, Carnations, are all fragrant and fine for cut flowers.

CHOICE FLOWER SEEDS.

\$1.00 PAYS FOR \$1.50 WORTH. POSTAGE PAID.

Why pay some other party 10 to 25 cents per packet for Flower Seeds, when you can buy the same from us at 5 cents per paper and upward, and much less if you take a dealer's worth? Send postal note or registered letter. Stamps taken. Large Packets. Send us a trial order. Directions for cultivating on each packet. ALWAYS ORDER BY THE NUMBER.

ASTERS h.a. Very beautiful and popular plants, growing from ten to eighteen inches high. For profusion of flowers and richness of display, the Asters are unrivalled, and constitute the principal adornment of our gardens during the autumn.

50. **Dwarf Bouquet**—A magnificent variety, about one foot high. When full grown a single plant forms a complete bouquet and covers itself with blossoms, often numbering fifteen or twenty flowers. 10c.

51. **German Quilled**—Fine mixed, of all colors. Very popular. 10c.

52. **New Dwarf, Peony Perfection**—12 inches high, very neat, compact and flowers profusely. Flowers are of very large size and perfectly double. The colors are peculiarly rich and brilliant, and the refined form of the flowers attracts great attention while in bloom. Finest mixed, 10c.

54. **Chrysanthemum Flowered**—Mixed. Fine large double flowers resembling chrysanthemums, and valuable on account of its profuse flowering when others are done. All colors mixed. Dwarf 12 inches, 10c.

55. **Cocardeau, or Crown**—Finest mixed. A very showy variety, the large double flowers having the center pure white, surrounded with petals of a distinct, bright color. 10c.

35. **ALYSSUM**—Sweet white. h.a. A well-known favorite; with delicate flowers of a honey-like fragrance, much prized for bouquets, baskets, rockeries and bedding; a continual bloomer. Pkt. 5c.

20. **ADONIS Autumnalis**—(Pheasant's eye). h.a. Very showy and popular border flower, remaining in bloom a long time. 5c.

AQUILEGIA (Columbine). h.p. Blossoms early in the spring, beautiful, curiously formed and variously colored flowers.

65. **Single**. All colors. 5c.
66. **Double**. All colors. 5c.

AMARAN-THUS, h.a. Of remarkably handsome foliage and interesting flowers, producing a striking effect in the border as a background, or as centers for beds. Thrives on poor soil.

40. **Caudatus**, (Love lies bleeding). Long drooping "chain" of flowers; pretty for decorating. 5c.

41. **Tri-color**, (Joseph's coat). Red, yellow and green; foliage two feet. 5c.

42. **Salicifolius**, (Fountain Plant). Willow-like foliage. 5c.

44. **Mixed**. All colors. The brilliant colors of foliage and flowers as shown in a bed of mixed Amaranthus are scarcely surpassed among all our beautiful plants. 5c.

30 Fine mixed. 5c.

AGROCLINUM ALBUM

10. **ABRONIA Umbellata**. h.h.a. Very pretty trailing plants, with numerous clusters of sweet-scented flowers; rosy lilac with white eye. 5c.

ACROCLINUM. h.h.a. One of the best everlasting flowers of great beauty. Gather for drying soon as open. 15 Choice mixed. 3c.

AGERATUM. h.h.a. Choice mixed. Excellent for bouquets, a profuse bearer, blossoms early and continues to bloom till autumn. 25. Mexicanum. 5c.

26. Finest varieties mixed. 5c.

AGROSTEMMA Celi Rosa (Rose of Heaven). h.a. A abundant bloomer with deep rose flowers; very pretty in masses and borders.

ANTIRRHINUM (Snap Dragon). h.p. One of our very best perennials; large, finely shaped and of the most brilliant colors. Hardy perennial.

46. **Majus** mixed. Tall varieties; fine assortment. 2 ft. Pkt. 5c.

47. **Tom Thumb**. Finest mixed. 5c.

CHOICE FLOWER SEEDS 5¢ A PKT.
CHEAPER IN LARGE
ORDERS.

BEGONIAS. *t.p.* As bedding plants there is nothing to equal the Tuberous Rooted Begonia. They bloom equal to the geranium, but with a form and variety of colors and shading equal to the rose. The flowers are borne upright on stout, stiff stalks showing the full beauty of the flowers, which are immense in size, frequently measuring 5 to 7 ins. across.

TUBEROUS BEGONIAS-DOUBLE.

95. **Tuberous-Rooted, Single, Mixed.** Containing the greatest variety of shades, from pure white through all the tints of cream, yellow, orange, pink, red and scarlet. **Pkt. 20c.**
96. **Tuberous-Rooted, Double, Mixed.** Exquisite double kinds. **Pkt. 25c.**
97. **Bex Begonia, Mixed.** Beautiful varieties, with variegated foliage. **Pkt. 20c.**

BALSAMS. *h.a.* Very popular plants, producing the most lovely and striking flowers in rich profusion. Easily cultivated. They thrive in rich soil. There have been great improvements made in these flowers the last few years. Our list embraces the finest.

80. **Extra Double Rose Flowered.** Form dwarf bushy plants profusely covered with large double flowers of brilliant colors throughout the summer and autumn. **Mixed. 10c.**
81. **The King, Brilliantscarlet, very double. 10c.**
82. **Camellia Flowered.** Very double and beautiful colors; perfect form. **Mixed. 10c.**
83. **Double Solferino.** Beautiful, white ground, striped and streaked with lilac and scarlet. **10c.**

BARTONIA AUREA.

130. **CALIOPSIS, Golden Wave.** *h.a.* For a mass of bright color, this is probably the most effective of all annuals. Plant very bushy and compact, reaching 2 feet in height, and covered from July to Oct. with hundreds of beautiful golden blossoms, with dark centers. **5c.**

CARDIOSPERMUM, BALOON VINE.

- h.a.* Baloon Vine is a curious, half-hardy annual, and a rapid, handsome climber. Sow in open ground about the 10th of May.
70. **Baloon Vines (Cardiospermum).** **5c.**
75. **BARTONIA, Aurea.** *h.a.* Showy flowers, with downy thistle-like foliage exceedingly brilliant. **5c.**

ASPERULA

- h.a.* Finely adapted for bouquets, by reason of its shape, size and delicate color. For button-hole bouquets nothing will be oftener in request.
18. **Mixed fine, blue. 5c.**

CALENDRIANA

- Pretty plants, with succulent stems and fleshy leaves; splendid for edgings and rockeries.
115. **Grandiflora.** *h.a.* Beautiful rose. 1½ ft. **5c.**
116. **Umbellata.** *h.h.b.* Dazzling magenta crimson. 1 ft. **Pkt. 5c.**
- COSMOS** (see page 14). **Pkt. 10c.**

BROWALLIA

- h.a.* The Browallia is valuable alike for blooming during the winter in the house, as well as bedding out during the summer. Remarkable free and attractive bloomers.
105. **Rozeli, Mixed.** An exceedingly pretty species, flowers double the size of other varieties, and forms a dense, compact bush, flowers azure blue and white with a yellow center. 2 ft. **Pkt. 5c.**
- CACALIA** (Tassel Flower). *h.a.* Small, pretty plants with tassel-like flowers, keeping in bloom from early summer until autumn. 1½ ft.
110. **Mixed.** Golden yellow and scarlet. **Pkt. 5c.**

CENTAUREA

CENTAUREA. An exceedingly interesting genus of plants, embracing annuals, bi-ennials and perennials. Some of the varieties are magnificent foliage plants, while others are noted for their beautiful flowers.

180. **Candidissima.** h.b.p. Fine ornamental plant of great beauty. Silvery-white, deeply cut foliage. 10c.

181. **Clementi.** h.b.p. Foliage white, deeply cut, and altogether very beautiful. 5c.

CANDYTUFT. h.a. Indispensable for cutting; a treasure for bouquets. All varieties easy to cultivate.

145. **New Carmine.** Distinct and beautiful. 5c.

146. **Improved White Rocket.** Fine for florists. 5c.

147. **Crimson.** Very beautiful. 5c.

148. **Rocket.** Large trusses of pure white flowers. 5c.

149. **Mixed.** All the above. 5c.

CAMPANULA

(Canterbury Bells). h.b. Beautiful well-known plants, characterized by richness of colors and profusion of bloom.

138. **Media, Single Mixed.** Beautiful large bell-shaped flowers. 2½ ft. Pkt. 5c.

137. **Media, Double Mixed.** All the finest double varieties. 2½ ft. Pkt. 5c.

CALLIOPSIS

CANNA

CANNA (Indian Shot). t.p. Fine foliage plants of a highly decorative character; their handsome leaves combined with their varied and richly colored flowers have an extremely fine effect.

150. **Crozy's New Dwarf.** Flowers of unusual size and brilliancy. 3 to 4 feet high. 10c.

151. **Fine Mixed.** 4 to 6 feet. 5c.

CARNATION. h.b.p. A magnificent class of popular favorites, most of which are direct.

Our Seeds imported direct from Europe a run for 3 years at fancy prices. 10c.

CALCEOLARIA. t.p. Unsurpassed for pot culture in the greenhouse or conservatory;

producing their brilliant flowers in great profusion and variety. The blooms are remarkable for their oddness of shape and for their richness, diversity and variety of color.

150. **Grandiflora.** Mixed. From the finest formed and most beautiful marked varieties, striped and spotted. 20c.

121. **Regoso.** Shrubby variety, mixed. Pkt. 15c.

130. **CALLIOPSIS, or Coreopsis.** h.a. A very showy plant, producing flowers in nearly every shade of yellow, orange, crimson, red and brown. 2 feet high. Calliopsis, fine mixed. 5c.

We challenge comparison in price or quality with any reliable house in country.

CALCEOLARIA-HYBRIDA

207. **CLINTONIA**. Elegans—h.a. A pretty blue flower, similar in shape to the Lobelia. Splendid for hanging baskets or rock-work, or damp, shady situations. 1 ft. Pkt. 5c.

CLARKIA—h.a. The Clarkia is held in great esteem in Europe and especially in England, where it is as common as the Candytuft. The flowers are very pretty and of many colors, double and single. As the plant is apt to suffer in our hot, dry summers, it is better to sow the seed in September, and the plants will be large enough by spring to make good bloom. 1½ feet high.

200. Double and Single Mixed, 5c.

CUPHEA (Cigar Plant)—h.p. A free-flowering, neat plant, well adapted for either the conservatory or flower border. Will bloom all summer out door and if removed to the house will continue to bloom all winter.

Clematis

201. **Jackman**—h.p. Flowers will average three inches in diameter, ranging through all conceivable shades of purple, violet, porcelain, blue and white. 10 ft. Pkt. 10c.

202. **Coccinea**—h.p. Of slender habit, tubular flower, deep vermilion on outside and yellow within. 10 ft. Pkt. 10c.

203. **Virginiana**—Greenish white, fragrant flowers; dies down to the ground in winter, but starts up again in the spring. 20 ft. Pkt. 10c.

204. **Mixed**—h.p. Possesses all the varied hues of the tall and dwarf varieties; very fine. Pkt. 10c.

HYBRIDA**

A GROUP OF CLEMATIS
GROWN FROM OUR
MIXED SEEDS.

CINERARIA. (Cape Asters)—l.p. This is a favorite greenhouse perennial. The flowers and the foliage are both handsome and may be had in bloom nearly all the year. They thrive best in a light, rich soil and may be planted out in summer.

195. **Cineraria Hybrida**—Finest mixed. 20c. 197. **Maritima**. 10c.

CENTRANTHUS—h.a. Compact growing, free flowering little plants, succeeding well in any garden soil.

185. Mixed. 5c.

**CLARKIA
ELEGANS.**

CHRYSAETHMUS.—The annual varieties are exceedingly pretty, but are not so well known or cultivated as they deserve. They are bright, cheerful and free bloomers, easy and rapid in growth, and merit a prominent place in every garden. All the annual varieties make beautiful pot plants if sown in cold frames, and pricked off singly into 6-inch pots.

190. **Eclipse**. h.a. Pure golden, with a bright purplish-scarlet ring. 10c.

191. **Finest Mixed**. h.a. 10c.

CELOSTIA — (*Cockscomb*), h.a. Interesting and brilliant plants of tropical origin, which never fail to please the grower and attract attention; one of the most satisfactory plants for garden decoration.

215. **Glasgow Prize.** Very fine, dwarf variety; brilliant crimson, and handsome dark variegated foliage; 1 ft. Pkt. 10c.

216. **Cristata.** Finest mixed. Pkt. 5c.

217. **Queen of the Dwarfs.** A very dwarf variety growing only 8 in. high, with combs 7 to 10 in. across of a rich dark rose color, of very even growth. A fine bedding sort. Pkt. 15c.

COBEA, h.h.p. A rapid climber, attaining the length of 30 feet a season; of very easy culture and will give satisfaction. Large purple bell-shaped flowers produced in great profusion.

219. **C-Scandens**—Purplish lilac. 5c.

COLEUS, t.p. Beautiful ornamental foliaged plants, both for hot-houses and bedding out during summer, not exposed too much to the sun. The broad, oblong leaves are of a deep crimson brown color, edged with green and yellow, or salmon color, or mottled in a picturesque manner.

220. **Coleus**—Splendid collection. Pkt. 15c.

221. **New Hybrid Strains**—Choicest new sorts. 20c.

DAISY (*Bellis Perennis*) t.p. Every one knows the Daisy. A charming little plant for edg-

ings and borders. Give in a cool, partially shaded place. Sow seeds very early. The flowers are abundant in early spring, and may be made to flower later by the use of water.

255. **Finest mixed German.** Pkt. 10c.

256. **Extra Double White**—It is usually large double flowers with extra long stems. Pkt. 10c.

COLLINSIA, h.a.

The *Collinsia* is a very pretty, free-blooming hardy annual. The marbled or many-colored flowers are in whorls of 5 or 6 blossoms, and three or more whorls on each stem. The flower stalks are 1 foot to 18 inches in height.

225. **Best Mixed.** Pkt. 5c.

CONVOLVULUS MINOR (*Dwarf Morning Glory*), h.a. One of the most popular annuals. The dwarf varieties are very pretty for bedding, hanging baskets and vases.

230. **Tricolor Roseus.** Beautiful rose color, pure white center, fringed with purple, shading towards throat with five broad bands of golden yellow; 1 ft. Pkt. 5c.

231. **Crimson.** 5c. 232. **Best Mixture.** 5c.

235. **CONVOLVULUS MAJOR** (*Tall Morning Glory*), h.a. All colors, striped, blue, crimson, white and purple. 5c.

205. **CLEOME PUNGENS** (*Giant Spider Plant*), t.p. Seed sown in May will bloom July 1st, and continue in great profusion until frost, attaining a height of 5 or 6 ft., with great panicles of bloom as large as a *Hydrangea*. The flowers are a deep purplish pink when they first open, but fade to a light pink. As a honey plant for bees it has not a superior.

Is exceedingly showy and where a tall plant is desired is unsurpassed. Pkt. 10c.

DIGITALIS.

(*Fox Glove*.)

h.b.

Ornamental plants, producing dense spikes of flowers on stems,

three to five feet high. The blossoms are purple, white and spotted. Very showy. Sow seed in

spring or autumn. Flowers the second season

272. **Mixed Varieties.** Pkt. 5c.

ESCHSCHOLTZIA (California Poppy), h.a. A genus of the poppy family and fully as valuable as the common poppy for garden and as easily grown.

292. **Fine mixed**, all colors. Pkt. 5c.

GAILLARDIA, h.a. A class of plants very much admired for bedding, being remarkable for the size, brilliancy and duration of their flowers.

276. **Mixed varieties**, 5c.

275. **Hybrida Grandiflora**. Large flowers of rich crimson and yellow; 1½ ft. Pkt. 5c.

HELIOTROPE, h.a. This has become a favorite to all; its exquisite fragrance attracts all, and its freeness to grow and bloom places it foremost with our choicest flowers. It will not bear transplanting well, therefore new plants should be grown from seeds or cuttings.

320. **Fine mixed**, sweetest scented. Pkt. 5c.

HELIANTHUS (Sunflower), h.a. Adapted by its stately growth for a back-ground to a lawn, or a screen to hide unsightly places. The seed is used for feed and oil.

337. **Mammoth Russian**. Very rank grower.

Large flower.
Largely grown.

for its seed, which makes

a valuable oil, as well as a superior poultry and stock food. Pkt. 5c.

338. **Californicus**. Extra large and very double flower. Pkt. 5c.

GODETIA, h.a. Beautiful garden plants of easy cultivation in any good garden soil, having delicately shaded large blossoms. One to one and a half foot high.

305. **Rubicunda Splendens**, a showy variety. Rosy lilac flowers with purple stain in the center. Pkt. 5c.

303. **Whitneyi**, a magnificent sort, producing profusion of large rosy flowers, bloomed with crimson. A splendid pot plant. Pkt. 5c.

GOURDS (Cucurbita), t.a. A tribe of climbers with curiously shaped fruit in various colors, the names indicating the forms they assume. Being of rapid growth, they are fine to cover old fences, trellises, stumps, etc. The foliage is quite ornamental. 10 to 20 feet high.

310. **Mock Orange**.

311. **Nest Egg**.

312. **Apple Shaped**.

313. **Pear Shaped**.

314. **Bottle**. 315. **St. Phon or Dipper**.

316. **Powder Horn**.

317. **Hercules Club**.

318. **Serpent**. 1 Pkt. each 30c; price per pkt. 5c. All varieties mixed. 10c.

IPOMEA. h.h.a. Of all the flowers in general cultivation, the Ipomea ranks pre-eminent for delicate and intrinsic beauty; the brilliant and varied hues of its many species and varieties are marvelously beautiful, and their fine foliage and graceful forms render them indispensable adornments for the greenhouse, conservatory and flower garden. For covering arbors, walls, trellises, etc., they are unsurpassed.

370. *Bona Nox.* (Evening Glory, or Good Night.) Very large, white fragrant flowers. 10 ft. 5c.
 371. *Cocinea.* (Star Ipomea.) Handsome little scarlet flowers. 10 ft. 5c.
 373. *Noctiflora, or Grandiflora Alba.* (White Seeded.) Moon flower, 5c.
 374. *Quam oclit.* (Cypress vine.) 10c.
 375. Very fine mixture. This will delight all purchasers. It comprises many beautiful varieties. A single package will give plants and blooms that will make a summer's study. Pkt. 10c.

IPOMOPSIS. (Tree Cypress) h.h.b. The

Ipomopsis are very beautiful biennial plants, with long elegant spikes of rich orange and scarlet flowers; excellent for conservatory and out-door decoration. The foliage is very fine, giving great beauty to the plant, which grows usually from three to four feet in height, and keeps in flower a long time. The plant is a little difficult to keep over the winter, but proves hardy in a dry place.

376. Ipomopsis, mixed varieties, 5c.

KAULFUSSIA. h.a. A neat, free flowering plant of dwarf habits and compact growth. Succeeds well in any good garden soil.

380. Kaulfussia, mixed, 5c.

LANTANA. h.p. Splendid bedding plant, also beautiful in pots. No plant presents a greater variety of colors and changing hues.

385. Lantana Hybrida. Finest mixed varieties, 5c.

LARKSPUR. (Delphinium.) h.a.

This is one of the best known of English garden flowers. A vast improvement has been effected, by careful selection and attentive cultivation, in the size and color of the blossoms and the general habit of the plant. For large gardens, shrubberies, etc., the branching varieties will be found peculiarly well fitted.

390. Finest varieties, mixed, 5c.

391. Larkspur. Beautiful long spikes of brilliant dark blue and red double flowers. Very lovely. 10c.

LINUM GRANDIFLORUM. (Scarlet Flax.) h.a.

Pretty annuals of graceful habit. One of the handsomest ever introduced, equally recommended for its brilliant color and long duration in bloom. 5c.

LUPINUS. h.a. Large free growing, free flowering plant. Mixed annuals, pkt. 5c.

MIRABILIS. (Marvel of Peru.) Beautiful both in foliage and flower. This is the well-known Four O'clock and few plants combine greater beauty of flowers and foliage. p.

MAURANDIA BARCLAYANA.

MAURANDIA.

h.p. These charming climbers cannot be too highly praised for their beautiful flowers and foliage. From their graceful slender growth they are admirably adapted for hanging baskets, vases or any form of trellis work.

421. *Barclayana*. Deep violet-flower. 10 ft. 10c.

422. *Mixed Colors*. Something fine. 10c.

LOBELIA. h.h.a. Exceedingly pretty, profuse blooming plants of great value to the flower garden; their delicate drooping habit, and the profusion of their charming little flowers, render them extremely ornamental.

400. *Erinus Compacta*. Deep rich blue. 5c.

401. *Erinus Speciosa Alba*. Showy white flowers of drooping and spreading habit. 5c.

402. *Erinus Crystal Palace*. Dark blue. Splendid.

403. All sorts mixed. 5c.

HIBISCUS. h.a. A branching plant of the easiest culture, with rather pretty foliage and showy blossoms.

346. *Hibiscus*. Mixed, single and double. 5c.

GERANIUM. (Zonale.) h.h.p. Probably the Geranium is better known and more universally admired than any other plant grown. The constant succession and durability of bloom till frost comes, the brilliancy of the scarlet and other colors, and the exquisite markings of the leaves of some of the varieties, render them very desirable for pot culture and bedding. No garden seems complete without a bed of them, and in every collection of conservatory or parlor plants we are sure to find the Geranium. Propagation by seed is the only way to obtain new varieties.

280. *Finest Double*. Mixed. 15c.

281. *Apple Scented*. Mixed. 20c.

GILLA. h.a. Pretty dwarf annuals; may be sown at any time, and bloom in any situation, grow well in pots and may be placed in a rockery.

285. *Gilla Tricolor*. Choice mixed, 5c.

GLAUCIUM. Very showy plants, with quite attractive flowers. Leaves a silvery white, something like the old "Dusty Miller." Fine for edging, masses, vases, ribbon beds. Sow late in winter in the house.

287. *Glauicum Corniculatum*. 10c.

GYPSOPHILA. h.p. Delicate free flowering little plants, covered with a profusion of little star shaped, white blossoms. Well adapted for hanging baskets and edgings, and valuable for bouquets. Handsome specimens dried.

335. *Elegans*. White and pink. 5c.

DOUBLE HOLLYHOCKS.

HOLLYHOCK. h.p. The Hollyhock in its present state of perfection is very unlike its parent of olden time; it now ranks with the Dahlia, Aster, Camellia, etc. For background to a flower garden, perhaps no plant is so useful. The flowers are as double as a rose, of many shades of color, from deep yellow, red, purple, to pure white. Plant the seed in June or July, in open ground, and in the autumn, when the plants have made five leaves, transplant to permanent position, three feet apart. The following summer they will bloom. Each plant should be supported by a stake five feet high.

351. *Double White*. One of the most valuable summer flowers. Pure white and perfectly double. 5c.

352. *Double Yellow*. Comprising the finest shades of yellow. 5c.

353. *Double Crimson*. 5c.

354. *Double Salmon*. 5c.

355. *Double mixed, extra choice*. 5c.

NICOLA
WIDPLE.

DOUBLE AND SINGLE GERANIUMS.

PORTULACA. h.a. A most brilliant and profuse bloomer, perfectly refulgent in bright colors under a drought and on soil where most flowers would perish. The double produces flowers as double as roses and nearly as large.

MYOSOTIS (For-Get-Me-Not). h.p. Flowering the first season, if sowed early, with abundance of white and blue flowers.
445. Blue, 10c. 446. White, 15c. 447. Mixed, 10c.

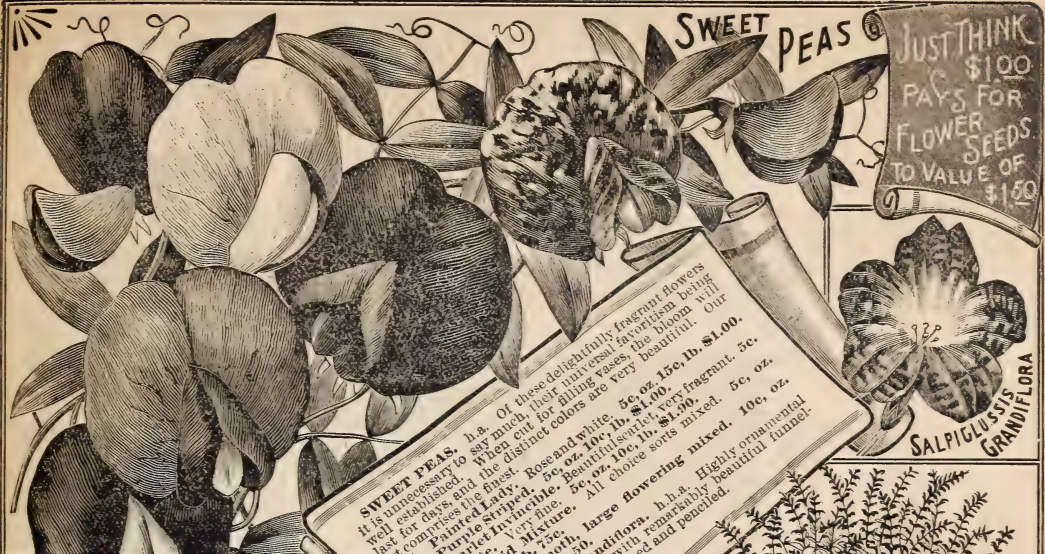

NASTURTIUMS (Tom Thumb Dwarf.) h.a. When planted in poor soil, they flower most profusely, and remain

PHLOX DRUMMONDI. h.a. For a brilliant and constant display, few annuals are better, ranging in color from the purest white to the deepest crimson, and many are marked with a clear eye of peculiar distinctness.

NASTURTUMS - MIXED

SWEET PEAS. h. a. Of these delightfully fragrant flowers it is unnecessary to say much, their universal favoritism being well established. When cut for filling vases, the bouquet will last for days and the most distinct colors are very beautiful. 5c. oz. 15c. lb. \$1.00.

Painted and red. Rose and white. 5c. oz. 15c. lb. \$1.00.

Painted striped. Beautiful variety, very fragrant. 5c. oz. 15c. lb. \$1.00.

Spencer's Vandyke. 5c. oz. 10c. lb. \$1.50.

White. All choice sorts mixed. 10c. oz. 20c. lb. \$1.50.

Strawbed. 5c. lb. 75c.

White. 1 lb. 30c. 5 lb. \$1.50.

4 lb. New Mammoth. Grandissima. h. h. a. Highly ornamental autumn blooming plants, with remarkably beautiful funnel-shaped flowers cutaway margins and penciled.

SALPICAPRIS. All choice sorts mixed. 1 1/2 lb. 5c.

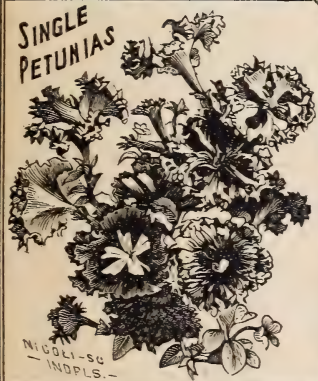

Finest mixed. 1 1/2 lb. 5c.

EVERITT'S MORTGAGE-LIFTING

THERE IS A MORTGAGE HERE

FARM SEEDS

THE MORTGAGE IS PAID OFF HERE

INDIANAPOLIS IS SITUATED IN THE CENTRE OF THE RICHEST AND MOST EXTENSIVE AGRICULTURAL REGION ON THE FACE OF THE GLOBE AND BESIDES IT HAS SHIPPING FACILITIES UNSURPASSED BY ANY OTHER CITY IN THE COUNTRY WE CAN SAVE YOU TIME AND MONEY IF YOU GIVE US YOUR ORDER FOR FARM SEED.

SUFFICIENT attention is not given to farm seeds by the majority of farmers, and by most seedsmen this department is made of secondary importance. This is not as it should be. These are the crops in which the farmer is most interested. **They are money crops.** Success or failure depends on them, hence how important that those varieties be selected that are the most reliable and give the greatest results. As an observing man passes through a farming community, those farmers can be pointed out who are enterprising, wide-awake and progressive. The surroundings are a fair index of the farmer. The experimenting farmer is the most prosperous of all. He recognizes that varieties of grain and vegetables are running out (dying) and that new ones must take their place. He procures seed of all the promising kinds, tests them and selects the best to grow. Thus he always has the best, and all farmers who understand their business know that there is a great difference between the best and the poorest varieties of farm crops. We can help farmers along the road to prosperity if they procure their farm seeds of us. They will **LIFT THE MORTGAGE** and swell the bank account.

Everitt's Mortgage-Lifter Corn.

Reliability is stamped upon every feature of this corn. It is a corn that has not failed to produce a paying crop in the worst corn year we have seen in Indiana in the past six years, and in favorable seasons yields 80 to 120 bushels per acre of the finest yellow corn that ever grew inside of corn husks. We know this corn will please. We will guarantee a rich harvest of the most superior corn that grows if Mortgage-Lifter is planted. It is very early and will mature in northern Ohio, Indiana, Illinois, etc. The grain is very deep, compact and heavy; ears medium to large size; small cob. 70 lbs. of dry corn on the ear, as our seed ears averaged, shelled 62 lbs. of corn, leaving only 8 lbs. of cob. We want every corn grower to plant some of the Mortgage-Lifter corn. If you plant a field of it your profit will be big. If you don't plant much, plant a small lot, a peck or pound, or ear. We are anxious to have every person who raises corn made acquainted with its merit without delay. We know it will do them good, and thus secure to us a friend and customer for O.K. Seeds.

This Mortgage-Lifter corn we introduced first last season. Our sales were large and results beyond the reasonable expectation of parties planting it, as the season was a very trying one and in many cases this was the only variety of corn that made a reasonable yield. We regret exceedingly that we have not space to print some of the reports received. Below is a sample:

Mortgage-Lifter corn I planted May 2d. The season was very dry, but my corn did not mind it and turned out 140 bushels per acre of as nice corn as I ever saw. H. F. STONE, Oakland Co., Mich.

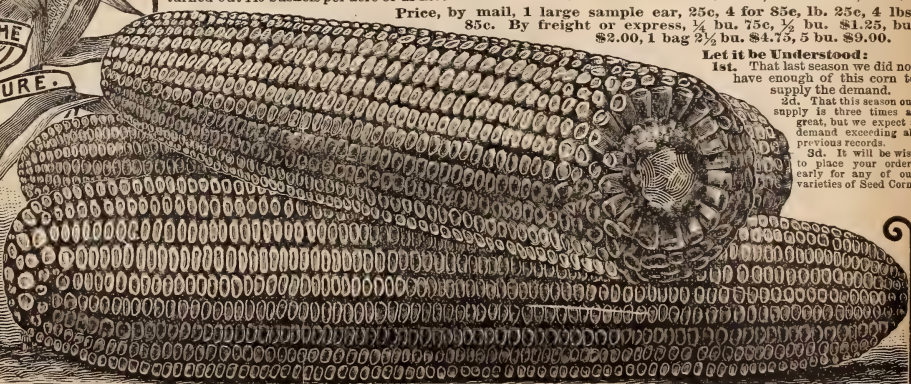

Price, by mail, 1 large sample ear, 25c, 4 for 85c; lb. 25c, 4 lbs. 85c. By freight or express, 1/2 bu. 75c, 1/4 bu. \$1.25, bu. \$2.00, 1 bag 2 1/2 bu. \$4.75, 5 bu. \$9.00.

Let it be Understood:

1st. That last season we did not have enough of this corn to supply the demand.

2d. That this season our supply is three times as great, but we expect a demand exceeding all previous records.

3d. It will be wise to place your orders early for any of our varieties of Seed Corn.

Forsyth's * Favorite * White Dent Corn.

OUR INTRODUCTION OF 1892.

A premium
was awarded
our Forsyth's
White Dent
Corn at the
World's Fair,
1893,
on all points of
excellence.

ON the preceding page we offer a corn that is remarkable in its reliability and is almost certain to bring success, as far as it can be realized in a corn crop, to all who raise it. On the next page we again offer the wonderful **EARLY MASTODON**, of which we sell thousands of bushels annually, and in not one season yet have we had a sufficient supply to meet the demand, while on *this page* your particular attention is asked to the greatest of all white corn, **Forsyth's Favorite White Dent**.

This corn was originated in Johnson County, Ind., in that section known as the Garden Spot of this Great Corn State, and in the few years since its distinct characteristics have been brought out, it has made both a local and national reputation. It is conceded to be the *largest eared* and *deepest grained* early white corn ever seen in this market. Local enthusiasts are arranging to exhibit a car-load of the corn in the East to direct the attention of farmers, capitalists and others to the great crops produced by Indiana. It was awarded high prize at the World's Fair in 1893. All who see it proclaim it a king in the great corn family, and our customers may consider themselves fortunate in having the opportunity offered to secure some seed of this grand variety.

In describing this corn we must speak of the size of the ears as mammoth, being 8 to 15 inches long, with grains averaging about $\frac{1}{4}$ inch long, and sometimes contain grains $\frac{1}{2}$ inch in length. The number of rows on a cob range from 16 to 24, and ears containing 1,500 to 2,000 grains are quite common. Grains pure white, cob white and usually hollow at butt end, which allows the ear to dry out quickly, and enables the grower to crib this corn before smaller varieties are fit. We recommend it for this latitude and all points South, and it can be grown 100 miles North by selecting ground that will admit of early planting. The following well-known farmers of Johnson County attest to the grand properties of this corn, and say it can be cribbed ahead of any of their common field corn, and also that it yields enormously. M. V. Kindle, D. M. Forsyth, W. S. Core, J. S. Mountz, J. T. Walker, A. V. Pendleton, Geo. H. Pendleton, Edward Alexander, etc., etc.

We have sold this corn two seasons with the most flattering results. It has become a great favorite. Our crop this year is exceptionally fine and notwithstanding the unfavorable season, is thoroughly matured. We have a large part of our seed in ears, and propose while these last, to put a sample ear in each order for $\frac{1}{4}$ bushel or more of shelled corn. Also we will send ears by mail, so the purchaser can see what fine corn it is before planting.

See price below, which is very reasonable. We have space for only a few reports:

"I am very much pleased with the Forsyth Favorite Corn. It is the largest corn I ever grew, and withal, is as early as my smaller eared varieties. It is a great money-making corn."

"As is usual with your seeds I found the Forsyth Favorite Corn sustained the high recommendation you gave it. I am sure my trial plot yielded 150 bushels per acre of the finest corn I ever saw."

"For the Forsyth Favorite White Dent Corn I must say, without boasting, that it is by far the finest I ever raised in my farming experience of 12 years, and I have planted nearly every kind. I will plant no other in the future."

"Forsyth Favorite White Dent is the largest, heaviest and best Corn I ever saw. On a test 52 ears weighed 704 pounds; the cob weighed 114 lbs. JOHN WAGGONER, Lincoln Co., Ky. 30 acres of Forsyth Favorite Corn yielded 2,730 bushels of as fine corn as ever grew. The like was never seen before in all this section."

C. F. PENDLETON,
Hardin Co., Iowa.

O.K. SEEDS
Make it
Money

FOR AN ENORMOUS CROP PLANT OUR SEED CORN

PRICE. By mail, post paid: 1 ear weighing 1 to $1\frac{3}{4}$ lb. and containing 1,000 to 2,000 grains, which will raise about 20 bushels of corn, 30c, 4 such ears for \$1.00. Those who order first will get the largest ears. 1 lb. shelled 25c, 4 lbs. 85c. By freight or express: $\frac{1}{4}$ bu. 75c, $\frac{1}{2}$ bu. \$1.25, bu. \$2.00, 1 bag $2\frac{1}{2}$ bus. \$4.75, 5 bus. \$9.00.

The price of this seed should not deter any farmer, who wants to be abreast of the times, from getting a start at once.

STILL IN THE FRONT RANK.

The Wonderful Early Mastodon Corn

Thousands of bushels in stock. Notice the low price. You can not save your own seed for this money. What's the use of hoarding? Get new seed. New blood. Bigger crops.

All who have tested the Early Mastodon Corn pronounce it the most valuable Yellow Dent corn, of strongest growth, longest grain, largest ears, smallest cob, quickest to ear and ripen, finest fodder, and most productive variety they ever raised. In short, we are fully convinced that if its merits were known by all corn-growers, there would be such a demand for seed that no six counties in the famous corn State of Indiana could grow enough seed to supply the demand. Every corn-grower should get enough to plant a field or more, and thus get a variety of corn that will enormously increase his crop, and correspondingly increase his profits. Many bushels of Mastodon Corn can be sold in every neighborhood for seed at a large price until all are supplied. We never before had such uniformly favorable reports for anything we sold. The growers can not praise this corn, the greatest novelty of the age in the corn line, sufficiently.

Color yellow. Read a few reports:

"I am well pleased with the Early Mastodon Corn. It was cut down by the frost the 24th of May, but came on strong, and yielded 75 bu. shelled corn per acre. M. BURNS, Darke Co., O."

"The Mastodon Corn is a marvel of the age. It is the finest corn I ever saw. I can not use words to praise it enough. It is the largest, deepest grained and best of all large field corns, and the earliest I ever saw. It is all you claim for it. All the neighbors want it. I will give you a few words from men of experience who have been at my farm and seen the corn." E. W. HARRIS, Custer Co., Neb.

"J. L. H. KNIGHT says: 'It snows under the Mammoth Cuban, Killey's Favorite, Chester County Mammoth, Leaming, and all the corn I ever saw. Save me eight bushels for seed.'

"A. H. CORSEY, an extensive stock-grower, says: 'The Mastodon is a marvel. It is surely perfection. Save me ten bushels for seed.'

"F. D. MILLS says: 'Wonders will never cease. Mastodon takes the cake. I want six bushels for seed.'

"W. H. CRAMER, Superintendent of Agriculture, at State Fair, says: 'The Mastodon Corn was the first thing that caught the eyes of the farmers. It walked off with the prize. I want ten bushels for seed.'

"FRANK BERGER says: 'Send me nine bushels of that Mastodon Corn. It just caps the climax.'

"WM. MURRAY says: 'Save me eight bushels of that seed. It's the finest corn I ever saw.'

"I could send you dozens of such testimonials, but think the above enough. Yours, E. E. HARRIS, Custer Co., Neb."

"I am selling seed of your Mastodon Corn at \$3.00 per bu. It is the strongest grower I ever saw. Ears quick; wonderful yield; fine fodder; perfect corn; ears eleven inches long. E. A. WOODARD, Rock Co., Wisconsin."

"I must say, without boasting, that the Mastodon Corn is by far the finest I ever raised. I have been farming for 25 years, and have planted many different sorts of corn, but the Mastodon excels them all. It has the largest, finest and heaviest ears, and every stalk has an ear, no matter how small the stalk. Had I planted all my ground last spring with Mastodon I would have twice as much corn, as the Mastodon yielded just twice as much to the acre. I will plant no other in the future."

Yours, Lewis C. FRIEDEL, Fairfield Co., O."

"Raised 151 bushels of Mastodon Corn on one acre on black, rich, loam land; hills 3 x 3 feet. GEO. CARTER, Pawnee Co., Neb."

"Mastodon is best I ever saw. W. O. DAVIS, Rock Island Co., Ill."

"Mastodon Corn gives good satisfaction. I think the yield will exceed any other in this neighborhood. Will exhibit at the fair. WM. ELWELL, Columbia Co., Pa."

PRICE. When the time and labor of selecting and preparing seed corn, and the expense of advertising are considered, our price is very reasonable. Yet, with this corn, price should be no object, as you had better pay \$50 a bushel for seed of the Mastodon than plant ordinary kinds at market price. Here is a chance to make farming pay.

By mail, post paid, 1 large sample ear 25c, 5 for \$1.00; 1 lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, 1 bu. \$1.75, 1 bag (2½ bu.) \$4.00, 5 bu. or more at \$1.50 per bu.

If you plant this corn you are almost certain to get ½ more to twice as much as ordinary corn will make. Just calculate your profit on this basis. See other wonderful varieties on preceding pages.

THIS FIELD IS GOOD FOR 150 BUS. PER ACRE.

"I have grown nearly all of the improved high-bred corn, and find Early Mastodon the most wonderful of all, and the handsomest. It grows quick, strong and powerful, has broad, heavy leaves, and large 20 to 36-row ears; ears generally 9 to 11 inches long; grains longer than any other variety. Many stalks bear three to five large ears. Some ears weigh two pounds each, and contain 1,600 grains. The yield was 191 bushels of dry shelled corn to an acre. ALFRED ROSE, Yates Co., N. Y."

"Mastodon Corn planted May 1. August 1, corn was hard and sound. Many ears a foot long. Other kinds not half a crop. AMASA FOX, Labette Co., Kas."

"Planted Mastodon Corn last May. It stood the drought remarkably well, and is extra early. I selected a wagon load of fine seed ears from eight rows forty rods long. Other corn, planted at same time, not half a crop. LEVI KENDALL, Hamilton Co., Ind."

First Premium White Dent CORN

ALWAYS A PREMIUM

Our newest introduction in the corn line, we offer you on this page. Our artist has tried to faithfully portray the beauty of this grand variety and to a great extent has succeeded. The large ear is a fair representation of an ear 11 inches long reduced in size. The inches as planted are 11-16 of actual length, hence the ear is only 11-16 of actual length. The hill of corn will show style of growth, and with the man to serve as a basis for comparison, a very clear idea can be had of this corn as it grows in the field. It originated with the Champion Corn Grower, Lee Trout of Johnson County, who has been regularly excelling all his wide awake neighbors in that famous County, in his corn product. We name it First Premium, because of the fact that it has been awarded highest honors wherever exhibited. It is a pure ivory white corn on a white cob. Ears grow larger and not so thick as our Forsyth Favorite and grains do not average quite so long. The grains are of fine texture, smooth, compact, sound and heavy. Its purity in color adapts it for making White Meal and other corn products. Matures in 100 to 110 days, is finely adapted to all sections, south of a line 75 miles north of Indianapolis, and will give all growers great satisfaction in quality and productiveness. The names signed to the reports we publish below are among the wealthiest and most influential men in the neighborhood where this corn originated. All complete addresses are on file in our office.

"I recommend F. P. W. D. corn to all farmers as one of the best varieties of white corn in this state."
S. N. CLEMENS.

"In the lead of all white corn in my county."
MOUNT BRANIGAN.

"I cheerfully recommend F. P. W. D. Corn to any farmer in Indiana or any other state as one of the most productive varieties that can be grown in this country."
SCOTT CURRY.

The prize of \$5.00 offered for the best 12 ears of corn raised in Johnson Co. was awarded to First Premium White Dent.

The prize of \$5.00 offered for the best 12 ears of corn raised in Marion, Johnson and Shelby Counties was awarded to First Premium White Dent.

"I planted 15 acres of F. P. W. D. Corn last spring and harvested 1,200 bushels. The season was very dry and would have yielded much more. It matures early."
C. H. AILE.

"This is to certify that I, I. Ray, was expert judge at Indiana State Fair, in 1892, and that I awarded to Lee Trout the first premium on his white corn shown against 20 competitors."
I. RAY,

Judge of Farm and Garden Products.

We copy newspaper reports as follows:

"Wednesday L. Trout placed at exhibition at the drug store three ears of his F. P. W. D. Corn that caught the climax for anything of the kind shown here this fall. The 3 ears weighed 6¼ lbs. and the longest 13 ins." Green-wood.

A variety of Corn that has taken the
First Premium
wherever exhibited is good enough to plant.

INTRODUCED BY J. A. EVERITT, SEEDSMAN, INDIANAPOLIS, IND.

FIRST PREMIUM WHITE DENT CORN.

ALWAYS AWARDED FIRST PREMIUM WHEREVER EXHIBITED

FOR PROGRESSIVE FARMERS

"A dozen ears of the famous F. P. W. D. Corn are on exhibition here. They are extra fine. The yield was 60 bus. per acre, and if the season had not been so fearfully dry, would have been over 100 bus. per acre. This corn was awarded first premium at the State Fair; also first at a number of county fairs and corn contests."
Edinburg, —

PRICE When it is considered that ¼ bu. of this pure thoroughbred corn will plant about 2 acres and that these 2 acres will yield 50 to 100 bus. more than corn that we know is usually raised, the price we ask should not be considered. A moderate investment will pay a bigger dividend than farming usually returns. By mail, 1 large sample ear 50c; 1 lb. shelled 50c. 2½ lbs. \$1.00, 4 lbs. \$1.50 (4 lbs. will plant ½ an acre). By freight or express, ¼ bu. \$1.00, 1 bu. \$3.50, 1 bag (2½ bu.) \$7.00.

SPECIAL For \$1.00 we will send by mail 1 ear of each, or 1 lb. shelled of our 4 great varieties. For \$2.25 we will send ¼ bu. of each, fr. or ex

NICOLL & WOLFE

ENGRAVED FOR

A NUMBER OF GOOD THINGS ARE LISTED ON THIS PAGE.

BAGS FREE AT PRICES QUOTED.

New Evergreen BROOM CORN.

There is a great demand for Broom Corn and we recommend farmers to plant some, even if no more than one acre. It is a paying crop, as big prices are paid for the brush, besides the seed is equal to oats for feed. Plant in drills, so it can be worked with cultivator.

the slightest reddish tinge. It makes by far the best brooms of any other grown; height, 7 to 8 feet. **Pkt. 10c, lb. 40c by mail. Peck \$1.00, bu. \$3.00.**

SUGAR CANE—Early Amber—The most valuable variety for general cultivation, ripening as far North as Minnesota; very rich in saccharine matter, highly prized for sugar and syrup-making purposes. It will also yield heavy crops of seed, which is excellent for feeding poultry, swine or cattle. **Pkt. 10c, lb. 25c, 4 lbs. 80c, by mail. By freight or express, peck 75c, bu. \$2.50.**

Early Orange—A later variety, suitable for the South or lower Middle and Western States; requires a longer season to ripen; much larger and ranker in growth. Price the same as Early Amber.

JAPANESE BUCKWHEAT—This variety is now well established and it is conceded by all who have grown it, that it yields twice as much as any other variety. Has grains twice as large. Is much earlier and equals the best for flour. We sell very large quantities of the Japanese Buckwheat, and our experience has been so satisfactory that we can unhesitatingly advise every person who contemplates raising Buckwheat to procure this variety to sow. **Pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 50c, bu. \$1.50, 5 lbs. or more, \$1.25 per bushel.**

Silver Hull—The next best variety. Price the same as Japanese.

MANSBURY BARLEY—Six-rowed, straw bright and very strong; does not lodge on rich ground; heads are long and drooping. Recommended by the Iowa Agricultural Experimental Station as the only variety suitable to grow in that State, and is equally valuable elsewhere. By mail, lb. 25c, 4 lbs. 85c. By freight or express, ¼ bu. 50c, bu. \$1.25, 5 lbs. or more, \$1.00 per bushel.

FLAX SEED—For sowing. By mail, lb. 30c, 4 lbs. \$1.00. By freight or express, 15c per pound.

MILLET—German, or Golden Millet—The best variety and largely grown wherever its value is known. It helps out wonderfully when a short crop is threatened, and produce 2 to 3 times as much hay per acre as timothy or clover. Three to five feet high. Sow broadcast, 1 bushel to the acre for hay; ½ bushel if for seed, from May 1st to August 1st. **Pkt. 10c, lb. 20c, 4 lbs. 75c. By freight or express, ¼ bu. 35c, ½ bu. 65c, bu. \$1.35.**

Hungarian Millet—Early; height two to three feet; abundant foliage and slender head; withstands drought; yields well. (Price same as German Millet.)

ENSILAGE CORN.

Corn for ensilage or fodder purposes is in great demand in all dairy districts. What we offer can be relied upon for quick growth, big yields and nutritious qualities. We ship largely to all parts of the country.

Red Cob Ensilage—This superior ensilage corn we can fully recommend from experience as being the heaviest cropping variety in cultivation, producing 50 to 75 tons per acre. A pure white dent corn, of large size and handsome appearance. The fodder is sweet, tender, juicy. By mail, lb. 25c, 4 lbs. \$1.00, peck 50c, bu. \$1.50, 10 lbs. and over, \$1.35 per bushel.

Early Yellow Ensilage—This is a very early variety of corn; very leafy, fair stalk, and the best to plant early for early use, or late as a second crop on vacant ground; can be planted as late as July 1st. Price same as above.

Correspond with us for price of large quantities of Ensilage Corn.

SPRING VETCHES—or Tares—Sow on rich, well prepared soil. Is excellent, either for feeding in green state or dried like hay. When allowed to ripen, the pea-shaped kernels furnish an excellent fattening food; a good substitute for corn. When grown for hay, it is sown as late as July, with oats, and both together are relished by stock. Grown for the grain, sow in April. A splendid plant, especially for hogs to feed and fatten on. Sow 1½ bu. per acre, broadcast. By mail, pkt. 10c, lb. 25c, 4 lbs. 85c. By freight or express, ¼ bu. \$1.00, bu. \$3.00.

FIELD PEAS—Many of the first farmers of the West are planting peas as a stock fattener, especially so for hogs. They are equal to the best corn for this purpose. Sow at the rate of 2 bus. per acre, broadcast. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, ½ bu. 50c, bu. \$1.75, 2½ bus. \$4.00.

YELLOW MILLO MAIZE—A tall plant growing 9 to 12 feet, stooping from the ground. It sends out shoots also from the joints. It has all the vigor and vitality of other Sorghums. It is non-saccharine; useful for the large amount of foliage, green feed or cured fodder that it furnishes, and for its grain. Earlier than the White Branching variety. Sow 10 lbs. per acre. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, 10c, per lb.

KAFFIR CORN—One of the best things offered of late years for a forage plant. The heads contain small white seeds which make an excellent flour. They are greedily eaten by horses and cattle, and make excellent food for poultry. The foliage and stalks make excellent forage. Cultivate same as common corn, 4 or 5 pounds of seed per acre. By mail, pkt. 5c, lb. 25c, 4 lbs. 75c. By express, lb. 10c.

TEOSINTE—A most prolific forage plant. Resembles corn, but the leaves are much longer and broader. The stalk is very nutritious. It can be cut several times during the season, yielding enormously. The warmer the climate the better it yields. Plant when the soil is perfectly warm in spring. Four pounds of seed per acre. In drills 3 feet apart and 2 or 3 seeds every 12 inches in drill, 3 lbs. per acre. **Pkt. 10c, ¼ lb. 30c, lb. \$1.00, by mail.**

RILEY'S FAVORITE YELLOW DENT CORN—A cross between the Golden Yellow and pride of the North, the result of years of improvements and selections by one of the best seed-growers in the State of Indiana. The large number of premiums it has taken at the leading fairs proves it to be a very superior variety. It took the first premium for Yellow Dent Corn at the Great Corn Show at Chicago in 1886, where it had 150 entries from 15 different States to compete against, and was awarded a high premium at the World's Fair. It is a bright yellow corn; ears of medium size and even thickness from butt to tip. Cobs small, Red. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 65c, bu. \$2.00, 2 bus. or more at \$1.75.

Improved Leaming—A popular variety which has given general satisfaction. A strong and vigorous grower. Stalks heavy and leafy, often bearing two fine ears. Grain yellow, deep and solid, set on a small cob. Very early and valuable for the North and for second planting. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 65c, bu. \$1.50, 2 bus. at \$1.40 per bu.

Pride of the North—Adapted to the North, where an early maturing sort is needed. Ears medium size, 16 rows, deep, bright yellow grains. We recommend it highly for northern sections and for late planting elsewhere. By mail, lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 65c, bu. \$1.50, 2 bus. at \$1.40 per bu.

Riley's Favorite Corn.

German, or Golden Millet.

Yellow Millo Maize.

Teosinte.

WE BUY, CLEAN AND SELL LARGE QUANTITIES OF GRASS AND CLOVER SEED. IF YOU WANT TO BUY, LET OUR PRICES. IF YOU HAVE A CROP TO SELL, SEND US SAMPLES, AND GET OUR OFFER.

Our Cleaning Department has been removed to the fifth story of our building, and by the additions of elevators, bins, etc., and the most perfect cleaning apparatus, we can now clean 4,000 bushels of Wheat, Oats and Grass Seed daily. There is not another general seed house in the country possessing few enjoy such a trade as we are favored with.

GRASS IS KING.

OUR most successful farmers are those who possess large meadows of a high quality of grasses. The low price of grain falls to net satisfactory returns. Stock growing is far more profitable, and by the opening up of extensive foreign markets is not likely soon to be overdone. Hence, seed more ground to meadows. Raise more stock.

THE ATTENTION

Of careful farmers is directed to our "Highest Quality" and "Select Quality" Grass and Clover Seed as listed below. The apparent cost is higher than ordinary seed. The true cost is lower. You don't pay for something you don't want—in fact, are much better off without.

WEED SEEDS

Cost money when you buy them in your grass and clover seed, but the greatest cost is what they do to you. The value of your hay crop and in getting rid of them when once introduced on your farm. Each year our farms are getting more foul with weeds, and the seeds we sow are mainly instrumental in introducing the pests. It is a fact attested by the weeds that grow more rapidly than do the cultivated crops, hence great care should be exercised that no foul seeds are sown. To make seed clean occasions some waste, which, added to the labor, compels us to sell our "Highest Quality" and "Select Quality" strains at an advance over market price. The cost, however, is slight as compared with the results you obtain. To illustrate: In seeds commonly sold, you pay for the weed seed at the same rate as the pure seed. The resulting crop is discounted on account of the presence of weeds, while to get rid of the pests on your farm will require much labor and expenditure of money. The best seeds produce the best hay, for which the highest market price is realized. Weeds reduce the value of hay, besides exhaust your land.

"HIGHEST QUALITY"

Clover (embracing Medium Mammoth, White Alsike, Lucerne and Scarlet) and Grass Seeds, such as Timothy, Red Top, Hungarian and Millet Seed, is produced by taking only the choicest select crops which show the greatest degree of perfection in size and color of grain and putting them through our cleaning and purifying process, which makes the "Highest Quality" of seed known.

"SELECT QUALITY"

Clover and Grass Seed of varieties named above is as free from weed seeds as our "Highest Quality," but lacks slightly in size and color of the grain. It is far superior to the regular commercial grades. Besides our special grades we also supply the regular commercial grades of prime seed at prices first quoted for each article. All prices of Grass and Clover Seed are subject to change of the market. The prices quoted below are valid on day of closing this catalogue. We sell $\frac{1}{2}$ and $\frac{1}{4}$ bu. at bu. rates.

CLOVER SEED.

Price Liable to Vary.
Bags, extra for each $2\frac{1}{2}$ bushels, 18c each.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

COMMON OR MEDIUM RED CLOVER—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$6.00. Select Quality, bu. \$6.25; Highest Quality, bu. \$6.50.

MAMMOTH CLOVER. (Pea Vine or English). Like common or medium clover, but of larger growth. Largely grown. Of great value to sow on exhausted land. For hay, we recommend sowing a mixture of this and common clover. Much used for green manuring. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$6.25. Select Quality, bu. \$6.50. Highest Quality, bu. \$6.75.

ALSIKE. (*Trifolium hybridum*). This clover is deservedly in repute as one of the best perennial clovers, and is well adapted to this country. From the results of experiments, it is found to thrive on soils which are termed by farmers "clover sick." For this quality, especially, it has proved a valuable acquisition, and is now generally approved of in all mixtures of grasses and clovers. Should be more generally grown. Sow in spring same as common clover. It will stand for years. Seed weighs 60 lbs. per bushel and is very small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 45c, 4 lbs. \$1.50. By freight or express, bu. \$10.00. Select Quality, bu. \$10.50; Highest Quality, bu. \$11.00.

CLERE OR LALFA CLOVER—Lucerne should not be sown on hard, compact soil, or with hard sub-soil, but on sandy, open or porous soil. Even where no other crop will grow, it finds its natural home, and yields enormously. The great value of Lucerne is in its enormous yield of sweet and nutritious forage, which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry sections, and on poor, light and sandy land, where no other grasses can be grown, for it sends its roots down to enormous depths, they having been found in sandy soil seventeen feet long. Sow about 15 lbs. per acre in March or April. It can be cut three times in a season, and will produce magnificent crops for 10 to 15 years without renewing. 60 lbs. per bu. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$7.00; Select Quality, \$7.50; Highest Quality, \$8.00.

SCARLET CLOVER. (*Trifolium incarnatum*). An annual, and should be sown in July, August or September for best results, when it will make abundant pasture in the fall, winter and spring. It can be cut for hay in this latitude about May 1st, or at maturity about May 15th. It is the most rapid grower of all the varieties of clover, and unequalled as a soil enricher. If sown in the spring it will afford good pasture, but will not produce seed. We highly recommend it. By mail, pkt. 10c, lb. 40c, 4 lbs. \$1.25. By freight or express, bu. \$5.00. Select Quality \$5.25, Highest Quality \$5.50. Weight, 60 lbs. to bu.; sow 10 lbs. per acre.

SAINFOIN CLOVER—This is a land-enriching, heat-resisting, luxuriant clover, that will do well North or South, but is of peculiar value where other varieties of clover fail to stand on account of heat or drought. Great dependence is placed on Sainfoin in many parts of Europe, where it is extensively grown, and cases are on record where it has improved worn out lands, and put them in condition to raise the finest crops. On poor, sandy land it thrives and yields 2 to 3 tons of cured hay per acre. The stand improves with age. Can be sown with barley or oats. Grows 2 to 3 feet high, with roots penetrating to a great depth. Weight, 26 lbs. per bushel. Seeds are large and enclosed in a shell or hull. Should be covered lightly when sown. Sow 2 to 3 lbs. per acre. By mail, Pkt. 10c, lb. 35c, 4 lbs. 75c. By freight or express, bu. \$3.00.

GRASS SEED.

Price Liable to Vary.
Bags, extra for each $2\frac{1}{2}$ bushels, 18c each.
1 to 4 lbs. are prepaid by mail. Larger quantities by freight or express.

TIMOTHY. (*Phleum Pratense*). This is decidedly the best grass for hay, making a large return of strong, rich hay. Though somewhat coarse and hard, especially if allowed to ripen its seed, yet, if cut in the blossom, or directly after, is greatly relished by all kinds of stock, and especially so by horses, while it possesses a large percentage of nutritive matter in comparison with other agricultural grasses. It grows very rapidly, and yield very large crops on favorable soils. 45 lbs. to bushel. Sow 6 to 8 quarts, spring or fall, to acre. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c. By freight or express, bu. \$2.10. Select Quality, bu. \$2.20; Highest Quality, bu. \$2.30.

KENTUCKY BLUE GRASS. (*Poa Pratensis*). This is known in some sections as "June Grass." It is the best pasture for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle; retains its qualities to a late period in winter, and further South affording abundant food throughout the winter. Sow early in the spring or fall, 1 to 2 bus. per acre. Extra Cleaned, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. \$1.25. Weight, 14 lbs. per bushel. Select Quality, bu. \$1.35; Highest Quality, bu. \$1.50.

ORCHARD GRASS. (*Dactylis Glomerata*). This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining later in autumn than any other. It grows about $2\frac{1}{2}$ feet high, producing an immense quantity of leaves and foliage. Blooms with red clover, and making with it an admirable hay. It is well adapted for sowing under trees in orchards, and very valuable either for grazing or for hay. 14 lbs. per bushel. Sow $1\frac{1}{2}$ to 2 bus. to acre, either fall or spring. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. \$1.50. Highest Quality, bu. \$1.75.

RED TOP. (*Agrostis Vulgaris*). A valuable grass for moist soils and low lands. It is a good, permanent grass, standing our climate as well as any other, and consequently well suited to our pastures, in which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor, gravelly soil, about half that height. 14 lbs. to bushel. Sow 2 bus. to acre, fall or spring. By mail, pkt. 10c, lb. 25c, 4 lbs. 75c, bu. 65c. Highest Quality, bu. 75c.

QUICK GROWING LAWN GRASS

Fine lawns, grass patches or grass borders, add to the beauty of a place almost or quite as much as flowers. In fact, a certain amount of good grass is essential to the proper display of flower beds and borders. The next important thing to good grass sward is to get it quick. We have prepared a grass mixture which will give a good sward the first year. It is the finest and quickest growing lawn grass ever sent out, and will give the greatest satisfaction. Sow early in the fall or spring. Qt. 20c, peck \$1.50, post paid. By express, peck \$1.00, bu. \$3.00.

On the day of closing this Catalogue, we quote from a Boston paper as follows: "The following quotations are Boston seedsmen's selling prices: Timothy \$2.75, Red Clover \$7.50."

This shows about the regular prevailing difference in prices. Eastern farmers can usually get their seed cheaper of us freight added, than buy it in the Eastern market.

CALGARRY
GRAY OATS

RED
RUST-PROOF
OATS

THESE TWO VARIETIES OF OATS RIPPEN EARLIEST, YIELDED HEAVIEST AND CONTAINED LARGEST PERCENTAGE OF KERNEL IN BERRY AMONG TO VARIETIES TESTED AT THE ILL. EXPERIMENT STATION.

1 WHITE. 1 RED. 1 GRAY.

(See next page.)

These are the most reliable varieties of Oats in the country. The earliest, Rust-Proof stand up best. The most productive. The best feeders.

Any farmer can afford to sow his entire crop of these reliable sorts, but if he will not, then don't fail to sow a bushel or bag of each, and raise seed for next year.

We control the entire supply of these Red and Gray Oats. Start right by getting the genuine of us.

CALGARRY GRAY OATS.

This extremely early, extra heavy, very productive Rust-Proof variety of oats was produced by crossing the Prince Edwards Island Black and the White Russian; producing a beautiful brownish gray oats; a decided new strain of this important cereal. They are very beautiful in growth and grain. The grain shining like polished metal, or as one of our friends expressed himself, "They are as fine as silk." The type is well fixed and combines all the desirable qualities as weight of grain, earliness, rust-proof, great strength of straw and feeding qualities. Careful feeders of horses know that in feeding whole grain oats much depends upon the nature of the hull or chaff. A rough, gritty chaff acts upon the stomach of a horse so as to expel much of the grain undigested. The hull of Calgarry is soft and fine in texture, which combined with a larger percentage of kernel to berry than any other makes it the best feeding oats in cultivation. The Calgarry Gray Oats grow very dwarf, even on strong ground; seldom exceeding 3 feet in length, while 2½ feet is about the average length. This is a great point for those farmers who have rich ground. Nothing short of a moderate cyclone will put them down. They ripen the earliest of all. These oats can be put in a shock before a Welcome Bonanza.

White Russian, etc., turn yellow. This quality of itself is sufficient recommendation to

place them ahead of any other variety, as by their early maturity they escape the hot sun, dry weather, storms and rust that prevail about the time ordinary sorts mature. In the important matter of productiveness they have out-yielded all other sorts where placed in competition in experiments and in ordinary field culture.

The extracts from reports of the Illinois Agricultural Experiment Station, given below, will be very interesting and speak volumes.

RED RUST-PROOF OATS.

While red oats are not so desirable for fancy markets as the white oats, yet the first consideration with the grower should be, can I raise them with more profit if they do not bring within a cent or two of the top price on market? The great yielding propensities of these varieties and entire reliability will warrant extensive cultivation. At the Illinois Agricultural Experiment Station they have been their best variety for several years, and only yield their place to our Calgarry Gray. These oats are very early, rust-proof, do well on thin ground or do not lodge if grown on rich ground; are very heavy, weighing over 40 pounds per bushel; only excelled for feeding by our Calgarry and in productiveness are entirely reliable and immense. They will bear bad treatment or a bad season and still make a crop. In

ENGRAVED FOR J. LEVITT SEEDSMAN

fact, are a rough and ready sort and will be grown by every farmer if he knew what true genuine merit they possess. The straw, which always remains bright and clean; the heads, which are magnificent in length and the grains, which are twice the size of ordinary oats, indicate their vigor and productiveness. We sold them last season in all parts of the country with the best of results to the planters. Our seed of this variety is all grown in Michigan.

Extracts, from Illinois Experiment Station Report.

Yield, per acre, Calgarry Gray, 54.5 bushels; Red Rust-Proof, 56.3.
Ripe, Calgarry Gray, July 25; Red Rust-Proof, July 31.
Per cent. of kernel in berry, Calgarry Gray, 77.43.
Per cent. of kernel in berry, Red Rust-Proof, 74.13.
In the experiments, the above varieties led in the particular points mentioned and bear the relation to each other, as shown; the number of varieties tested was 59. The average yield was 39.8. The average per cent. of kernel to berry was 69.57.

"I think the Calgarry Gray Oats are superior to any

other oats I ever raised. They excel in yield other kinds 10 to 15 bushels per acre. Extra early and my crop weighs 42 pounds per bushel, struck measure. They stand up best and mature plump and heavy under the hottest sun, where other oats are killed."

"The fame of the Calgarry Oats having spread to my neighborhood, I took pains to test them, and I am happy to be able to say that the results have more than equalled the recommendation given them. They mature earlier and excel in productiveness and quality any kind that I have heretofore grown."

P. TRAVIS, Barry Co., Mich.

"I take great pleasure in testifying to the merits of the Calgarry Gray Oats. I find them to be free from rust, of great weight of grain, straw very strong and are a long ways the best feeding oats I have ever known. Extremely early; in fact, the earliest oats I ever grew."

FRANK L. SHIMMER, Ford Co., Ill.

"I have noted the growth of the Calgarry Gray Oats for several years and they possess qualities that would recommend them to farmers. Being very early to ripen, free from rust, not liable to lodge, besides yielding more bushels to the acre, and a great weight per bushel than ordinary white oats as grown. All tests

of these oats in this locality, have, to my knowledge, proved satisfactory." W. A. BUCKET, Ford Co., Ill.

PRICE OF CALGARRY GRAY OATS.

Remember these are a distinct strain of oats. They will be sought after for seed purposes and we will not be surprised if they make the greatest stir among seedsmen and oat raisers known since the introduction of the Welcome Oats, a number of years ago. By mail, 1 lb. 30c, 4 lbs. \$1.00. By freight or express, 1 bu. 50c, 1/2 bu. \$1.00; 1 1/2 bu. for 1 acre, \$2.50; per bag of 3 bus. for 2 acres, \$4.50.

PRICE OF RED RUST-PROOF OATS.

The reliability and desirability of these oats, if understood, would bring them immediately into general cultivation. Our price is very low, to suit the times. By mail, 1 lb. 25c, 4 lbs. 75c. By freight or express, 1 lb. 30c, 4 lbs. 1.00; 1 bu. 55c; 1 1/2 bu. for 1 acre, \$3.75; per bag of 3 bus. for 2 acres, \$3.25.

SPECIAL OFFER We want farmers to experiment. We want them to know what is the most profitable variety of oats to grow. Therefore we will send 1 1/2 bu. of each of our three great specialties of oats for \$4.00, worth \$6.00, or 1 bag, 3 bus. of each, for \$10.00, worth \$11.00.

Yield over
100 Bus. per acre.

EVERITT'S WHITE
SUPERIOR SCOTCH OATS.

Introduced
1892

EVERITT'S WHITE SUPERIOR SCOTCH OATS.

The Heaviest Variety of Oats Ever Sold in the United States.
Choice Cleaned Crops Weigh 51 lbs. to the Measured Bushel.

Compare this weight with common oats at 32 pounds, and oftentimes less. Why grow chaff and straw mainly, when with this variety you get plump, heavy grain that makes muscle, bone and fat, when fed to your stock? Here's a chance to make farming pay.

EVERITT'S WHITE SUPERIOR SCOTCH OATS—Surpasses all others in heavy weight, thin hull, shortness and plumpness of grain, strength of straw and productiveness. In short, they are the most profitable for farmers to grow and merchants to handle. Their productiveness, weight, and fine qualities place them at the head of the list. They ripen evenly and very early, and notwithstanding they bear a very large, spreading head, filled completely with the plump grains almost as heavy as wheat, they stand up stiff and straight until fully matured. Their strong straw adapts them to rich bottom ground, where common oats will fall down and waste. One of our growers reports a yield of 151½ bus. per acre, actual weight. These are the oats we offer you, and when you see them you will not be surprised that such enormous yields are possible. Ground that will yield 50 bus. of common oats as usually grown will yield 100 bus. of these.

The following truthful, responsible farmers, who live in the neighborhood where our crops were grown, endorse them as being very early, with stiff straw, extremely heavy and productive, and altogether a profitable variety to grow: Demas Bricker, Louis Fitzenburg, Chas. H. Coe, Col. I. P. Larimore, J. R. Headington, Ephraim Daily, Samuel Morey, Wm. Matton, Chas. Twining, L. S. Hall, J. G. Case, and E. W. Hawkins. These farmers all live in Knox County, Ohio, and would not misrepresent an article, but add their names and testimony to these fine oats as evidence of their worth, and with the hope that their brother farmers will profit by their observations. They were exhibited at the Hartford (O.) Fair under the name of "Everitt Oats," and received the first premium, and a special recommendation for their fine quality and great weight by the Committee on Farm Grains. Committeemen—Wm. H. Perkins, Geo. N. Jackson, A. K. Sutton.

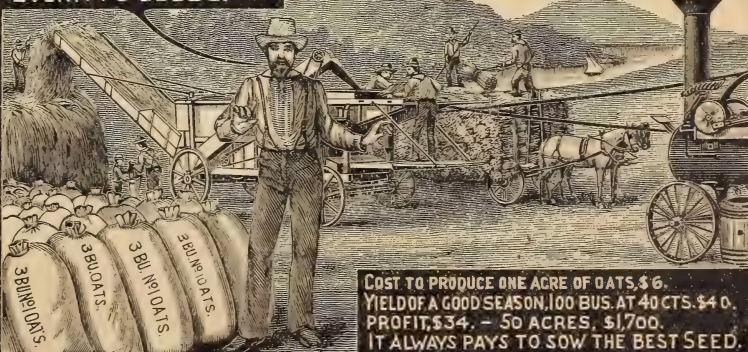

GEO. W. MEYERS, who has threshed grain for thirty years, says: "The White Superior Scotch Oats have a good straw, ripen even and very early. For yield, weight and quality they are superior to any other variety I have found in an experience of thirty years threshing farm grain."

Who would not grow these oats in preference to the light, chaffy kinds, which make up the main crops of the country? Be prosperous. Get a variety of oats, the like of which you never saw before, which contain so much vigor that they will produce a crop regardless of the season. Don't let the price stand in the way of getting a start of these oats this season. A small start now will make you far more money than to wait a year or two and then buy a large quantity. The price, however, is low enough that you can sow a field or your entire crop. See price in next column. Sow largely of these oats for profit.

PRICE OF EVERITT'S White Superior Scotch Oats. Remember these oats weigh nearly double common oats to the measured bushel. We give the standard weight, 32 lbs. for a bushel. If you think the bulk is small when you receive the oats you must remember the same bulk weighs nearly twice as much as common oats. By mail, post paid, 1 large pkt. 10c, 1 lb. 25c, 4 lbs. 75c. By freight or express, ¼ bu. 40c, 1½ bu. \$1.75, 3 bus. (1 bag), \$3.25, 6 bu. (2 bags), \$6.00. Any larger quantity at \$1.00 per bu. New bags free.

You can well afford to pay \$1.00 per bu. for these oats for seed, and this is as low as we can offer to sell them, and pay advertising expenses. We have sold thousands of bushels of them since we first introduced them at much higher prices. They are as good now as they ever were before and they will do any oat grower good. We guarantee satisfaction.

IT MAKES NO DIFFERENCE, GOOD
SEASON OR BAD, I CAN ALWAYS
DEPEND ON A CROP FROM
EVERITT'S SEEDS.

CUSTOMERS.**

**ENGRAVED FROM A
PHOTOGRAPH.
WE CHALLENGE ANY
PERSON TO EQUAL
THESE RESULTS
WITH ANY OTHER
POTATO IN THE
— U.S. —**

STILL UNEQUALED.

The Wonderful Six-Weeks Market Potato.

Without exception the earliest Potato in existence and the most valuable for market gardeners, truckers and all early Market purposes. A perfect table potato and a wonderful yielder.

Introduced by us in 1890.

Ready for market in **SIX WEEKS**. Matures in 72 days. Two weeks ahead of any other variety and has yielded at the rate of over 600 bushels per acre.

Again Leads for 1894.

Others may equal it in size, quality or productiveness, but in earliness **EVERITT'S SIX-WEEKS' MARKET IS UNAPPROACHED.**

Market gardeners and all others who grow potatoes, what could you afford to give for potatoes that will produce fine, large, beautiful tubers six weeks from planting, which is two or more weeks ahead of any other kind, if you knew they would positively produce such results? Well, we will say to all who are fortunate enough to receive this catalogue, that **EVERITT'S EARLY SIX-WEEKS' MARKET will do all this.** It is worth its weight in gold for a start to seed to many market gardeners, as with it they can get the fancy prices before other kinds come in market. We offer for your consideration the accompanying report from the originator, who has been a potato grower all his life, and is now 54 years old, and from others whose full addresses are on file in our office. After reading these reports you can no longer doubt that this is a most remarkable variety. This new potato originated in Ohio and we purchased of the originator the entire stock and right to introduce it. The originator says: "They have created so much excitement in my neighborhood that I could sell my whole crop to my neighbors at a fancy price." Grows medium to large size, oblong to round shape, light, flesh-colored skin; white flesh; very smooth shape; eyes even with the surface; tubers grow close together in the hill. The potatoes begin to form when the vines are only four to five inches high. The top and tubers grow rapidly, and at 6 weeks from planting are a fine marketable size, and reach maturity in 72 days. As a table potato they are not excelled; even for late spring they keep sound and solid. They grow so rapidly and mature so early that the potato bugs have no chance at all, making their crop, if planted early, before the young bugs become numerous; while for yield they are wonderful, considering their extreme earliness. In 1888 the yield was at the rate of 420 bushels per acre; in 1889 they yielded at the rate of over 380 bushels per acre without manure; while in 1891 they yielded at the rate of over 600 bushels per acre. The originator says about this potato: "Potatoes have been my favorite crop since I was a boy and I always took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer potato than this. I have raised a great many kinds, sent for the earliest in the catalogue, and have raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect potato until I originated this. I have now discarded all others, and raise this for early and main crop, for market and home use. This year has fully convinced me that I have at last produced the best early potato in cultivation. I think it combines more good qualities than any other I have raised in the world. I have given it a fair trial, and it has proven itself superior to

EVERITT'S CHOICE SEED POTATOES

are Famous Wherever Known. They are the Leaders.

If there is one department of our business in which we excel more particularly than another it is the Seed Potato Department. We have always made great specialties of Seed Potatoes. Although we do not introduce one-fourth as many varieties as do some other seedsmen, yet when we send out a new variety it goes out to find a welcome and a home with every grower. Our conservative course has gained for our house the confidence of potato raisers and as a consequence our trade is not excelled in this line by any house in the country. Our customers will please turn to pages 76 and 77 for our new offerings of this year. These are the only potatoes we have found worthy of introduction in the three years passed since we placed our now famous Early Six Weeks Market Potato on the market, although we are continually investigating and testing highly praised new sorts.

POTATO EYES OR WHOLE POTATOES.

Within the past three years many seedsmen have adopted the plan of sending potato eyes by mail and devote considerable space to explaining the beauties and advantages of the potato eye scheme. It is a good scheme to talk on and will influence some orders from the inexperienced, but it is all wrong. Within one week after the potatoes are cut they have lost a great share of their vitality and if obtained early in the season before planting time has arrived the chances are you have lost one-half of them entirely and the balance will make only a feeble growth. We send by mail medium size, sound, whole tubers. One pound of these will contain from 5 to 8 potatoes and from 50 to 80 eyes. One pound of potato eyes will comprise from 25 to 35 eyes, and they will not have much flesh at this rate. Note the difference; besides, by our improved method of preparing seed and planting we make one whole potato equal 3 as usually handled, and that without any extra labor or delay in planting. By aid of a hot bed we can make 1 lb. equal 20 lbs. as ordinarily planted. This last process is rather tedious and only practicable where the party can give them careful attention. With potato eyes neither of these multiplying processes can be used.

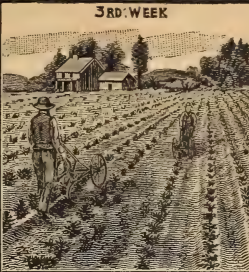

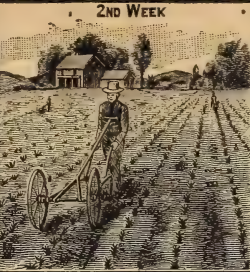

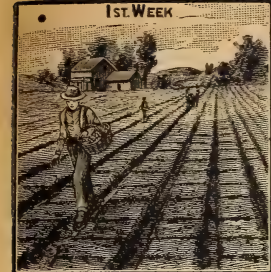

fine, large, beautiful tubers six weeks from planting, which is two or more weeks ahead of any other kind, if you knew they would positively produce such results? Well, we will say to all who are fortunate enough to receive this catalogue, that **EVERITT'S EARLY SIX-WEEKS' MARKET will do all this.** It is worth its weight in gold for a start to seed to many market gardeners, as with it they can get the fancy prices before other kinds come in market. We offer for your consideration the accompanying report from the originator, who has been a potato grower all his life, and is now 54 years old, and from others whose full addresses are on file in our office. Grows medium to large size, oblong to round shape, light, flesh-colored skin; white flesh; very smooth shape; eyes even with the surface; tubers grow close together in the hill. The potatoes begin to form when the vines are only four to five inches high. The top and tubers grow rapidly, and at 6 weeks from planting are a fine marketable size, and reach maturity in 72 days. As a table potato they are not excelled; even for late spring they keep sound and solid. They grow so rapidly and mature so early that the potato bugs have no chance at all, making their crop, if planted early, before the young bugs become numerous; while for yield they are wonderful, considering their extreme earliness. In 1888 the yield was at the rate of 420 bushels per acre; in 1889 they yielded at the rate of over 380 bushels per acre without manure; while in 1891 they yielded at the rate of over 600 bushels per acre. The originator says about this potato: "Potatoes have been my favorite crop since I was a boy and I always took great pleasure in seeing what good crops and large yields I could get, but never did I see a nicer potato than this. I have raised a great many kinds, sent for the earliest in the catalogue, and have raised them from seed, and got some very good ones, but none that came up to my ideal of a perfect potato until I originated this. I have now discarded all others, and raise this for early and main crop, for market and home use. This year has fully convinced me that I have at last produced the best early potato in cultivation. I think it combines more good qualities than any other I have raised in the world. I have given it a fair trial, and it has proven itself superior to

1st WEEK

2ND WEEK

3RD WEEK

4TH WEEK

5TH WEEK

all other varieties. Grown on a light clay soil, and without manure or fertilizer, they yielded at the rate of 380 bushels per acre, which can be increased by potato manure. This has been a very unfavorable season for potato growers, for it has been so wet that a great many lost the larger part of their crop by rot, but the Early Six-Weeks' Market stood the ordeal well, with not a rotten potato. In part of the patch in a careful comparative test with three other varieties, each of which have been claimed to be the earliest, the following results were obtained: All were planted May 2, Everitt's Six-Weeks' Market matured in 72 days; yield, 420 bushels per acre. Stray beauty matured in 87 days; yield, 189 bushels per acre; Chas. Downing matured in 92 days; yield, 350 bushels per acre. Early Sunrise matured in 100 days; yield, 378 bushels per acre. This test shows this new potato to be fifteen days earlier than any of the above and far more productive.

READ HOW THIS POTATO

IS LIKED BY ALL WHO GROW IT.

"THE LIKE WAS NEVER SEEN BEFORE."

We received a letter from our customer, John L. Saum, of Paulding county Ohio, to the effect that he dug some Six-Weeks Market Potatoes forty days from planting. It occurred to us that it would be a good idea to have a disinterested party dig and send us some potatoes from which to make a photo-engraving for our catalogue. We did this at once and on Aug. 25th we received the following letter:

MR. J. A. EVERITT, Dear Sir:—"I send you to-day by freight the product of forty hills of Six-Weeks Potatoes. They were dug last night and this morning and grew in forty-three days. They were grown from one-eye seed. I have just begun farming on my own land, and am not fixed yet for pushing a crop of early potatoes. These were covered with a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair."

JOHN L. SAUM.

(See Photo-engraving on page 70).

"We, the undersigned, do personally know the originator of EVERITT'S EARLY SIX-WEEKS MARKET POTATO, and of our own knowledge know that this variety will produce potatoes fit for the table in six weeks from planting, and that they are solid and mealy when boiled, and that they will mature in 72 days from planting. We consider them the earliest potato in the world, and if justice is done them they will be placed at the head of the list as the earliest, finest table variety, and the largest cropper of any early variety." J. W. SHANKS, E. B. SMITH, R. BLAIR, V. WASHBURN, ELIZABETH WASHBURN, all of Athens County, Ohio."

"I planted a few of the Six-Weeks Market Potato last season on black, sandy loam, without manure, and raised at the rate of 388 bushels per acre of the nicest potatoes I ever saw. They will produce potatoes for market in six weeks, and mature in 72 days. The potato bugs have no chance whatever with them. They are the largest cropper of all early kinds. ELIZABETH WASHBURN, Athens Co., O."

The Everitts Early Six weeks Market Potato is the most wonderful variety in the world, and combines more good qualities than any other variety in cultivation. This will surely be the gardeners' favorite on account of its earliness and other valuable qualities. The potatoes begin to set on almost as soon as the plants appear, and by the time the plants are as large as some early potatoes when tubers begin to set, these are ready for market. At six weeks from planting I have had them fit for table, and as fine, solid and mealy as ripe tubers. They are not troubled with potato beetle."

JOHN WISE, Athens County, O.

"I know the originator of Everitt's Early Six-Weeks Market Potato, and helped to dig his crop this season, and I think they are the earliest potato in cultivation to-day. When the vines were about six inches high, I examined them and found potatoes as large as partridge eggs, and at six weeks from planting were as large as hen eggs. Will mature in 72 days and never rot. The yield was 380 bushels per acre without manure."

J. E. SHANKS, Athens County, O.

Being the introducer of some of the best Potatoes now in cultivation, chief among which are our FAMOUS GREEN MOUNTAIN and EARLY EVERITT, which we have sold in immense quantities, and which have surpassed every other variety as profitable Potatoes to grow, we know whereof we speak, and on what foundation we base our claims for our new Potatoes.

J. A. EVERITT, Seedsman.

A CROP SIX WEEKS FROM PLANTING.
THIS IS NOT A FANCY PICTURE BUT AN ACTUAL REALITY.

"The Six-Weeks Market Potatoes take the cake. All the seeds I buy from J. A. Everitt beat the world." MRS. W. H. POWERS, Bradford Co., Pa."

"I like the Six-Weeks Potatoes very much. I divided with my neighbors. One of them says they are the best he ever saw. They are excellent keepers. They are first-class in every respect." E. HARTMAN, Sutton Co., W. Va."

"The Early Six-Weeks Potatoes did well with me. I could sell a car load for seed here, if I had them." JOHN B. COCHRAN, Jeff. Co., O."

See additional reports on next page.

PRICE. By mail, 1 lb. 30c, 4 lbs. \$1.00. By freight or express, ½ bu. \$1.25, ½ bu. \$2.00, 1 bu. \$3.50, 1 bbl. \$7.50, 2 bbls. \$14.00, 5 bbls. \$33.00.

A PROFITABLE INVESTMENT

Would be to buy enough **EARLY SIX-WEEKS MARKET POTATOES** for your entire early crop. You will certainly make money by doing so through the increased yield over any other early potato, to say nothing about the extra price you can get for the first potatoes in market or from your neighbors for seed until they are all supplied.

"One pound Early 6-Weeks Market Potato yielded 147 pounds of fine, sound, smooth tubers. Ripened in 75 days, and produced marketable potatoes in 6 weeks, as you claim. This is the most valuable variety of potatoes ever introduced."

R. TAYLOR, Ashland Co., Wis.
"You have got it right, the best quality and the earliest potato in existence. We had the Early 6-Weeks Market Potato large enough for the table in 6 weeks from planting. They outyielded all our other varieties."

AUGUST BROENKNER (Gardener).
Allegan Co., Mich.
"I have planted more than twenty different Market Potatoes if I could not replace them for size. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early, and those gardeners who get them first will reap handsome profits."

JACOB E. STILSON, Onondaga Co., N. Y.
"My Early 6-Weeks Market Potatoes have proved to be as early as you represented them, and fine yielder; sound, smooth and best quality. They are very valuable."
C. E. WARD, Sullivan Co., Ind.

"The Early 6-Weeks Market Potato is the best for the yield and the earliest I had this season. They are one to two weeks earlier than the Early Ohio."
N. NEDAN, Marion Co., Ind.

"I planted the Early 6-Weeks Market Potato May 3. They grow fine, and we had new potatoes cooked June 20. They are the earliest we ever saw."
D. D. DAVIS, De Kalb Co., Tenn.

"Our Early 6-Weeks Market Potato produced over one hundred fine potatoes, that made a bushel, measured. They are the earliest to make market potato, and the earliest to mature of any I ever saw. My crop is not for sale at any price."

JOHN GILBERT, Meek Co., Va.
"Twenty hills of Early 6-Weeks Market Potatoes yielded a heaped bushel. They bear out your claims for earliness, quality and productiveness. Thanks for calling my attention to them."

EDU. LARSON, Worcester Co., Mass.
"I would give hundreds of dollars to control the growing of the Early 6-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars' profit to a large grower."
W. HENRY MORRIS, Cayuga Co., O.

"The 6-Weeks potatoes have proved well for me. Last season, when nearly all kinds dried up, they gave me a good crop of fine, large potatoes, nearly all yielders, and tubers large, with few small ones; quality excellent, very early; also they were awarded first prize at our fair, where many kinds competed."
J. W. BAKER, Bureau Co., Ill.

"The Early 6-Weeks have done well for us. The only trouble is they come on first to eat, and we generally use them all up before others come."
C. C. SMITH, Licking Co., O.

"The Early 6-Weeks are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. Early Ohio came three weeks later."
L. S. JOHNSON, Clearfield Co., Pa.

"You can not praise the Early 6-Weeks Market Potato too much. Gardeners cannot think of growing without them. They are off the ground, beginning 6 weeks from planting, which averaged me 50c a peck. They are wonderful."
G. R. HIXON, Madison Co., Ill.

"The Early 6-Weeks Market Potato is splendid. I find them the best potato I have had since the Peachblow run out."
G. G. COLTON, Sac Co., Ia.

"I consider the Early 6-Weeks Market Potato the earliest and the best potato I have ever raised."
G. SAMUEL MCKAY, Tipton Co., Ind.

"The Early 6-Weeks Market Potato did exceedingly well; raised at the rate of 400 bushels per acre; some weighed 1½ pounds. We think the cooking quality best of any Early Ohio's, and they are earlier and better yielder."
S. CORMAN, Preble Co., O.

"Am well pleased with the Early 6-Weeks Market Potato. It is the very finest quality for table, a good copper, free from any blemishes."
A. E. STALEY, Knox Co., Me.

"The Early 6-Weeks Potatoes are all you claim for them. They are very early and good yielders. Planted them the 19th of April and the last of June (6 weeks) they were ready to dig, and good size, too; no marbles."
A. FENTON, Monroe Co., N. Y.

"The Early 6-Weeks Market Potato did well in abundance in flavor I have handled, and yield in abundance."
BENJ. GEMBLER, Licking Co., O.

"The Early 6-Weeks Market Potato excels all. The tubers are large and better, and in all respects are superior to others that I have tried."
B. T. JANSKY, D. C.

"The Early 6-Weeks Market Potato did well in every respect. They are extra early, cook mealy,

good yielders, of nice size, average ¼ lb. The 8 lbs. bought of you yielded over 5 heaping bushel baskets."
Geo. W. RICHANSON, Morrison Co., Minn.

"Out of seventeen kinds of potatoes planted, your Early 6-Weeks Market were superior to all, both in quality, size and earliness. I really think they are the best potato on earth."
G. CARROLL, Pipestone Co., Minn.

"Those 6-Weeks Market Potatoes were true to your statement. In just 6 Weeks from planting, good sized potatoes."
E. W. ANTHONY, Houghton Co., Mich.

"They are the best early potatoes, taking yield, size and quality into account, of any potato I have ever tested, and have tried nearly every kind I could hear of."
W. H. MILLER, Winnebago Co., Ill.

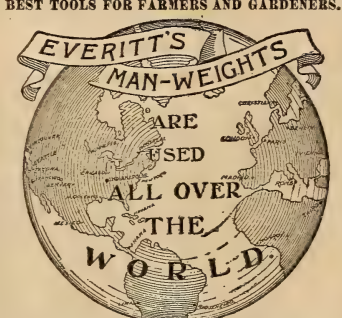

"The 6-Weeks Market Potato made 50 bushels more per acre than the Ohio; our standard potato; am well pleased with them."
J. M. G. WATT, Douglass Co., Kas.

"This new 6-Weeks and five days since I planted the 6-Weeks Market Potatoes. They did not sprout very quick, but they have nice, large tubers on them. Are the earliest potato for this climate I ever saw. I thank you a thousand times for this good potato."
C. L. RICE, Armstrong Co., Pa.

"The Early 6-Weeks did fine, and were fit to use two weeks before the Early Ohio."
A. A. DRY, Highland Co., O.

"It is the best potato I ever saw; yields well, of good size, cooks up like balls of flour, and is delicious. I thank you for sending me such a good potato."
THOS. SINNOCK, Adams Co., Ill.

BEST TOOLS FOR FARMERS AND GARDENERS.

See Page 80 and Last Cover Page.

"One peck 6-Weeks Potatoes yielded 16½ bushels of fine potatoes as I ever saw. There is nothing in this section to come up to them, and they are ready sale at \$3.00 per bushel. I dug them 16th of June."
JOHN P. GENEVIE, Niagara Co., N. Y.

"From 19 lbs. 6-Weeks Potatoes, I raised 12 bu. of fine potatoes, at the rate 16½ bushels per acre; planted 3x3½ feet, 2 eyes in a hill. We like them much as an early market potato."
J. C. ZIMMERMAN, Col. Co., O.

"Six-Weeks Market Potatoes do very well. All the seed from you did well."
O. L. FOSTER, Knox Co., Me.

"Six-Weeks Market Potatoes are very early and good yielders. I took them to Portage County Fair and received first premium for best early potatoes."
CHRIS. HECKER, Columbia Co., Wis.

"I am well pleased with the 6-Weeks Potato. If I was gardening I would surely buy some."
P. E. GENEVIE, Mo.

"I think the Early 6-Weeks Market Potato is the finest early potato I ever saw."
C. C. WEAVER, Franklin Co., O.

"The first year we planted the 6-Weeks Potatoes we had them large enough to use in 6 weeks from the time I planted them. The second year we planted in July, and raised a second crop. A friend to whom I gave some, says they are 10 days earlier than any other potato he ever had. They are easily dug and have few small ones. They also can be kept longer without their vitality being weakened by sprouting. I kept some till July 9th, and the sprouts were only about 1 inch long. We thank you very much for introducing this new variety."
JOHN D. SAUM, Paulding Co., O.

"The Early 6-Weeks Potatoes are all you claim for them. We had them in just seven weeks from planting. They were larger than a hen's egg at that time."
Geo. HAMILTON, Bureau Co., Ill.

"Early 6-Weeks Potatoes have done very well considering our heavy clay soil. Much better than the Early Ohio, which, before we planted, was considered a failure."
JOHN LAWSON, Richland Co., O.

"I sold 6-Weeks Market in June, planted in April, at 6c per lb. I am well pleased with them."
H. S. BROWN, Kenting Co., S. Dak.

"Early 6-Weeks Potatoes are early, good yielders and the quality is first-class."
ENOCH BALD, Grant Co., Ind.

"Early 6-Weeks Potatoes are very early and of excellent quality. I have none for sale at any price, as I will plant all. I consider them the best and earliest potato in our locality."
JAS. HIGLEY, Alle. Co., Pa.

"Early 6-Weeks Potato done remarkably well. They made a fair yield, notwithstanding the bad season, and in six weeks from planting we had fine tubers."
LEVI HART, Miami Co., Ill.

"Early 6-Weeks are all you claim for them. They are very early and good yielders. Planted 3d of May, the 20th of June were ready to dig. They are the best potato on earth."
CHAS. T. WALZ, Lyscoming Co., Pa.

"Our County Fair has just closed, and I must tell you what they done with the 6-Weeks Potato. I took all the premiums (two) in competition with many of the leading new kinds, and all fine at that. They were popular at our fair."
J. W. BAKER, Bureau Co., Ill.

"If space would allow we could print 500 testimonials like the above, all endorsing our claims for the Great Everitt's Early Six-Weeks Market Potato."

GREEN MOUNTAIN POTATO REPORTS--Cont'd.

"From the 1-4 lb. of Green Mountain Potatoes I raised 51 lbs. They are fine, large potatoes. For yield they beat anything I ever saw. They are solid, fine quality and mealy."

A. BYLES, Whitesides Co., Ill.
"From 2 5-8 oz. Green Mountain Potatoes I raised 89 lbs. of fine potatoes. I think I could have raised 50 lbs., but I let one of my boys have five eyes, which he placed where it was too much shaded."
J. H. MERRITT, Clarion Co., Pa.

"I consider the Green Mountain Potatoes the best considering our poor season. I cut the seed in ten pieces and they grew nicely and produced 35 pounds of fine potatoes, all marketable. It was a good crop. I think they are the best I ever held their foliage better than the Blush. They are a variety of great promise."
W. H. MORRIS, Adams Co., Ill.

"The Green Mountain Potato is the best for the farmer, for market, and for table I ever saw. My neighbor, W. Gladden, also had a patch 40x100 feet, and the hills were six with potatoes; the yield was at least 100 bushels from this small piece of ground. The people here never before saw such potatoes, and they were bought for seed."
C. MCQUEENY, Marion Co., Ind.

"The Green Mountain Potato is the best I ever tried, and they are the most profitable for the farmer to grow."
SAMUEL HETTER, Marion Co., Ind.

"The Green Mountain are the best and most profitable potatoes I have raised. I harvested 250 bushels from one acre, and sold them all for seed to my neighbors at extra price."
FARMER BROWN, Marion Co., Ind.

"I never before saw a potato that pleased me as well in all particulars as the Green Mountain. I will plant 50 bushels of them next year."
J. E. JENKINS, Marion Co., Ind.

"From the 3½ pound Green Mountain Potatoes I raised 60 pounds. They are fine, large potatoes. The four largest weighed 9 pounds. I am exceedingly well pleased with them."
A. HOWE, Union Co., Pa.

"The Green Mountains are the newest potatoes I ever saw. Some of them weigh 2 pounds apiece. My neighbors thought I was foolish to buy them, but I think they can have some \$2 a pound. I think I can raise 50 or 60 bushels from one 25 pounds of seed."
S. F. WHITMAN, Fulton Co., O.

Price of Early Six-Weeks Market Potatoes.

PRICE—1 pound 30c, 4 pounds \$1.00, by mail postpaid. By freight or express, 1 peck, \$1.25, ½ bu. \$2.00, 1 bu. \$3.50, 1 bbl. \$7.50, 2 bbls. \$14.00, 5 bbls. \$33.00.

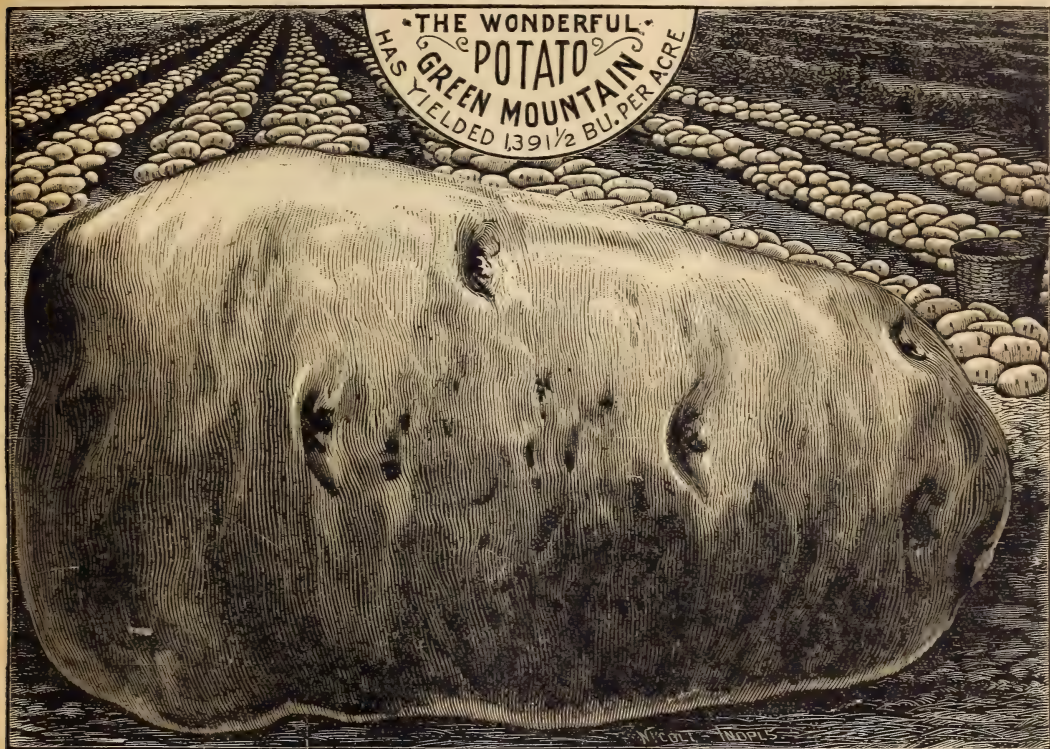

Don't conclude that the price is too high. You can not well pay too much. Those people who bought small lots last year have made money from their investment. The price of the **EARLY SIX-WEEKS MARKET** is not likely to be very low in future years, as they come so early and command such a high price in market that very few are saved for seed.

✱ THE GREAT KING OF POTATOES ✱

THE WONDERFUL GREEN MOUNTAIN

The greatest yield ever known, at the rate of 1,391½ bushels per acre, is recorded for the GREEN MOUNTAIN. This potato has had the greatest sale of any of our introductions, yet there are neighborhoods where they are unknown. Our advice is, obtain them at once. Our perpetuated stock is as productive and of as fine quality now as when first offered.

To secure this potato, we paid the enormous price of \$300 for one and one-half barrels, the entire original stock.

This wonderful medium late potato was raised from seed borne on the Dunmore, impregnated with pollen from the Excelsior, originated in Vermont, and was introduced by us in 1855. That it is an extraordinary and exceedingly valuable variety there is not a doubt. Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine grained, cooks dry and mealy, and is of superior flavor. This is the case when first dug, and they retain their good cooking qualities and keep sound and perfect until the new crop comes again. As a variety to keep for late spring use it has no equal. Vines grow vigorously, foliage deep green, the tubers grow compactly in the hill, which is completely crowded with fine, large potatoes. They ripen in August if planted in April, and in the important matter of productiveness they are perfectly marvelous. This quality, combined as it is, with fine appearance and good table qualities, makes the Green Mountain one of the most valuable late varieties in the country, and is supplanting all other late potatoes in sections where it has been introduced. Read the reports from the Rural New Yorker Experimental grounds:

Green Mountain Potato was planted April 7 and the crop harvested August 27, the variety being, therefore, a late intermediate. They were dug under the supervision of E. Williams, Secretary of the New Jersey Horticultural Society, and Charles L. Jones, of Newark, N. J., who, with the editor of the Rural New Yorker, weighed and estimated the yield, which was at the rate of **1,391½ BUSHELS PER ACRE**. There was an average of **11.25** to the hill, and an average of **5.3-1 lbs.** to the hill. They were planted two eyes to the hill, one foot apart, in rows three feet apart.

This is the largest yield of potatoes ever raised on these Experimental Grounds.

Also, from a letter from the Editor of the Rural New Yorker, under date of December 6, we quote: "Of all the potatoes we have ever tested, this Green Mountain yields the most. It is an immense yielder." Again Mr. Carman wrote us under date of October 17, 1887, after trying them the second year: "The Green Mountain Potato surprises me. They yield well, considering the desperately bad season. They were the best of any (there were nine of the best varieties he could select from all over the country) in the half acre poor soil plot, and yielded at the rate of **280 bushels per acre**. This yield is, for a horrible season, the worst we have had for years, a very fine one. Had the season been at all favorable we would have **DOUBLED** the yield easily." It should be remembered that the soil on which the above potatoes were grown was very poor. This kind of soil was selected purposely. There is probably no person in the country who is a better judge of new potatoes than Mr. Carman, and such words as above coming from him must carry great weight. To secure control of this new variety we paid the enormous price of \$200 per barrel for the original stock.

The Green Mountain Potato is positively one of the best things we offer in our catalogue, and we guarantee them to not only give entire satisfaction, but they will surprise potato growers by their great yield and fine qualities. We know, if we were able to convince each person who receives this catalogue of their real merits, not the least exaggerated, that the demand would be so great that it would be impossible to supply it. You will not be disappointed in this potato.

PRICE.—By mail, post-paid, 1 lb. 25c. 4 lbs. 50c. By freight or express, 1-4 bu. 50c. 1 bu. \$1.75, 6 bu. \$4.50, 2 bbls. or more at \$4.25 each.

SAMPLE REPORTS.

The Green Mountain Potato surprised everybody in this section of the country. They yield about double our other kinds, and are just right for fancy city trade. Bankers and merchants are having me fill their cellars at 10 to 20 cts. per bu. above the market. I will grow no other for main crop until the Green Mountain runs out, then I hope you will have another to take its place.

S. E. GARBER, Hamilton Co., O.

See additional reports on preceding page.

CAUTION.

To our knowledge certain unscrupulous parties have sold other inferior varieties of potatoes for Green Mountain, thus defaming their fair name and justly great reputation. We caution all parties to buy where they will get the genuine article, and thus avoid disappointment. Offered first in 1855, and yet the Green Mountain Potato is holding its old friends and making new friends every year. In this time other new potatoes have been offered and sold for a year or two and then pass out of sight, BECAUSE UNRELIABLE IN RESULTS AND UNFORTHY OF ESTEEM. THEY COULD NOT COMMAND THE CONFIDENCE OF THE PUBLIC.

429 BUSHELS
PER ACRE. A
HIGH AVERAGE BUT
THIS IS GREAT
POTATO.

The illustration to the left shows a broadside view, while the one to the right shows an edge view of the same potato. This is a very valuable feature, as no difference how large the tubers grow (and they grow very large) they will always cook through quickly and evenly. Skin is white, surface very smooth, with eyes perfectly even. Flesh of the whitest and has not a superior as a table potato. We particularly emphasize the growth of the potato, which enables it to resist all disease, blight and bugs to a remarkable degree and yield heavy crops even in unfavorable seasons. Our own crops and reports from our customers places it well in the lead in point of productiveness. **In six crops selected and which the above illustration is intended to represent, the average yield was 249 bushels per acre.** The Rural New Yorker has received the following endorsement from the agricultural press than any other variety in the world, therefore it is not necessary to dwell on its merits in this catalogue. We guarantee our seeds to please and the crop to be highly satisfactory.

Price by mail, 1 lb. 30c, 4 lbs. \$1.00. By freight or express, $\frac{1}{4}$ bu. 50c, bu. \$1.75, bbl. \$4.75, 2 bbls. or more at \$4.50 per bbl.

No. 5 **FOR \$3.00** We will send by freight or express not prepaid, 4 pounds of each of the varieties of Potatoes, Oats and Corn mentioned above. This is about the cheapest way to get a good start of these choice farm crops, but it lacks the element of quick profits that are sure to result if larger quantities are taken like in collections Nos. 1 and 2.

EARLY EVERITT POTATO.

Not as Early as our Six-Weeks Market, but the **Most Productive Early Potato in America. THE GREAT CROPPER. THE GREAT MONEY POTATO.**

Every Potato Grower needs a medium or second early variety of Potatoes to fill out the succession. This is the best sort of this class.

AS VIGOROUS AND PRODUCTIVE NOW AS IN THE FIRST YEAR OF ITS INTRODUCTION.

COPYRIGHTED BY
J. A. EVERITT & CO.
1887

THE SEVENTH YEAR WE HAVE SOLD THIS POTATO WITH GREAT SATISFACTION TO ALL.

WE ARE not inclined to boast of our achievements nor indulge in self-glorification, but we must be excused for referring to what we have done in the Seed Potato line. No other house in the country can show such a record as we in this particular branch of our business. **We have always made a great specialty of Seed Potatoes, and sell an immense quantity every year,** frequently shipping a hundred bushels or more to large growers in different States of the Union, and supply other seedmen in car load lots. We are well acquainted with all the varieties now in cultivation, and for the guidance of our customers we do not hesitate to state that our **early EVERITT is the most productive early potato now in cultivation, coming three weeks after our Early Six-Weeks Market, and is so productive that it is planted by some large growers for both early and late crops.** The Everitt Potato originated in New York. Its fine form is shown by the accompanying beautiful engraving; eyes lie even with the surface; color of skin light pink. A most beautiful potato in shape and color. Flesh is fine, solid, white, and of surpassing quality for the table. Growth is strong and rapid, setting tubers **very early**, which attain a large size in a very short time, and ripen with the Early Rose. Tubers grow **very large** for so early, frequently weighing **over two pounds apiece**. Yield astonishes old potato growers, who acknowledge they never had so productive an early potato. No grower who is ambitious to make the most money out of potatoes should fail to grow the **EVERITT POTATO**.

Below we print a few testimonials which are only a few taken from hundreds that we have received praising this fine potato, but which lack of room prevents us from publishing:

From 1 lb. of Everitt Potatoes I raised 63 lbs. of fine tubers, many weighing over 1 lb. each, notwithstanding the unfavorable season, (no rain from July 1st to 10th). I am very much pleased with them and will plant all next season, as they appear to be exactly suited to our soil.
Hiram Presley, St. Clair Co., Mich.

The peck of Everitt Potatoes yielded 15 bus. My Green Mountains took first premium at our Co. fair over 10 varieties.
I raised 7 kinds of potatoes this year, and the Everitt was the best of all. Twenty hills made a bushel; some weighed over a pound each.
N. Nydam, Marion Co., Ind.

The Everitt has proved to be a very fine potato, yielding with me as high as one bushel from 15 lbs of seed, or a bushel to the rod of row, or 800 bushels per acre. I dug specimens to day that weighed 2 pounds each.

One pound Everitt Potatoes yielded 2 bus. of as nice potatoes as I ever saw. Mrs. Raines thinks the quality better than the Early Rose.
H. Raines, Hendricks Co., Ind.

One tuber of Everitt Potatoes made 8 hills and raised 100 potatoes. Some weighed 3 1/2 lbs. each.
Alban Frost, Perry Co., Mo.

I planted the 1/4 lb. Everitt Potato on the 6th of July and dug them on the first of October. The weather was very dry through June, July and part of August. The ground had no manure for six years, and I had 45 lbs.; one measured 20 inches around lengthwise and weighed 2 1/2 lbs. I shall keep them all to plant next year.

The two potatoes you sent me last spring made 14 hills. They grew nicely and matured without any rain, and I got about eight large potatoes from every hill.
A. H. Lutting, Garfield Co., Washington Ter.

The Everitt is a good potato. It yielded at the rate of 552 bushels per acre.
L. H. Reed, Washington Co., Vt.

I raised 80 lbs. Everitt Potatoes from seven hills. They are very good.
C. W. Lawton, Marion Co., Iowa.

From 3 1/2 lb. Everitt Potatoes I raised 35 lbs. of such nice, smooth potatoes as are seldom seen. My common kinds were almost a failure on account of dry weather, the Everitt yielding four times as much and better quality.
G. A. Philippi, Outagamie Co., Wis.

From 3 1/2 lb. of Everitt Potato I raised 20 pounds of the nicest potatoes I ever saw. The Shepard Redish is the largest I ever saw.
A. F. Hand, Clinton Co., Iowa.

From two hills of Everitt Potatoes, three eyes in a hill, I dug 20 lbs., not one small one in the lot. Early Rose would not have grown at all in this ground. We are highly pleased with them.

The past season was the driest I have ever known; from May until late in the fall we absolutely had no rain, but from 2 1/2 lbs. Everitt Potatoes I raised three bushels of as fine potatoes as I ever saw, many weighing over a pound each. They are the wonder and admiration of all who see them. Few small ones. Among 50 or 60 varieties I prize the Everitt as equal to the very best, and I have all the celebrated varieties in potatoes.
T. Bradford, Lincoln Co., N. Y.

My Everitt Potato all spoiled before planting but one eye. It grew a large vine and yielded thirteen tubers, very smooth and good size. The largest one weighed 17 ounces, the thirteen, 6 lbs. 5 or. I would not take \$2.50 for them. I must have a bushel more in the spring for seed, even though they cost \$5.00 a bushel.
J. W. Hatchin, DeWitt Co., Ills.

From the 3/4 lb. Everitt Potatoes you sent me I raised 18 lbs. of potatoes. None rotted; other potatoes in this section about half rotted. I think this speaks well for the Everitt. I took very poor care of them, yet the yield was at the rate of about 500 bu. per acre. Many big farmers doubt my potato story, but I have got the crop to show them, and that settles the matter.

The two small potatoes (3/4 lb.) cut in two and made four hills. This fall I dug 20 lbs., some weighing from 2 to 3 lbs. I shall plant them all.
Wm. Maxwell, Franklin Co., Mass.

I offered my neighbors, who received your 3/4 lb. Everitt Potatoes last spring, \$2 each for their crops, but none of them accepted.
J. H. Ireland, Vigo Co., Ind.

As we were digging potatoes in our rich plot, recently, we came across a hill that yielded six pounds. If a whole acre could be grown at this rate the yield would be over 1,500 bushels! All the hills of the variety yielded well, but as none of them equaled this the estimated yield would be considerably reduced. If none of our readers ever had a chance to dig six pounds of potatoes from one hill, we assure them it is a policy thing to do. It will be introduced under the name of "The Everitt."

PRICE—By mail, post-paid, 1 lb., 25c; 4 lbs., 75c. By freight or express, 1/2 bu., 60c; 1/4 bu., \$1.00; 1 bu., \$2.00; barrel, \$5.00; 2 barrels, \$9.50; 5 barrels or more at \$4.50. You can afford to plant largely of this potato.

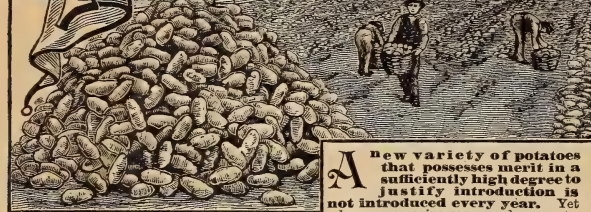

IMPROVED EARLY OHIO POTATO.
The Early Ohio Potato is more extensively grown than any of the old varieties of Early Potatoes, being popular North, South, East and West. We sell large quantities of them, shipping regularly to many southern growers their whole supply. Our seed is pure and the choicest strain in the country. **PRICE**—By mail, 1 lb., 25c; 4 lbs., 75c. By freight or express, 1 bu., \$4.50; 1 bbl., \$4.50; 2 bbls. or more at \$4.25 per bbl.

HYBRIDIZED POTATO SEED.
New varieties of potatoes are originated by planting the small seed taken from the buds that grow on potato tops. The best varieties are usually produced from hybridized seed. This is seed that contains the blood from two or more varieties mingled. We offer the best hybridized seed that is bound to produce valuable new varieties. **PRICE**—Picket, 20 cents.

SOUTHERN CUSTOMERS. By our favorable location, neither in the extreme ice-bound north, nor in the warm sunny south, we are able to keep our potatoes over winter in prime condition, and yet can ship southern orders from March 1st to 15th, putting them in the hands of our southern customers in time for first early planting, direct from our cellars, at moderate charge for freight.

FULL ADDRESS of each party whose testimonial for O. K. Seeds and Potatoes we print in this catalogue is on file in our office. If we were to give the complete address, orders would go to them for what surplus they may have, and we would be left stranded with no income to pay our advertising expenses. This by way of explanation.

MOST PRODUCTIVE POTATO IN AMERICA

A new variety of potatoes that possesses merit in a sufficiently high degree to justify introduction is not introduced every year. Yet when we examine some seedmen catalogues we find they spring one or more new sorts on the public each season, and the last one is always superior to anything that has gone before. If the work those seedmen are doing was really in the line of progression to the extent that their claims would indicate, we would now have potatoes that one acre would produce a supply for a country's population and the quality so superb that the person eating them would be intoxicated with delight after his noon-day meal. It is disappointing, however, to note that the real improvements have not kept up with the promises, and although we introduced a new potato only once in about three years, yet these potatoes that we have introduced and that we now make specialties of stand undisputedly at the head of the list for earliness, productiveness and quality; we make no exceptions. We refer these claims to every person who has ever grown them. (The varieties referred to are listed on Pages 70, 71, 72, 73 and 75).

EVERITT'S HEAVYWEIGHT—The new variety to which we now call your attention, possesses distinct and superior qualities over any other potato. It can be depended upon that this is not an ephemeral sort (like too many that are introduced), that will go up this year like a rocket and come down before the year is gone and sink into oblivion. It is bound to have a great run and be of great value. **Everitt's Heavyweight**, we believe, is the only absolutely blight proof potato in the country. It has proved to be such so far. It is a rank, strong, free grower, maturing late. The crop should be planted by the first of June to mature in good season, or, if planted earlier, the ground can be seeded to wheat in the fall. Pure white skin and flesh. They do not grow to great size, but set very full and produce an enormous crop of marketable tubers of desirable and convenient size. We do not call these "Heavyweight" on account of the weight of individual tubers, but to describe their enormous yielding propensities. In this respect they excel all other varieties on good land, and a good season the ground will scarcely hold them. Ten barrels placed last spring on 10 farms, one barrel on each, averaged nearly 500 bushels per acre, and 10 bushels planted in one field yielded 3,500 bushels. The best part of this field yielded at the rate of 600 bushels per acre, and this in a very dry season, when no other variety in the section, where these tests were made, yielded more than 1/2 as many bushels per acre. Shape oblong; surface smooth; tubers grow compact in the hill; table qualities very excellent for a heavy yielding general crop potato; not so fine yet as our Green Mountain and Rural New-Yorker, but will improve as cultivated. This variety of potatoes will put dollars in the pockets of the growers. It is the result of wide search on our part after a variety worthy of introduction, and our customers will congratulate themselves after giving them a trial. If the people who are fortunate enough to receive this catalogue, will take into account the fact that when we introduce a new potato, it becomes a popular and standard sort and will invest in our new potatoes the first year they are offered, they will make big money in introducing them in their neighborhood. We make the demand. You can sell the seed. We have sold potatoes at all kinds of prices: 1/4 lb. for \$1.00, 1 lb. for \$1.00, 1 bu. for \$20.00, etc. No price that we would ask for Everitt's Heavyweight Potato would be above its real value to get a start of the seed. Price, by mail, post paid, 1 lb. 50c, 2 1/2 lbs. \$1.00, 4 lbs. \$1.50. By freight or express, 1/4 bu. \$1.50, 1 bu. \$5.00, 5 bu. \$12.00, 2 bus. \$20.00.

Enormously Productive.

1 BU. EVERITT'S COLOSSAL POTATO.

UNLIKE the doctors' pills: "If they do no good, they will do no harm." Our potatoes are **positive in results**. If you take them, they will do you good. We are fortunate this year in having to offer two of the most valuable varieties of potatoes we ever introduced, and we send them forth with the belief that they will be welcomed by all our old customers who have found other potatoes of our introduction exactly as represented and have grown them to their great profit. To those who have not been planting our potatoes we will say that we always have the best in this line, having made specialties of seed potatoes from the beginning of our business, and our house has the reputation for years of being "THE CHAMPION SEED POTATO HOUSE OF THE COUNTRY."

Of the two new sorts we now introduce, we concede the greatest productiveness to Everitt's Heavy Weight; yet Everitt's Colossal is not far behind. While for strong growth, drought resisting qualities and great size of tubers, the Colossal is unsurpassed. 50 potatoes can be selected from: almost any crop that will make a bushel. The surface of the largest potatoes are quite regular, considering their great size, with the eyes slightly depressed; but the medium size tubers are smooth, with eyes even with the surface. Skin is of flesh color; flesh white and floury when boiled or baked; very delicate flavor. Tubers oblong and flattened on sides, thus allowing them to cook through quickly, regardless of size. Tubers grow bunched in the hill, and are easily dug by hand or machine. They ripen medium late, and in keeping qualities for fall, winter and spring are unexcelled.

We need not say that we recommend this potato highly. The fact that we give it a place in our catalogue is evidence that we regard it with great favor, and that our reputation as a potato expert will not suffer when it is put to the severe test of general cultivation.

Every person who receives this catalogue should avail himself of the opportunities now presented to make some money.

The two new potatoes we offer this year will be in demand for seed until all growers are supplied. If one enterprising person in each neighborhood will undertake to grow a crop of them, he will find a market for them at home at a high price. Many a great business had a small beginning; as an illustration, the business which this catalogue represents is the direct result of 50 cents invested in a new variety of potatoes, not a great many years ago.

The price of Everitt's Colossal Potato we will make moderate, so every person can get a small or large amount without delay.

By mail, post paid, 1 lb. 50c, 2½ lbs. \$1.00, 4 lbs. \$1.50. By freight or express, ¼ bu. \$1.50, bu. \$5.00, 1 bbl. \$12.00, 2 bbls. \$20.00.

We will send 1 bbl. Colossal and 1 bbl. Heavy Weight for \$20.00. One barrel will plant one acre, or equal three barrels by our improved process of preparing the seed. Full particulars will be sent to every purchaser.

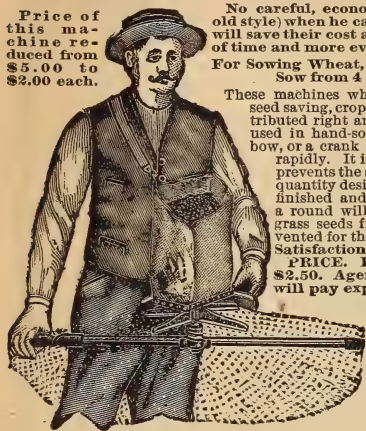

POTATOES BY MAIL.

See remarks "Potato Eyes or whole Potatoes" on page 70. There are many people who want only a few potatoes, or living at such a great distance the transportation charges would prevent them being sent by freight or express. To these we advise our potatoes by mail, in boxes as shown above. With each order will be sent full particulars of our improved method of preparing the seed, which makes 4 pounds equal 12 pounds as ordinarily handled.

EVERETT'S PERFECT BROADCAST SEED SOWERS.

For Sowing Wheat, Oats, Rye, Rice, Flax, Grass Seed, Clover Seed, etc. In fact, any kind of Seed Broadcast.

Price of this machine reduced from \$5.00 to \$2.00 each.

Bow Seeder. Retail price, \$2.00 (they sell for \$2.50 to \$3.50 elsewhere). We sell them to you by the doz., ½ doz. or ¼ doz. at \$15.00 per doz.

Crank Seeder. Retail price, \$2.50. They are worth \$3.00 to \$4.00. We will sell them by the doz., ½ doz. or ¼ doz. at \$18.00.

Don't ask for special prices; these are bottom, and don't order less than the ¼ doz. at this rate. Some of our agents are making \$5.00 a day at this business. It is a remarkable fact that very few farmers have ever seen these machines. Yet they are so necessary in sowing all kinds of seeds broadcast, that once they are seen and try one, they could not be induced to part with it. They will save about ¼ the seed over hand sowing, save ½ your time, make your work easier and distribute the seed evenly, thus greatly increasing the crop.

No careful, economical farmer will continue to sow his seed by hand (the old style) when he can get one of these machines at our reduced prices. They will save their cost almost daily in saving of seed, to say nothing about saving of time and more even distribution, which will have a great effect on the crop.

For Sowing Wheat, Buckwheat, Rice, Flax, Oats, Grass seed, etc. They will Sow from 4 to 8 Acres per Hour at a Common Walking Gait.

These machines when first invented sold for \$15.00 each. Valuable Labor-saving seed saving, crop increasing machines. The seed is not thrown upward, but distributed right and left evenly, and will save at least one-third the seed used in hand-sowing. They are operated by a transverse motion of the bow, or a crank which revolves the distributor and works the vibrator rapidly. It is the only seed sower having a satisfactory vibrator which prevents the seed from clogging. They are quickly adjusted to sow any quantity desired. The grain sack holds one bushel, made strong, well finished and weighs about four pounds. Will last many years. At a round will sow wheat 50 feet, buck-wheat 48 feet, flax seed 36 feet, grass seeds from 27 to 36 feet. These are the best machines ever invented for the purpose, and should be in the hands of every farmer. Satisfaction guaranteed.

PRICE. Bow Seeder, Each, \$2.00. Crank Seeder, each, \$2.50. Agents wanted. See below. For 25 cents each extra we will pay expressage to any point east of the Rocky Mountains.

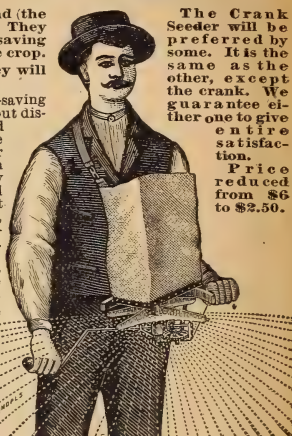

A Good Business

Have you some spare time? You can turn it into money by selling our Broadcast Hand Seed Sowers. No risk. We guarantee these machines. They are light and can be carried or hauled from house to house. Nearly every person will buy them when they see them. We have no confidential terms. Any person can engage in this business. The only condition is you must order a certain number, to show that you are buying to sell again.

We sell them to you by the doz., ½ doz. or ¼ doz. at \$15.00 per doz.

They are worth \$3.00 to \$4.00. We will sell them by the doz., ½ doz. or ¼ doz. at \$18.00.

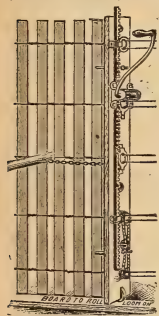

Don't ask for special prices; these are bottom, and don't order less than the ¼ doz. at this rate. Some of our agents are making \$5.00 a day at this business. It is a remarkable fact that very few farmers have ever seen these machines. Yet they are so necessary in sowing all kinds of seeds broadcast, that once they are seen and try one, they could not be induced to part with it. They will save about ¼ the seed over hand sowing, save ½ your time, make your work easier and distribute the seed evenly, thus greatly increasing the crop.

The Crank Seeder will be preferred by some. It is the same as the other, except the crank. We guarantee either one to give entire satisfaction.

Price reduced from \$3 to \$2.50.

PERFECTION FENCE MACHINE

of great assistance to every farmer, will be a good machine to make a cheap, handsome, durable fence. Such a machine we offer here. It is intended to build wire and picket fence in the field along the line of posts, where wanted. This is the most complete machine for the purpose ever invented. Money can be saved by owning a machine and building fence each year as needed. The fence costs from 25 to 30 cents per rod and two operators (a man and a boy) can put up from 40 to 50 rods a day. The fence turns all kinds of stock and an orchard enclosed with a fence built with this machine is proof against rabbits. The cut shows only the weaving device. There is another part to hold the wire, not shown. We send it all complete, ready to build fence. Any kind of pickets can be used, sawed, split or round poles; old waste boards can be woven in and they will make a good fence, but not very handsome. 2, 3, 4, or 5 strands of wire can be used as desired. Full directions will be sent with each machine, so don't hesitate about ordering. We guarantee they will do the work O.K.

Price reduced from \$12 to \$8.00, which is our hard times price. They can not be sold for less, so don't ask for anything more special.

We can furnish suitable galvanized wire for use with the machine for \$3.00 per 100 lbs.

We can also furnish the best post hole digger for \$2.00.

\$500 PER ACRE is not an uncommon return from one acre of onions. Equal to all many farmers clear on 100 acres of ground in general crops. Of course it requires labor to raise onions, particularly to raise a big crop, but better put this labor on one another than spend it over one hundred. This is one of the ways to make farming pay. With our Man-Weigh

tools it is not such a great task to raise onions now. They make the work easy and pleasant. See page 35 how you can get one free.

EGGS FOR HATCHING. The low price of eggs of grain and other farm products will induce many people to turn their attention to poultry raising for eggs and market. The best way to get a start with a new breed is to buy the eggs and raise your own young. We can supply eggs of the following breeds at the named prices. Our stock is of guaranteed purity. Eggs well packed, and will carry one thousand miles and hatch as well as at home. **GOOD STOCK WILL PAY.** Send to us and you will get the very best.

White and Brown Leghorns, Light and Dark Brahmas, Black Spanish, Plymouth Rocks and Houdans, at \$2.00 for 13, \$3.75 for 26 eggs. Black and Partridge Cochins, Langshans and Wyandottes, at \$2.50 for 13, \$4.00 for 26 eggs. Guinea Fowls, \$1.50 for 13 eggs. Duck Eggs, any variety \$1.50 per 11 eggs. Geese Eggs, 45c apiece. Turkey Eggs, Mammoth Bronze, 30c apiece.

POULTRY WHITE AND BROWN LEGHORNS, LIGHT AND DARK BRAHMAS, PLYMOUTH ROCKS, GUINEA FOWLS, CUCK EGGS, TURKEY EGGS, MAMMOTH BRONZE, 30c apiece.

White and Brown Leghorns, Light and Dark Brahmas, Black Spanish, Plymouth Rocks and Houdans, at \$2.00 for 13, \$3.75 for 26 eggs. Black and Partridge Cochins, Langshans and Wyandottes. We can furnish the very best at the following prices: Single birds \$2.00 and \$4.00; pairs, \$4.00 and \$8.00; trios, \$5.00 and \$10.00. The lower price is for sex good broilers; the higher price will secure stock that will win prizes. **GEES—Emblem and Toulouse, \$7.00 per pair. TURKEYS—Mammoth Bronze, single bird, \$5.00; per pair, \$8.00.**

Poultry Supplies.

Rust's Egg Producer Makes hens eggs are high-priced.

TRADE (THE HEN PERSUADER) MARK. A scientific combination of substances, which, when assimilated by fowls, produce eggs, plumage, growth and development, exactly as certain foods produce milk in cows, or fertilizers increase crops.

It contains in addition valuable tonics and remedial agents which insure perfect assimilation

and robust health, without which the best results can not be obtained. It makes hens lay in summer and winter. Lb., pkt. 30c, by mail 35c; 2½ lb. box 60c, by mail 75c; 10 lb. box \$1.75 by express or freight at purchaser's expense.

Rust's Havens' Condition Powders The Only Positive Preventive and Cure for Gapes and Poultry Cholera and the Best Medicine for Horses, Cattle, Poultry, Sheep and Hogs.

We warrant Havens' Climax Condition Powders to be free from Antimony, Arsenic, Lead, Resin, Saltpetre, and all harmful ingredients, and to be entirely unlike any other preparation. It is not a feed but an honest medicine, at an honest price. Liberal packages weighing 14 ounces 30c; post paid, 45c.

IMPERIAL EGG FOOD

Will make your hens lay. It keeps fowls in best condition, and makes poultry the most profitable stock on the farm. It is estimated that one-half the chicks and turkeys annually hatched die before reaching maturity. When the Imperial Egg Food is fed according to directions, sick and dropping chicks will never be seen. They will also be fitted for market a month earlier than by common treatment. Moulting fowls should be fed with the Imperial Egg Food two or three times a week. Cholera, Roup, and common ailments seldom appear where the Egg Food is used. Trial pound packages, post paid, 60c. By express, 1 lb. 45c, 2½ lbs. \$1.00, 5 lbs. \$2.00, 25 lb. keg, \$6.25.

CRUSHED OYSTER SHELL. Manufactured from good, clean shells. Poultrymen should use it. Express, 25 lbs. 50c, 100 lbs. \$1.50, bbl. \$3.00, \$3.35. By mail add 16c per lb.

GROUND BONE. About the size of wheat or cracked corn and should be kept within access of poultry. Express, 25 lbs. \$1.00, 100 lbs. \$2.50, 200 lbs. \$4.75. By mail, 16c per lb. extra.

POSTAGE

is paid on all seeds that we quote by packet, oz. ¼ lb. and pound. Also on beans, peas and corn by pint and quart, also on potatoes from 1 to 4 lbs. All seeds quoted by ½ peck, peck, bushel, bag, or barrel go by freight or express at expense of purchaser. We do not pay transportation on any other things except when so stated. When comparing prices, remember that we pay postage as above.

Magnificent Collection of FLOWER SEEDS

Every season we have a large quantity of flower seeds left over from our regular sales. Most of the varieties would be just as good for selling in packets the next season and some for several seasons. Yet we can not tell without frequent tests just when they have lost their vitality, and certainly if we would keep them year after year, until sold, as many seedsmen do, some of them would loose their vitality. Therefore, we take all our one year old stock, dump it all together, put it up in packages and offer it to our customers in this shape.

The mixture contains over 200 varieties, many of them choice sorts and very expensive, embracing annuals, biennials and perennials. Few will readily comprehend the desirability and beauty of a plot of ground sowed with this collection of flower seeds. In the first place, you will have the early annuals blooming very early the first summer; later the late blooming varieties filling the whole summer and fall until cut off by heavy frosts. You have now only began to realize

what you have provided when you invested a few cents for this collection of fine flower seeds. Wait until the next spring and see what surprises are in store for you. Soon after the snow has gone the biennials and perennials will push up their heads and unfold their blossoms. New beauties will in this way be presented almost daily during the second season, and the perennials will continue blooming for several years.

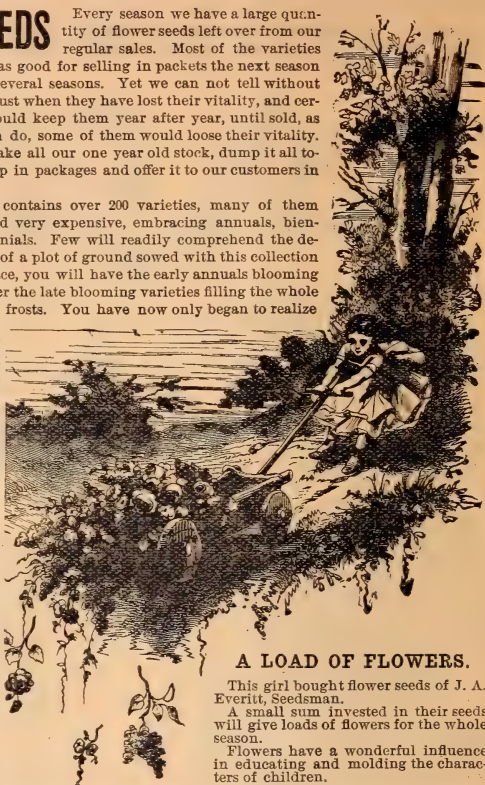

A warm, sunny location should be chosen and the seed sown thinly, so as to give the plants room to develop. If they come up too thickly, they can be thinned or transplanted.

This seed will not take the place of our separate varieties for obtaining certain effects in the flower garden and lawn, but should be sown where you expect to give it no care and where wildness is preferred to order and precision.

Price, Large Pkt., 15 cents; 2 Pkts. for 25 cents; 5 Pkts. for 50 cents.

ONION SEED.

One of our great specialties is choice Onion Seed and one of our greatest specialties is the

OREGON YELLOW DANVERS, OR LONG KEEPER ONION.

This very fine Onion originated in Oregon, and has found its way East in a limited way only for the last two years. Where it has been tested, it takes the onion growers by storm, and there is sure to be a great demand for the seed. We wish to distribute **one thousand pounds** this season, which is the extent of our stock. All onion growers are invited to procure enough seed to thoroughly test its qualities, and we expect to be able to supply the large demand that will result for next year.

Oregon Yellow Danvers, or Long Keeper Onion

is the handsomest,
most productive
and best keeper for
a general crop.

Price, \$1.50 per
Pound.

10 Pounds in one
Order, \$13.00.

Oregon Yellow Danvers, or Long Keeper Onion.

There is Big Money in **ONIONS.**

You can realize
\$500.00 per acre if
you start right, by
sowing our seed and
keep right by
reading the
New Onion Culture,
Price, 50 Cents,
but we will send it
free to all custom-
ers who buy \$3.00
worth of Onion
Seed or more.

The Oregon Yellow Danvers, or Long Keeper Onion, is one of the most beautiful varieties in existence. In shape it is intermediate between the Flat Danvers and Globe Danvers, being very full bottom and top, like shown in the illustration. It is earlier than the Flat or Globe Danvers, a heavier yielder and decidedly the best keeper of all. Order early to be sure of obtaining your supply.

OUR CROP OF ONION SEED is all secured at the date we prepared this circular (it was not when we wrote the Onion Department in our Catalogue) and it is large in supply and fine in quality.

Since our crop is larger than we calculated on, we must sell more, consequently can sell lower and still make as much money. We will always give our customers advantage of cuts in prices whenever possible and surely this year of hard times this big cut we now make will be very acceptable.

Our revised price on a few important varieties is as follows:

WE WILL DELIVER, PREPAID, TO ANY TOWN IN THE UNITED STATES, 5 POUNDS OR MORE OF ANY OF THE FOLLOWING VARIETIES OF ONION SEED, AT \$1.00 PER POUND:

YELLOW GLOBE DANVERS, LARGE RED WETHERSFIELD, SOUTHPORT YELLOW GLOBE, EXTRA EARLY RED AND RED GLOBE.

ORDERS MUST BE FOR 5 POUNDS OR MORE, BUT THEY MAY CONSIST OF MORE THAN ONE VARIETY; NOT LESS THAN 1 POUND OF A VARIETY.

NO PREMIUM WILL BE ALLOWED AT THESE PRICES. THEY CAN NOT BE USED TO GET A MAN-WEIGHT CULTIVATOR AND DRILL FREE (SEE CATALOGUE, PAGE 35), NOR "THE NEW ONION CULTURE," AS ABOVE.

PROVIDED ALWAYS, THAT THIS OFFER IS ONLY INTENDED TO REDUCE OUR SURPLUS, AND MAY BE WITHDRAWN WITHOUT NOTICE. WE COULD NOT GO ON THE MARKET NOW AND BUY SEED TO SELL AT THESE PRICES. EARLY ORDERS ARE THEREFORE ADVISED TO BE CERTAIN OF GETTING THESE RATES,

Address all orders to

J. A. EVERITT, Seedsman, Indianapolis, Ind.

4 Rare Floral Gems

1. ANEMONE JAPONICA.—These are regarded as among the finest of all hardy herbaceous plants. They are very attractive, perfectly hardy and fine for clumps or clusters. The flowers are large and beautiful. A finer bed of flowers cannot be imagined than is made by these Japan Anemones, which begin to open their white and richly colored blooms in August and continue to the end of the season. This plant will please our friends. Fine for cut-flowers.

2. ACHILLEA ALBA.—This plant, called "The Pearl," is a beautiful hardy sort that blooms freely the whole season. Flowers are borne on erect stalks, pure white, resembling a Pompon Chrysanthemum; very beautiful and desirable in every collection.

3. THE MEXICAN PRIMROSE.—This is a novelty lately introduced as one of the most profuse blooming plants in cultivation. It is an ever-bloomer, and will bloom as a pot plant the entire year, a fine specimen often showing from 10 to 30 large blossoms about three inches across.

SOME SPECIAL FAVORITES
 —AND—
RARE FLORAL GEMS.

Surprise Collection
 Of Beautiful Plants.

We are sure all who order this great cheap collection will see that it is the best one for great variety and individual merit of the plants ever offered. The 20 plants, as originally intended for \$1, is a great bargain, but since we have added or rather included the novelties described below, which alone are worth more than the price asked, the offer is simply unprecedented.

Each blossom keeps perfect many days, and when one drops off others are ready to take its place, so the plant keeps up a succession of bloom and beauty throughout the year. It grows freely, either as a pot plant or when planted out in the yard. It is, in short, a plant whose merits of hardiness, ease of culture, freedom of bloom and unexcelled beauty commend it to all who love flowers.

4. SOLANUM JASMINOIDES GRANDIFLORA.—This is a new and beautiful plant inclining to a climbing habit, but can be trained in bush form. Flowers are star shaped like those of a clematis and are borne in immense panicles or clusters several inches across. Color pure white, with a violet tinge on the back of petals and buds. It is a very handsome pot plant, but excels as an out-door bush when trained against the wall or trellis, and when in full bloom is very handsome. It is a free and constant bloomer.

These collections will be sent by mail or express, prepaid, at the price named, but if you prefer to pay express charges we will ship with all the ground to the roots and add a plant or two extra; in this way they will never stop growing when you plant them. Address

J. A. Everitt, Seedsman, Indianapolis, Ind.

You can not afford to waste your time and energies with the old fashioned machines or hoes. Be up with the times and compete with the world.

on all seeds quoted in packets, pints, quarts, $\frac{1}{4}$ lb., lb. and 4 lbs. On all shipments by freight or express, we do not pay transportation.

Everitt's Man-Weight Farm and Garden Tools are wonderful machines. The weight of the body does the work. The hands are free to guide the tools; not one weed will escape. I man will do as much as 10 with hoes. Sow all kinds seed in bill or drill. Hoe crop from start to finish. 30 machines in all where we have no agent, catalog FREE J. A. Everitt, box 58, Indianapolis, Ind.

MAN-WEIGHT CELEBRATED MAN-WEIGHT FARM AND GARDEN TOOLS.

Patented in United States, Canada, Great Britain, France, Germany, Austria, and Belgium.

The Greatest Labor Saving and Crop Producing Machines made.

With these wonderful machines the weight of the body does the work. The hands are free to guide the tools all around the plants, not ones weired will escape.

One man, with a man-weight, will do as much as ten men with hoes, or five men with hand push machines. Just think of the saving in hand hire, to say nothing of the greater ease to the operator.

GARDENERS need them for every crop they grow. Will plant all kinds of seeds in hills or drills, and cultivate equal to a hoe, and many times as fast. FARMERS will have no further use for hoes. With the drill they plant their corn, NURSERYMEN can quickly and mark their ground, doing their right time. SMALL FARMERS find them indispensable. They can save their cost on rated. Three acres can be done in a day. OXOID GROWERS can do without them, cultivating only a few the expense of keeping the Man-Weight Machine cultivator's constant a spring until fall.

By several machines to do the different kinds of work. Our MAN-WEIGHT has the greatest capacity, and is the most convertible machine made. Besides the combinations shown, many others can be made combined machine. Also we are perfecting new tools for 1894 that can be obtained as extras in our catalogue for particular. The wheels are 18 inches high, will not sink in loose soil, nor be ob- clouds or stones.

We all seeds from the smallest, to corn, beans, peas, etc., in drills or in hills, five feet apart or less. MACHINE will save its cost many times over every year in saving of hand hire; in closer plant- ing in super for work; in larger crops; in earlier crops; in crops of better quality; in freeing the beds; in the plants that are saved from the horses' feet; in fact they can be made the

on the farm. This page shows the Man-Weight breaking up the ground. It break up very hard ground, although if a man or a boy pulls any work in this line can be done. To loosen up ground that compact, it is just the thing.

VIEW No. 2. Pulverizes the ground after it is broken up, destroys weeds at a great rate, and makes furrows to receive seeds, potatoes, etc., and covers the seed.

VIEW No. 4. Covers seed in rows, or banks up earth on both sides of the plants.

VIEW No. 5. Is the best drill made. It plants all kinds of seeds, in hills or drills, as desired, covers and marks out the next

Small farmers need not buy an expensive corn drill. This will do work as well, and the cultivators will take care of the crop as it grows, thus away with much machinery, also saving the expense of keeping a horse. VIEWS 6, 7, 8, 9, 10. Are adapted to almost all kinds of cultivation and weeding, and the versatility and adjustability of our machines is such, that, when you know what the machines to accomplish the desired results, with the two drag-bars you can throw the weeds in the row until you come to the plant you want to save, then part them, and again, thus cultivating in the row (the vital part), as well as between the rows, the reach.

were awarded the Man-Weight Farm and Garden Tools at the World's Fair had travelers on the road to sell our tools, yet have not been able to supply the de- mander and suggests the advisability of sending your orders early, although demand this year.

The Man-Weight cannot be sold as cheaply as some old style machines. They are made on the same as two horse cultivators. Yet when the quantity of work they will do is considered, as well as the ease of doing it, they would be cheap at twice the price we ask.

Single Wheel Machine with 5 sets of tools.....	\$6.00
Combined Single and Double, including everything shown, except 5 and 7, and many combinations not shown.....	8.00
Combined Single and Double, and Drill No. 5.....	12.00
No. 7 Combination extra, with 1 inch or 2 inch Shovels.....	1.50
With both Sets of Shovels.....	2.25

and patented in 1891, are already sold all over the world where seeds are sown and plants grown. does not keep them and will not get them, send direct to us. Don't be influenced to take any of the old style competition too great, to waste your energies with them.

FERTILIZERS.

INSECTICIDES.

LONDON PURPLE—One of the best dyes for insects. It is cheaper and less dangerous than Paris Green. The proper proportions for using are at the rate of one pound to 150 gallons of water. The best article for spraying apple trees. Lb. 20c; 10 lbs. \$1.75. By mail, 16c per lb. extra.

TOBACCO STEMS—For fumigating plants infested with green fly, etc. Lb. 15c, bl. \$1.00. By mail, add 16c per lb.

TOBACCO AND SULPHUR—Destroys rose bugs, lice, cut worms, vine bugs, tomato worms, currant worms, cabbage lice and Parasites of all descriptions. Should be applied when the foliage is wet. Also a most complete fertilizer for plants and vines. Mix thoroughly with earth in pots, or in the hill, one part powder to five parts earth. Easy to apply, and will not burn or injure the plants. Makes dark green foliage and healthy, vigorous growth. Valuable for hot-houses, nurseries, etc. No weed seeds in it. Earth-worms will not live where it is used. Package, $\frac{1}{2}$ lb. 25c; 2 lbs. 75c, by mail, prepaid.

Sprayers, Dusters, etc., see Machinery, 3d cover page.

REPORTS FROM USERS OF

EVERITT'S CELEBRATED MAN WEIGHT FARM AND GARDEN TOOLS.

The like was never seen before.

"I think the Man Weight machine is a good invention and I hope you will be bountifully rewarded for your labors."

H. STARKIE, Coburg, Iowa.

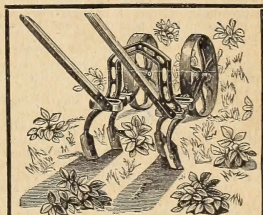

"Our customers say the Man Weight is the boss machine. We will want to order more for next season, as they are far superior to the Planet, Jr., which has had the run here."

J. FILLION & Co.,

Agr. Implements, The Dalles, Oregon.

"Combined Man Weight arrived last Saturday. I should have advised you earlier, but was waiting to give the machine a good trial. The test has been made and the machine has done itself honor. For thoroughly pulverizing a light moist soil I have never seen its equal."

WALTER F. JACKSON, Rocky Mount, N. C.

"This is not a Man Weight Machine. It is one of the old style. Everitt's Man Weight would have hoed the ground in the row as well as between the rows. It is the only machine that does complete work at one operation."

"I have the Man Weight Machine and I don't see how I ever got along without it. It does such good work and so much of it in a short time I can recommend it as being all that is claimed for it."
MISS W. M. TUTTLE, Waverly, Kas.

"The Man Weight gives the best of satisfaction. It is what every man wants who has a garden. I have used mine thoroughly and it is what I need for all kinds of work. I believe I am the only man in Logan county that owns a Man Weight and I would not part with it for its weight in gold if I could not get another."

CHAS. ROBINSON, Robinson, O.

"I have given the Man Weight machine plenty of work and I think it a good machine."

W. W. SUTHERLAND, Honey Falls, N. Y.

"I like the combined Man Weight very well. I find it does good work and the use of it is a great saving of time."

JOS. G. SMITH, Loquel, Cal.

"Enclosed find money to pay for Man Weight Cultivator, and I will say to you that I would not take \$25.00 for the machine and do without it."

E. MAXEY, Springfield, Mo.

"The Man Weight is a little 'Daisy' and fills the long felt want as a garden tool."

L. A. BOYSEL, Cridersville, O.

The grades offered below are selected with special care to meet the want of our customers. They are all of the best quality. Our Powell brands are in the most concentrated form and each package contains specific directions for diluting at home with ordinary earth, that any ordinary person can handle them. Our different grades are several times as strong as ordinary fertilizers, hence by paying freight on 100 lbs. you get 300 to 500 lbs. of fertilizer, as the case may be.

POWELL'S SOLUBLE PHOSPHATE FOR GARDENS.

This fills the bill for the home garden on vegetables, flowers, small fruit, etc., in liquid or dry form at any period of the plant's growth. 25 lb. box enough for $\frac{1}{2}$ acre garden a whole season, 5 times as strong as ordinary fertilizer, \$1.75; 16 boxes, 400 lbs. when diluted according to directions, will make a ton of A No. 1 fertilizer, cost \$28.00 and you pay freight on only 400 lbs.

POWELL'S VEGETABLE FERTILIZER.

This is a high grade fertilizer for the large gardener, trucker or farmer. Will grow an abundant crop of corn, potatoes, cabbage, etc. It is recommended to use in dry form at any period of the crop's growth.

50 lb. box 3 times as strong as ordinary fertilizer, \$2.25; 100 lb. box \$4.00; 7 100 lb. boxes when diluted will make 2100 lbs. of a high grade fertilizer that dealers usually ask \$30 per ton for. Our price per ton is \$25.00 and you pay freight on 700 lbs. only.

POWELL'S NITRATE OF SODA.

A Fertilizer for all crops, and the only means by which the largest per cent. of Nitrogen can be applied to soils. This is valuable solely for the nitrogen it contains, equal to twenty per cent. of ammonia. It is very quick in action, and hastens maturity of crops fully two weeks. It is valuable for grain, fodder corn, sugar beets, potatoes, grasses, peas, beans, clover, etc. Being extremely soluble, it should not be applied until the plants are above ground, when 100 to 150 lbs. per acre should be given with other fertilizers, or mixed with Phosphates or earth.

50 lb. boxes per box \$2.25; 300 lb. double bags per bag \$10.00.

POWELL'S MURIATE OF POTASH.

This is the purest form of potash, and potash is a constituent of all complete fertilizers and many special preparations. It is particularly beneficial to all spring crops, like potatoes, corn, garden crops, etc. Full directions how to dilute and apply sent with each package.

50 lb. boxes per box \$2.25; 300 lb. double bags per bag \$10.00.

POWELL'S DISSOLVED BONE BLACK.

This is also known as Superphosphate and is valuable for the phosphoric acid it contains. It is valuable on many spring crops, but of special value for wheat to be drilled with the seed. Full directions sent with each shipment.

50 lb. boxes per box \$1.75; 300 lb. double bags per bag \$8.00.

BOWKER'S PLANT FOOD (for House Plants.)

Perfectly odorless and clean. Each package contains a pamphlet on the treatment of house plants, with directions for applying the fertilizer. By express, per package, 25c. Per dozen, \$2.50. By mail, postpaid, box 40c.

Every Person depending on the products of the soil for his living, his pleasure or his profit, should read these books:

FOOD FOR PLANTS. By mail, 15c.

POTASH IN AGRICULTURE. By mail, 15c.

Insecticides and Fungicides cheap. Efficient, reliable poisons for ridding plants, trees, shrubs, etc. of injurious insects and overcoming fungus diseases are absolutely necessary if you would enjoy the fruit of your labor and a very important factor is to have them on hand when needed, hence we advise you to order them early and always keep a supply on hand.

BORDEAUX MIXTURE—Probably the best known fungicide for black rot, downy mildew and anthracnose of grapes, potato blight, potato rot, leaf blight of cherry, pear, quince, and other fungus diseases. 20 lb. package (50 gals. wash), \$1.00.

COPPERDINE—Equal to above and easier handled. For black rot, downy mildew and anthracnose of the grape, pear leaf blight, pear-scab and powdery mildew. One gallon cans (making 100 gals. wash), \$1.50.

QUASSAINE—This is a concentrated fluid extract Quassa, held in suspension by Whale Oil Soap—a cheap and reliable non-poisonous insecticide for hop lice, aphids, and all scale insects; nothing better for tree bethus and house plants. Quart cans (50 gals. wash), 75c, gallon cans (100 gals. wash), \$2.25.

GUICIDE POWDER—For potato blight, potato rot, grape vine flea beetle, potato bugs, pear and cherry slugs, codling moths, curculio and strawberry crown borers. Can be used either dry or in solution. 25 pound box, \$1.50.

KEROSENE EMULSION—For plant lice of any kind, cabbage worms, scale insects on apple, pear, orange, lemon and other trees. 5 gallon buckets (makes 75 gals. wash), \$1.25.

CARBOLIZED SOAP—For peach, apple and other trees before rose for washing trees to prevent attacks of animals or vermin. 1 gallon can (makes 12 gals. paint), \$1.00.

SULPHO-STEATITE POWDER—For lettuce mildew, powdery and downy mildew of the grape, rose mildew and other fungus diseases affecting plants under glass. 25 lb. box (used as a dust), \$2.00. By mail, 1b. 35c.

PYRETHRUM, or PERSIAN INSECT POWDER—Very destructive to all kinds of insects, such as roaches, ants, fleas, and other insects on plants and animals. Very little will do the desired work. **Box 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.** By mail, 16c lb. extra.

WHALE OIL SOAP—Makes an excellent wash for trees and plants, kills insects and eggs on the bark. Lb. 15c (by mail, 30c). By express, 2 lbs. 25c, 5 lbs. 50c, 10 lbs. 90c.

WHITE HELLBORE—For destroying rose slugs and currant worms. $\frac{1}{2}$ lb. 15c, lb. 40c. By mail, 16c lb. extra.

SLUG SHOT—Non-poisonous; no danger need be apprehended by the person applying it, nor will it injure chickens or animals should they eat it, unless in large quantities. It does not render injurious the vegetables and fruits on which it is applied and yet it is probably the best insect destroyer ever offered for the destruction of potato bugs and all worms and insects. It comes ready to be applied, and is simply dusted lightly on so that it reaches all parts of the plant. For further information send for "Fighting Insects in the Garden." Sent free. Our sales of Slug Shot are very large. We send it to all parts of the country.

PRICES—Barrels, holding 235 lbs. net 4c per lb.; 100 lbs. \$4.25; 50 lbs. \$2.25; 10 lbs. 50c; 5 lbs. 30c. By mail, postpaid, lb. 30c; $\frac{3}{4}$ lbs. 15c. In ranches containing $\frac{1}{2}$ lb., with perforated top that unscrews, so it can be filled again, 25c each; by mail, 40c each.

Dusters for Slug Shot or other Powders— $\frac{1}{2}$ gal. size, 30c; gal. 50c.

Bellows for Slug Shot or other Powders—Medium size, \$1.25; large \$2.00.

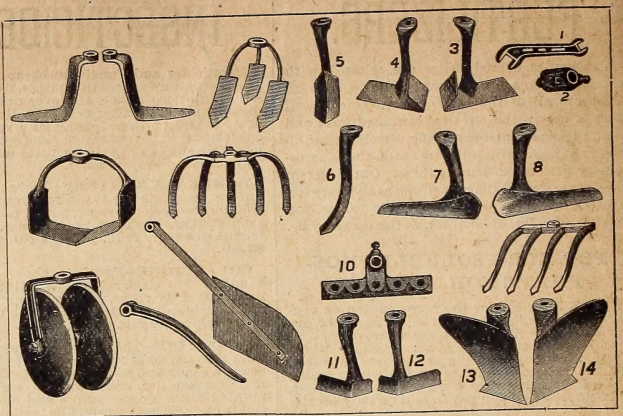

HAMMOND'S GRAPE DUST—For the prevention and destruction of mildew on plants. Price 10c per package, 25c per 100 lbs. \$5.00. By mail, postpaid, 30c per lb.

TOBACCO DUST—Very effective; much used on cabbage. Lb. 10c (by mail, 30c). By express, 10 lbs. 50c; 25 lbs. \$1.00; 100 lbs. \$3.25.

PARIS GREEN— $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 20c; lb. 35c. By mail, 16c lb. extra.

Machinery Tools, etc., 3d of Cover.	

"My customer, for whom I ordered the combined Man-Weight, is more than pleased with it. I have given him all the time he wanted to test it."
ELMER V. WALKER, Oxford, Me.

"I received the Man-Weight Cultivator and have given it a trial and find it better than I expected. I think it is one of the grandest garden tools ever invented, and I would not give it for any other that is in the market. Fifty dollars would not buy me one I could not get another."
JACOB BRICKER, Muncie, Ind.

"The Man-Weight Cultivator works like a charm. The man using it says he would not be without one."
SIMON SEYERT, Gibraltar, Pa.

"The Man-Weight is truly superior in its class and a curiosity in my neighborhood."
F. M. MYERS, West Salem, O.

"I am well satisfied with the Man-Weight machine and shall do all in my power to recommend it to my neighbors."
WM. C. DENHAM, Tekama, Kas.

"The Man-Weight machine arrived and I had much pleasure with it. It does the work all right. Every man whose garden I had it in said it was the greatest plow they ever saw work."
ALLEN GUINN, Sellersburg, Ind.

"Man-Weight Cultivator is received and it is gratifying to know and be able to state that it fills the bill to the very letter of the law."
A. D. HOUSER, Annapolis, O.

"The Man-Weight Cultivator proves to be just what you say. I am well satisfied with the purchase. Will do all I can to make sales." C. G. SCHAEFFER, North Freedom, Pa.

"The Man-Weight Cultivator has given me complete satisfaction. It is one of the best tools ever invented for the garden and I could not do without it."
G. W. RESELY, Atwood, Ill.

"The Man-Weight Cultivator is perfection, so much lighter to work than the old fashioned "pusher." I am highly pleased with it."
W. M. GIRARDEAU, Seed Grower, Monticello, Fla.

"We received the Man-Weight Cultivator all right and were very well pleased with it. We have a large garden and worked it entirely with this machine. We never had a nicer garden nor one better filled with nice things than this summer. We would not do without it. Those who saw it work say it is the best cultivator they ever saw."
Mrs. ROZETTA MENTZER, Albion, Mich.

"In popular language the Man-Weight Cultivator is a "daisy." I think it saves 500 per cent. over the use of the hoe in running through the strawberry rows. A neighbor is equally as enthusiastic." E. LORELEY, Albion, Mich.

"I delayed writing you I had thoroughly tested the Man-Weight machines in different kinds of soil, and now can say it is worked very nicely for me in the various crops of a vegetable garden as a weed killer, far more in effectiveness and speed any of the old style hand push machines I have ever used, besides it is much lighter and easier to manage. It pulverizes the soil better than any other garden tool I have ever seen much lighter and easier to manage. It pulverizes the soil better than any other garden tool I have ever seen in operation. It does away with horse cultivation in many cases, thereby saving plants from destruction. I think much of the movable drag bars, allowing you to adjust the machine to wide or narrow rows. I think the principle on which the machines are constructed sound, practical and hard to beat."

"I have tried the Man-Weight Cultivator and find it a good tool. It will, to a great extent, take the place of horse cultivation and is many times faster than hoeing. It can be used for all kinds of work and particularly is it valuable after a dashing rain to loosen up the ground."
N. NEDAM, Indianapolis, Ind.

"The Man-Weight Plow works beautifully. I can do as much work and better in one hour with it than with a hoe in three hours. It is only by using it and observing the results that its value can be realized. In time you will make extensive sales. We have two Jersey cows giving over a pound each of butter daily. For the profit. Alden's Cyclopaedia and other books, for instructions, a piano for entertainment and have Everitt's Man-Weight Cultivator to insure wholesome rations."

"Cultivator to hand O. K. I set it up as a double machine and worked a half acre of potatoes that have admirably well, so much so that I truly would not take four times the price for it, were I unable to procure another. This may appear to be strong language on first trial, but I know after I had it for a while that I would not part with it at all. It attracts considerable attention." W. BURN FOX, Portage, Wis.

PRICE Of Man-Weight Machines will be found on last Cover Page.

Besides the attachments regularly furnished with the machines, we can furnish a number of extra attachments, as illustrated above. The value of some of these attachments every farmer or gardener who has used them on large horse cultivators, will understand.

All extra attachments sent by freight or express at expense of purchaser for transportation. It will be well to decide what you want and have them sent with your machine.

Further Particulars of these great machines may be had from our Catalogue of "Celebrated Man-Weight Farm and Garden Tools." Sent free on application.

Tools for Farmers, Gardeners, Nurserymen, Florists, etc.

On the next page we have gathered together, in condensed form, a very complete list of valuable tools, implements, etc. They are the best of their respective kinds, and any person in need can not make a mistake by selecting from our collection. We have aimed to make our prices as low as the higher quality of the goods will permit.

TRUCKERS, GARDENERS AND FARMERS' DIRECTORY OF THE U. S.—Send us the names of all the Truckers, Gardeners and Farmers in your neighborhood. For your service, add a 5c pkt. of seeds to your order for 5 names or two 5c pkts. or one 10c pkt. for 10 names or more. If there is not sufficient space provided on the order sheet, use a separate sheet. Don't confuse the names with your order or we can not use them.

WE OFFER NO PREMIUMS for extra specimens or yields. Ordinary farmers cannot compete with fancy farmers to obtain them, as the latter put months of work on such crops. We offer you good, reliable seeds which require no fancy cultivation to give you satisfaction. Ordinary care and a place alongside of any other varieties you grow, is all we ask, and this will prove the metal O.K. seeds are made of.

CLUB ORDERS. Send us one. If your neighbors do not receive our catalogue, call on them and compare it with any catalogue they may have. We think the comparison will be favorable to O.K. Seeds, in which case send their orders along. Always send full address of each member of a club. We can send the seeds all to one address or several, as you may wish. **\$1.50 worth of Seeds for \$1.00.**

We hope all our friends will have a prosperous year. Address all orders for everything in this Catalogue to

J. A. EVERITT, SEEDSMAN, INDIANAPOLIS, INDIANA.
